Baker Plan: Behind the Golden Sheen

By Reginald Dale

al Herald Tribune PARIS - U.S. Treasury Secretary James A. Baker 3d ensured maximum attention for his latest monetary reform proposal in Washington this week by the use of one small, but heavily

eighted, word — gold. Gold, one U.S. official said Thursday, was ne "eyecatcher" in Mr. Baker's proposal that the seven leading non-Communist industrial nations start taking account of world commodity prices in their efforts to coordinate econompolicies and stabilize their exchange rates. But the surprise mention of gold in Mr.

Baker's proposed "basket" of commodities distracted attention from the main thrust of his plan, which, according to some analysts, could actually reduce the metal's role in the world monetary system.

Mr. Baker said at the annual meeting of the International Monetary Fund and World Bank on Wednesday that gold should be included in early warning signal of the likely worldwide trend of inflation. Britain's chancellor of the Exchequer, Nigel

NEWS ANALYSIS

Lawson, also called for establishing a joint system to manage currency levels that would monitor commodity price trends in an effort to avoid a world resurgence of inflation. Unlike Mr. Baker, however, Mr. Lawson avoided any reference to gold.

In setting their joint policies, Mr. Baker suggested, the Group of Seven countries — the Urried States, Japan, West Germany, France, Britain, Italy and Canada — should take the

commodities index into consideration alongside other indicators already under scrutiny such as economic growth, trade balances and

In the United States, "gold bugs" like Representative lack Kemp, Republican of New York, reacted with joy to Mr. Baker's proposal, seeing in the plan what they took to be the first sign of the return to an international gold standard that they have long been advocating.

The dollar slipped in New York, ending

Mr. Kemp, a conservative contender for next year's Republican presidential nomination, described the proposal as "a victory for those of us who have been working to restore a sound dollar and low long-term interest rates. Such a See ASSESS, Page 17

5 Killed As Quake Hits L.A.

Damage Severe In Some Areas; 100 Are Hurt

LOS ANGELES - A strong arthquake and a dozen aftershocks struck the Los Angeles area during the morning rush hour Thursday, killing at least 5 persons, injuring more than 100 and severely damaging dozens of buildings and forcing the closure of three

Walls crumbled, windows shattered, ceilings collapsed and fires were touched off by ruptured gas lines in scattered locations throughout the metropolitan area

of Los Angeles, the second-largest city in the United States. Thousands of early morning workers were ordered to evacuate downtown office buildings, and power failures trapped scores of

them in stalled elevators. It appeared to be the worst earthquake to hit Southern California since 1971, when 64 people died in a strong tremor, meas

on the Richter scale.

Reports of the magnitude of Thursday's quake varied from 5.5 to 6.1 on the scale. The Richter scale is a measure of ground motion as recorded on seismographs; every increase of 1 on the scale means a 10-fold increase in magni-

Seismologists said that there was a 5 percent chance that a bigger quake would hit Los Angeles withm hve days.

The earthquake was felt 110 miles (180 kilometers) to the south in San Diego, 85 miles to the north in Santa Barbara and 225 miles to the east in Las Vegas.

There was extensive minor damage within a 20-mile radius of the center, which was 10 miles east of the city's downtown. Some areas were severely hit, but there did not appear to be widespread major damage from the tremor.

The quake caused tall buildings to sway, shattered windows, knocked out power and sent thou-sands of people into the streets.

In addition to claiming the lives of the five victims, the earthquake resulted in at least 41 heart attacks, 36 fires, 35 traffic accidents and 67 gas leaks, a fire department spokesman said. The department was sewas critically injured.

At the City Hall emergency center in downtown Los Angeles, a spokesman said: "All downtown buildings have been evacuated, including Parker Center, which is the police department. At the time of the earthquake, about 3,000 were evacuated from city-run build-

Telephone, radio and television systems were momentarily knocked out of service.

Broken glass from thousands of windows littered the streets, which were being patrolled by hundreds of police officers. Rock slides left boulders on

many of the area's major commuter highways, forcing the California Highway Patrol to close parts of See QUAKE, Page 5

Crown Prince Akihito at the Imperial Palace.

Japan's Patient Prince: Rising Son for 53 Years

By Clyde Haberman New York Times Service TOKYO -Two months short of his 54th birthday and nestled in comfortable middle age, Crown

Prince Akihito of Japan waits for his life's work to begin. He has become very good at it. All his life he has waited, and court chamberlains say that he is more than glad to keep doing so. But some day his time will come.

Inevitably, barring cataclysm, he will succeed his father, Emperor Hirohito, on the Chrysanthemum Throne, and thereby become the 125th Japanese monarch in a line that, dubious legend has it, extends unbroken from Jimmu in 660 B.C. Not surprisingly, Akihito has long braced himself for his ascen-

Someone asked him the other

day what he might have done with his life had he not been born into the imperial family, and he replied that he never really thought about it. That was true even as a boy. when he studied English under an American teacher, Elizabeth Gray Vining, a Quaker from Philadel-

"I recall replying that I shall be the emperor, when Mrs. Vining asked the pupils in her English class what they would like to be in the future," Akihito said in a written response. "Accordingly, I don't think I have ever considered what I would wish to do, as I don't have the experiences of a regular Japanese citizen, and I can't imagine being able to choose another way of life."

As best as anyone can tell, there has never been an older crown

prince than Akihito, although that, of course, is merely a footnote to the more important fact that no Japanese emperor has lived longer or reigned longer than Hirohito, 86 years old and about to complete 61 years on the throne.

How long the crown prince has bided his time was reinforced for his countrymen this week as be

'I can't imagine being able to choose another way of

filled in as proxy emperor while his father recovered from his first surgery ever, an intestinal operation. Not that an emperor, real or proxy, has that much to do. Having tumbled from divinity after Japan's defeat in World War II, he mostly signs official documents, presides at banquets and greets visiting heads of state.

But the imperial family remains an important, even revered, institution for many Japanese, and its responsibilities are taken seriously. Nowhere is that more true than in the Imperial Household Agency, whose hidebound bureaucrats dictate virtually every move of the emperor and his family.

The agency decided at the last minute that Akihito's ceremonial duties required him and Crown

Wary Air in Manila Stirs Doubt on Aquino

By Keith B. Richburg

Washington Post Service MANILA - A continuing climate of political uncertainty is creating a widespread mood of antigovernment pessimism and raising serious new questions about the ability of President Corazon C. Aguino to survive in office, according to political analysts, opposition leaders and foreign diplomats.

The uncertainty appears fueled by fears of another coup attempt, bolder attacks by communist guerrillas and the government's seeming inability to articulate a national agenda for solving the country's economic ills, these officials said.

Concern over another coup attempt by forces loyal to Colonel Gregorio Honasan, who led a coup attempt in August and who is still at large, put the military on full alert again Wednesday amid re-ports of unusual troop movements north of Manila.

The government appeared preoccupied, responding to a secret report that was said to have listed the names of more than 100 communist sympathizers in the Philippine Congress and the top ranks of the administration.

The military was trying to determine how another right-wing rene-gade colonel. Reynaldo Cabautan. who took part in a failed coup attempt in January and is also at large, managed to hold a broadcast news conference Tuesday night in a

downtown office building.

The day's events added to the ity even as Mrs. Aquino prepared to bolster her image with a series of public trips around the

Almost 20 months after Mrs. Aquino took power in a popularly backed military revolt, diplomats, journalists and political analysts have begun to question how long she will remain in office. "It's out of her hands," one diplomat said. Her survival depends on what others do in the next few weeks." He said the "others" included the military as well as Colonel

Mrs. Aquino's sagging political fortunes have caused divisions umong foreign diplomats. Political officers tend to paint a more optimistic picture of her prospects; military attaches, overwhelmingly gloomy, see the government as too distracted to combat the insurgeney successfully.

Among the Philippines' neighbors in the Association of Southcast Asian Nations, several are known to prefer transferring the association's next meeting, sched-uled to be held in Manila in December, to another venue.

The "People Power" coalition that united last year to depose the

U.S. Speeding Military Aid To Aquino Since Coup Effort

MANILA - The United States The day's events added to the appearance of confusion and instasince a military coup almost over-threw President Corazon C.

The U.S. ambassador to Manila. Nicholas Platt, said belicopters, armored vehicles and trucks were being shipped to Manila at Mrs.

Aquino's request.
In his first speech since arriving in the Philippines just before the unsuccessful coup attempt Aug. 28, Mr. Platt realfirmed U.S. support for Mrs. Aquino and promised "continuity, steadfastness and consistency" in policy.

Suggestions that the Central Intelligence Agency or other U.S. agencies had backed the coup were "false and ludicrous," he said.

Nicholas Platt, the U.S. ambassador to Manila, at his speech on Thursday.

supporters. In interviews with business exec-

utives, diplomats and pro-government and opposition politicians, almost no one was willing to bet that Mrs. Aquino could last through the the next four and a half years - the remainder of her term - and turn over power to a legally elected successor in 1992. At the same time, these officials could point to no alternatives to Mrs. Aquino's remaining in power.

Few in Manila see Mrs. Aquino's voluntarily relinquishing the presidency, given her own sense that she has some kind of divine mission to save the country after the assassination in 1983 of her husband, Benigno S. Aquino Jr. Rather, they say, if Mrs. Aquino leaves office, or relinquishes power to some kind of a ruling council, it would be a move forced upon her, perhaps by the

military.

Mr. Laurel's break, although largely played down by local analysts, seems to pose the gravest threat to Mrs. Aquino's tenure, in the view of many foreign diplomat-

Despite his public denials, Mr. Laurel appears poised to join forces with Mrs. Aquino's opposi-tion, particularly the ousted defense minister, Juan Ponce Enrile. Such a move would give Mrs. Aquino's right-wing opponents an ally who can legally and constitu-tionally succeed her should she reinquish power before the end of The succession issue is crucial,

Democrats, Assessing Damage To Dukakis, See Wider Fallout

By Paul Taylor

Washington Past Service

WASHINGTON — Democratic political insiders differ widely about how severely the presidential campaign of Governor Michael S. Dukakis of Massachusetts will be damaged by the disclosure that his staff sabotaged a rival candidate and by the way he handled the

But they agree that the cumulative effect of the crises that have hit the Democratic field this year soured their party's prospects for winning the presidency next year. The candidacies of Gary Hart and Senator Joseph R. Biden Jr., a Democrat of Delaware, already have been destroyed.

"It's like a bad dream that started about five months ago and hasn't ended yet," said Robert Beckel, 1984 campaign manager for Walter F. Mondale. We keep saying these are isolated incidents, but you can't have this much bad news in such a short time and there not be a fallout."

" Andrew Kohut, president of the Gallup Poll, said: "In the public mind, running a campaign becomes - a metaphor for running a government. The problem is that these kind of episodes reinforce the impression in the public's mind that Democrats can't manage things." A surviving 1988 campaign man-

ager, who asked not to be identi-fied, said that "it takes the sleaze issue away from os." Several observers said they viewed Wednesday's disclosures as

more our

of DNA that serve as markers to pinpoint specific regions of the chromosome.

In the studies, normal tissues and small-cell lung cancer tissues from nine patients were compared. The comparison indicated that the cancers arose when a small portion of a particular region of chromosome 3 was lost.

The findings suggest strongly that the cancer-promoting defect is the loss of both copies of a gene that normally acts to suppress cell growth, said Dr. Susan L. Naylor of University of Texas, one of the authors of the report.

She said that while the evidence was not conclusive the original results had been strengthened by the discovery of the same deletion of genetic material has in about 20 more cases since the report for Nature was prepared.

The suppressor gene would presumably be the eprint for some still unknown substance that acts to prevent excessive growth of the cells

Normally a person would have two copies of the gene. Only when both were lost would their protective effect would be lost as well.

Genes that may contribute to the origin of cancers when they are altered abnormally are known as oncogenes.

some 3 are also known to be linked to other cancers, including some cases of kidney cancer and melanoma, a serious form of skin cancer. The report said it "remains to be determined" whether the same precise location on chromosome 3 is also the key to the other cancers.

An Oil Embargo Matters

The U.S. Senate was right to vote unanioil embargo - even one supported by U.S. allies - will not have much effect on Iran's ability to sell oil and buy arms. The embar-Iran and slightly higher costs for America. Still, the message that the U.S. embargo sends to Tehran is worth the price.

The Senate acted after a report in The Washington Post called attention to the fact that in July, Iran had become the nation's second-targest supplier of oil. All told, the United States has purchased \$500 miltion worth of Iranian oil this year, \$300 million more than in all of 1986.

It is not hard to guess why. When the tanker war in the Gulf heated up this summer, most big oil companies sought to increase their inventories. Much of the oil supplied by the major exporters is committed months in advance to specific buvers. But from trades most of its oil on the day-today "spot" market, and thus accounted for a disproportionate share of the extra sales. That does not mean that a U.S. ban on Iranian imports would have reduced Iran's

on revenues very much, if American com-

panies had not purchased the oil, others

mously to bar imports of Iranian oil. At the bit lower, since other bidders would presame time, it should be understood that an sumably have found the shipments less well matched by distance to market or specific chemical refining needs. The difference would have amounted to pengo will simply mean slightly less profit for tries a barrel for Iran - at most a few million dollars for a country that exports 30 to 75 million barrels a month.

A total embargo on purchases from Iran could make a big difference - if it could be enforced. Crude oil is famously fungible. very difficult to track en route to the refinery. South Africa, for example, has never had much difficulty finding suppliers willing to ignore principle for a few dollars a barrel. Thus, without a military blockade, the best one could expect from an agreement to boycott Iran would be a 10 to 20 percent cut in Iranian export revenues.

Then why bother with an import ban? Because symbols can matter. Carrying on business as usual while American ships are threatened by Iranian mines muddies the message to the Gulf states. If Americans won't pay a few extra pennies a barrel for oil, why should anyone believe that the United States will make real sacrifices to deter franian expansionism?

- THE NEW YORK TIMES.

A Choice for UNESCO

The distinct possibility now exists that Amadou Mahtar M'Bow, the Senegalese who more than anyone brought UNESCO to its current low state, may shortly be in a position to administer the coup de grace. Widely identified with the politicizing and the mismanagement of UNESCO, he had said he would not run for a third term as director-general, but he is. If he is re-elected, the number of nations following the United States and Britain out the door will grow, and UNESCO will face terminal drains of funds, prestige and usefulness.

The 50 members of UNESCO's executive board meet in Paris next week to nominate a candidate for later confirmation by the full membership, Mr. M'Bow, playing on African regional sentiment and using the power of patronage, appears to have 18 to 20 votes - short of the necessary majority. Somewhat fewer votes are claimed by Foreign Minister Sahabzada Yaqub Khan of Pakistan, who is well known in diplomatic life but whose military past lowers his standing in Latin America and elsewhere. The dark horse is Federico Mayor Zaragoza, a Spanish biochemist and former education minister whose advantage and disadvantage is that he served as Mr. M'Bow's deputy.
The M'Bow candidacy rides on the reluc-

evidence of unfitness to interfere with bloc logrolling. Still, an alternative is possible. To counter the M'Bow early-ballot strategy, the Europeans (and Japan) now seek to have the executive board stretch out the balloting and to open the contest to candidates who might come in if no announced candidate got an early majority. They have in mind Enrique Iglesias, a development economist of world standing who is Uruguay's foreign minister. He reportedly feels that to have to employ the divisive and often sordid tactics of bloc politics to win the post would make it not worth winning. But there is reason to believe he would consider a consensus draft.

Whether UNESCO can ever reform itself to the point that the United States would contemplate rejoining is a question that engages lew Americans these days, certainly not many in the Reagan administration. The Congress is unwilling to pay in full even for UN activities of which it approves. But the necessary prior question is whether UNES-CO's Third World members have any serious intent to save it in order to help recreate the international culture of the mind that was the organization's founding inspiration. The voting for director-general will tell.

Baker Is Still Right

Putting heavy emphasis on economic Things are moving mostly in the right growth, U.S. Treasury Secretary James direction, but Mr. Baker had several im-Baker urges the world to stick to its present provements to suggest. Addressing the adstrategy for managing Latin America's debts. Growth is the key to this debate. Some Latin countries say they need sweeping reductions in their debts to enable their economies to erow. Mr. Baker responds that most of these countries are now getting along pretty well and any debt reduction would threaten their future development. The evidence supports Mr. Baker.

Among the Third World's biggest debtor countries, growth now averages about 3.7 percent a year, a good deal higher than in America. And their export earnings are rising. But if their goal is continued growth, the debts must be handled in ways that preserve these countries' access to international trade and finance. That is how countries get rich Mr. Baker did not need to point out that many Latin countries have experimented with economic isolationism and import substitution, thereby enriching a few people but only at the expense of

versary relationship that has evolved between some developing countries and the International Monetary Fund, in its role as financial policeman, he gently nudged the IMF to give more attention to these countries long-run prosperity while working on their short-run deficits. He proposed setting aside resources within the IMF to cushion unpredictable shocks like natural disasters. sudden drops in commodity prices and sudden rises in interest rates.

It has been just two years since the secretary laid out his plan for Latin debt. While sucking with its basics, he was also trying to acknowledge some of the debtor countries grievances. The Baker plan is proceeding more slowly than its author expected, chiefly because the rich countries growth rates, and the markets for Latin exports, have expanded less rapidly than he had assumed. But if progress has been slower than he hoped, it is still progress and it is substantial.

- THE WASHINGTON POST.

Cement the Partnership

The United States and Canada have only a fen days to make history. Monday is the deading for agreement to meld the world's largest trading partnership into a zone of freet trade. Success or failure will shape both countries' economic development and North

America's role in the global economy. There is a way to capture this moment: Prime Minister Multoney and President Reagan must step in personally and direct their negotiators to find compromises. Neithat side expects or wants completely free stude, nor does either desire to dissipate the momentum toward that goal. But by Monday, the administration must notify Congrees that it has a deal or is close. If not, its accounting authority evaporates.

Mr. Mulroney proposed the pact in 1985 to guarantee Canadians petter access to the world's largest economy. Mr. Reagan enderred a because the United States needs Canada's natural resources and its markets. Canada walked out last week after 18 months of negotiation. The issue was its demand for firm rules to settle disputes Ottawa reasonably wants a reliable shield against U.S. protectionists. Washington has

legitimate concerns, too Canadians resist

negotiating on taxes and subsidies affecting

trade. Ottawa also soeks to preserve Canada

an culture - like its own publishers of books and magazines. And it wants no change in the existing free-trade pact on cars.

U.S.-Canadian trade totaled about \$125 billion last year. Each is the other's best customer by far. Canada buys one-futh of U.S. exports - as much as all 12 nations of the European Community and twice as much as Japan. The United States buys three-quarters of Canada's exports: a third of U.S. foreign investment is in Canada.

But the two nations are hardly equal, and there's the rub. Canada, while easer to win more of the U.S. market, fears being overwhelmed by its giant neighbor. And some American industries, like lumber, want to bur Canadian competition. Protectionists pressing to limit concessions have, as usual, turned on more heat than the industries that stand to gain from wider trade. And both countries' leaders are weaker politically than

when they launched this grand design. The resistance to freer trade in Congress and Pariiament is formidable. It threaters the improved relations that the president and the prime minister have fostered. If they are to preserve what they have gained and set their nations on an even more promising path, they must reach for agreement quickly

OPINION

Glasnost: Doubt the Russians, but Work With Them

CHESTER. Vermont — The United States and the Soviet Union are on the verge of a potentially major improvement in their relations and so far no disastrous incident - like last year's Zakharov-Daniloff affair - has erupted to spoil the momentum. Let us hope none will.

Both superpowers have something to gain by concluding a verifiable agreement to eliminate medium-range missiles and then negotiating other curbs on conventional forces, nuclear testing and strategic missiles.

Yet questions will remain: Can the Russians be trusted? Have they really changed under Mikhail Gorbachev's glasnost? Have they suddenly become more open, more honest?

There is no doubt that the Soviet Union is making a radical effort to identify its many domestic problems and find modern, less ideological solutions. How successful it will be is yet to be seen. So (ar. glasnost has done little to improve the economy and the overall living standard.

Abroad, the Kremlin is engaged in a high-powered effort to persuade the West that Mr. Gorbachev's leadership is more flexible and straightforward than that of his predecessors.

In late August, I was invited to attend an unusual Soviet-American conference at Chautauqua, New York. The last thing I wanted to do at that time was come face to face with 240 top officials from a country that had given me some of the worst weeks of my life. A year had passed since the KGB took me hostage to obtain the release of its spy, Gennadi Zakharov, arrested in New York on Aug. 23, 1986, by the FBI. I am still bitter about being made persona non grata in a country that I have spent most of my professional career covering. But I cannot live in hitterness forever.

In the end, I decided to go. If anyone would feel awkward, it should be the Russians, not me. imagine my surprise, then, when Leonid Dobrokhotov of the Communist Party's Central Committee complimented me on my coverage of the Soviet Union. I was even more taken aback when he expressed the hope that I would continue to write on Soviet-American affairs.

It was an Alice-through-the-looking-glass

encounter. Prior to glasnost, other American journalists in Moscow and I were attacked for being overly critical and hostile. Now, the Soviet press is criticizing some of the very things that we were upbraided for reporting.

Important signs of change cannot be denied:

• Mr. Gorbachev ended the bitter exile in Gorky of Andrei Sakharov, which had become a cause célèbre in the West and troubled many Soviet intellectuals as well.

 He is trying to maneuver the Soviet Union out of Afghanistan, although he still is not ready to pay the full price demanded by the West: return to the status quo ante.

• The Soviet Union has allowed a congressionai delegation to make an extraordinary visit to the secret and controversial Krasnovarsk radar station, which U.S. officials believe violates the SALT-2 arms control agreement.

sian gulls were bred."

By Nicholas Daniloff

 The Russians have improved their Far East flight-control center to guide commercial flights between Alaska and Japan and avoid another incident like the shooting down of Korean Air Lines Flight 007 in 1983 that killed all 269 aboard. Moscow is taking actions that even a year ago did not even seem imaginable. Still, it is too early

say that the leopard has changed its spots. History weighs heavily on the Soviet Union. In centuries past, lying and deception were instruments of power freely used by the czars. Soviet officials today are not yet known for devotion to the truth. This is hardly surprising. Any government wants to present itself in the best possible light. In the Soviet Union, there is no legal opposition (loyal or disloyal) to leak the other side of the story; there is no

independent press to dig it out.

The Soviet Union continues to be governed by a self-appointed elite that does not spring from the population at large and is not accountable to the viet people. The members of the Politburo and Secretariat are not restrained by the checks and balances that divide and limit power in the United States. They face no agonizing objections from the Supreme Soviet, no challenges from the Soviet Supreme Court. In world affairs, only the United States and its Atlantic alliance allies constitute

a check on the power of the Kremlin.

Mr. Gorbachev's major preoccupation is not with truth-in-arms-deals but with the economy. which is in serious disarray and in danger of falling fatally behind the advanced industrial

world's economy. The situation is so grave, as even the Soviet military concedes, that priority allocations of resources are no longer enough to keep its equipment on a par with the West's. The general staff knows that the Soviet economy as a whole must be reformed.

The Soviet Union is going through a perilous transition that is likely to make everyone but the most self-confident Soviet politicians feel insecure. Bureaucrats who execute orders know they are in danger of being removed. Military leaders know they are under scrutiny while carrying the responsibility of defending the nation (as the case of Mathias Rust, the young West German who flew a plane to Red Square, showed). Economic planners are being forced into uncharted waters. Ideologues are being told by Mr. Gorbachev and his aides that Marx, and possibly even Lenin, were not always right. An insecure nation takes risks only after deep

calculations, and the Kremlin is doing plenty of calculating. It has good reason to want to con-clude arms deals with the United States. Americans have their own reasons to join in.
We should move ahead in this new and, one

hopes, productive Soviet-American dialogue. We should deal with each other seriously, without insults and with mutual respect. But Americans should never delude themselves that glasnost has reformed the adversary or liquidated its imperious practice of using deceit and bluff to make up for chinks in its armor.

The writer, on leave from U.S. News & World Report, is writing a book about the Soviet Union. He contributed this comment to The New York Times.

Glasnost: A True Test Is How the Jews Are Treated

A Kremlin's treatment of Jews, the Soviet Union's most Westernized community, may serve as an early indicator of its Mikhail Gorbachev's policy tofuture policy toward the West.
A struggle between two persolely by emigration statistics. ceptions of glasnost is under way. On the one hand, there are

the pro-Western forces; on the other, ultranationalists who, once dormant, are trying to gain ground during the current period of ideological instability.

Jewish issues lie in the fore from of the general political debate. Such recent events as the exhibition of paintings by Marc Chagall at the Pushkin Museum: the sudden "discovery" of Soviet Jewish war heroine hanged by the Nazis; and a reception given to Pamyat, an anti-Semitic organization, at Moscow City Hall represent muscle-flexing by proponents

OPINION

'From the Hill, Refreshingly, A Lesson in Judicial Process

By Anthony Lewis

ings on the Bork nomination, foreign visitors remarked to me that they found the process deeply impressive. Watching the Senate Judiciary Committee at work, one said, he understood that the American system was "regenerative in its openness.

For Americans, too, the hearings on this Supreme Court nomination have been remarkable. They have instructed citizens on the court and the Constitution. They have confounded the cynical view that everyone in Washington has base political motives. Yes, there were members of the com-

mittee who seemed interested only

Though judges strive to be dispassionate, they aren't adding machines.

in scoring points for or against Judge Bork. But a good many senators were intent on exploring real issues with him and the other witnesses, trying to understand the way judges interpret fundamental U.S. law.

One myth should have been permaneutly disposed of in these last weeks. That is the notion that there is some simple, mechanical way for judges to read the Constitution, a formula that allows them to avoid any exercise of judgment in applying that 200-year-old ument to conten DOTATY FACTS.

The reality is that all judges, including Robert Bork, necessarily weigh history and consequences and competing interests when they interpret the great clauses of the Constitution. The point came out interestingly in an exchange between Judge Bork and Senator Arlen Specter,

Republican of Pennsylvania.

Mr. Specter quoted an opinion of Judge Bork's taking an expansive view of presidential power and saying that the Constitution's "vague" definition of executions of the property utive powers left room for their "organic development." Why was not the same thing true of the Bill of Rights? Mr. Specter asked. Why not organic development for liberty? Why only organic devel-

Judge Bork did not give a direct answer. But it was clear enough that the theory with which he is associated, that judges should look to the "original intent" of those who framed the Constitution, does not begin to solve the concrete cases brought to courts. Judges cannot escape judgment.

A fascinating contribution came from offstage during the hearings. Judge Richard Posner of the 7th U.S. Circuit Court of Appeals, who is often coupled with Judge Bork as an outstanding judicial conservative, wrote a piece for The New Republic savaging

B OSTON — Twice, during the hearthe theory of "strict constructionism." The idea is that "legislators make the law," Judge Posner wrote, while judges merely "find and apply it" without wer ing the consequences. Then he said:
"There never has been a time when the courts of the United States, state or federal, behaved consistently in accordance with this idea. Nor could they."

Courts, Judge Posner wrote, "have to weigh policy considerations" even in deciding private rights. Should an heir who murders his benefactor have a right to inherit? If a locomotive spark sets a field on fire, should the railroad or the farmer bear the cost? "Such questions," he said, "cannot be considered sensitively without considering the social consequences." And that is even truer in reading the Constitution. Judge Posner was maintaining what the school of legal realists said two gen-erations ago: that judges, though they strive for dispassion, inescapably bring

to decisions their built-in assumptions. They are not adding machines. That is why senators were so intent on exploring how Judge Bork would approach the job of a Supreme Court justice. That is why they pres him so hard on his criticism of the court's past decisions, and on his changes of position during the hearings — 20 such changes, by one count. They, and all Americans, know that it

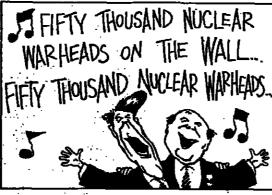

matters who sits on that court. One compelling illustration in the hearings was the question of privacy. Judge Bork said that judges should enforce only those values put in the Constitution by the framers, and privacy was not mentioned. But he coneded that specific provisions of the Bill of Rights protected aspects of privacy: the guarantee against unreasonable searches, for example. So a judge who does not see that value there. or who gives it grudging recognition,

is making his own choice.

The hearings had their troubling side. To see senators trying to extract what amounted to commitments from a Supreme Court nominee made me uncomfortable; I prefer the old tra-dition of nominees refusing to discuss particulars. But in this case the ideological purpose of the nomination was so clear, and Judge Bork's past positions so provocative, that there was no choice. And in the process all Americans were educated. GENERAL NEWS

A Wicked, Beautiful Place — Let's Hope They Don't Fix It

By Edwin M. Yoder Jr.

F LORENCE — For me, the ambithe baffling alchemy in which beauty guity of this beautiful and wicked old city was unforgettably expressed by Orson Welles, playing the drug-smuggler Harry Lime in Graham Greene's "The Third Man."

When an old friend confronts Lime with his anti-social behavior, Lime offers a ready excuse: Florence. Five centuries

MEANWHILE

of treachery, war and fratricide, he says, gave the world the glories of Dante, Mielangelo and Leonardo, while 500 years of peace and brotherly love in Switzerland produced only the cuckoo clock.

Lime's excuse is, to be sure, cynical and mischievous, worthy of the worst of the Borgias. But whatever your excuse for being in Florence (mine was to witness a conference on "development" between Italian local officials and their U.S. counterparts), you cannot escape

PETER HOPPMANN.

But one soon learns that by U.S. standards Italian local government, once nearly all, is now very nearly nothing so far as real power is concerned. Cities, regions and provinces have little or no taxing authority and essentially administer the budgets sent to them from Rome. There came a symbolic moment in the

has been catalyzed by vice.

The Italians, having forgiven U.S. in-

sults in the interception of the Achille Lauro hijackers, are once again in their

usual lavishly pro-American mood. Any

Tuscan city that lacks an American twin

city is seeking one. Genoa has struck up

a heavy romance with Baltimore, anoth-

er port city. Genoa is eager to become a

tourist stop and is even thinking of building a waterfront aquarium.

conference: The mayor of a nearby town arose to ask how U.S. cities get their hands on land for public purposes. Merle Kearns, a county commissioner from Springfield, Ohio, explained the process of condemnation. The looks of awe and envy on Italian faces would not have been exaggerated if she had been talking about how to send men to the moon.

Cultural Revolution, a period that Yet the matter cannot be left there. made Stalin's purges of the 1930s seem Americans may have developed better tame by comparison. Fifteen years lattools for local government. But why er, the West and the Chinese are reapthen are so many U.S. cities dead, ing the benefits of that deal. All we joyless places - places from which have to lose by dealing with the Rusmobile flee at sunset? sians are the chains of a senile ideology.

Florence may be a wicked old place, a bit down at the heels. And government may be largely a ceremonial ballet by figureheads. Yet I have never seen a city whose residents seem to be so happy with who they are and where they are.

Long after nightfall, even on a weekday night, the labyrinthine streets echo with darting, snorting motor bikes. Peo-ple by the hundreds course up and down,

walking and talking, always talking. Italian local officials may profess to envy the powers of a comm issioner of Dade County, Florida. But in Florence, the real danger is that somebody will get the itch to fix what is not broken. Brunelleschi's cathedral dome, one of the architectural wonders of the world for more than five centuries, still soors serenely, And one is told that the sewer system is mostly Roman, and still working. No

wonder a sense of urgency is missing.

With all the kamikaze driving down streets never meant for cars, with all the fine miasma of dust and gas furnes, the city of the Medici seems to be living a robust life, far from the critical list of ailing or dying cities. When the last internal combustion engine is lost in the rubble of the last instant-food joint, Florentines may still be living contentedly on the trust of their treasure

It is enough to make you wonder if we, not they, are the real beginners at the mysterions business of making cities live and work.

Washington Post Writers Group.

LETTERS TO THE EDITOR

If the U.S. Cannot Give More, It Should Give More Widely

response to "West Rejects Third World Aid Drive" (Sept. 12):

As a long-time America watcher and former adviser to Third World governments, may I express my sympathy for the U.S. position that sees little link be-

tween disarmament and foreign aid. America has spent close to \$1 trillion on defense in the past four years. But it may need most of the savings that result in the short term from disarmament agreements to take care of the welfare of its own disadvantaged minorities. For example, billions of dollars will be needed annually to aid the millions of Americans reported to go partly hungry; to care for AIDS victims, screen risk groups and combat the disease; and to remove deficiencies in the schools, espe-

cially in poor districts.

For all that, the Third World is poised to press ahead for increased levels of U.S. aid. Unfortunately, while America continues to be the world's leading provider of financial assistance, it also finds itself in the last place among the seven leading industrial nations when classified according to the proportion of gross domestic product it sets aside for foreign aid. This percentage is 0.23 for the United States, whereas France leads with 0.49. Even so, ignificant increases in U.S. aid are not likely in the near future, because America is under pressure to balance its budget. But to fend off Third World criticism, it can make its assistance more diversified and development oriented.

As it is, almost 70 percent of America's total aid for 1987 goes to help build up the military and security capabilities of the recipient nations. Israel gets the lion's share of it followed by Egypt. Other favored nations are the Ph pines, Pakistan, Greece and Turkey. At the same time, the poorest nations nearing collapse are facing deep cuts.

MULLATH VASUDEVAN. Cannes, France.

His Name Is on the Cover Regarding the report "A New Book by Gorbachev' Lacks That Personal Touch" (Sept. 24) by Edwin McDowell:

The article stated that the Kremlin had not decided if it would allow Mikhail Gorbachev's name to appear on the title page. We have a contract with the Soviet authors' agency, VAAP, in which Mr. Gorbachev is named as an author, and the German edition of the book has been published by now, with Mr. Gorbachev's name on the cover and the title page.

The report imputes that the book is neither authentic nor exclusive. However, as Leonid Petrov, spokesman at the Soviet Embassy in Austria, said, the book was approved by the Kremlin in the form in which it has been published It presents the points of view and goals that Mr. Gorbachev has articulated from the time he became general secretary of the Soviet Communist Party in 1985 until the summer of 1987. We have never asserted anything else, and we certainly have never claimed that the Austrian journalist Herbert Steiner conincted interviews with Mr. Gorbachev.

The project did not come by way of the Austrian government, which has nothing to do with the book, With respect to the United States, the Austrian publishing house Verlag Orac simply asked the Austrian trade commissioner in the United States to name an agent who might be interested in offering American rights.

As to the claims that Scott Meredith the literary agent for the book in the United States, is quoted as making, to our knowledge there has never been agree-

ment as to a series of interviews with Mr. Gorbachev. The book is based on material from Mr. Gorbachev's speeches, interviews and statements. The author is therefore Mr. Gorbachev, and the Kremlin gave its consent to that.

HELMUT HANUSCH, Verlag Orac. Vienna.

Against Cold War Logic

Some of your writers argue that we cannot deal with the Russians because of their treachery in the past (Yalta, Eastern Europe, Berlin) and their evil actions in the present (Afghanistan, emigration policy) and that even to consider ending the Cold War is to abandon all those who ever have suffered or are suffering under Soviet rule.

If the Soviet cold warriors used this same logic to continue the senseless (and dangerous) chest puffing by pointing to the United States's past treachery (Iran, Guatemala in 1953, Lebanon in 1958, Vietnam, Chile in 1973) and our evil present (Nicaragua, South Africa, Angola, Iran again) then we would forever be doomed to a world dominated by fear and mistrust. The consummate cold warrior, Hen-

ry Kissinger (motives notwithstanding) cut a deal with a China that was wracked by the grossest excesses of the

tiana's dream has been foretold over and over again, but it is still there. JEAN-MANUEL TRAIMOND.

Steyn Said It First

Troubled, But Still There

Regarding "Commune's Violence, Drugs Test Danes' Tolerance" (Sept. 15):

Having lived in Copenhagen's "Free State of Christiana" for four years, I was

shocked to read that the drug pushers have become overtly racist. Nevertheless,

wish to make two comments. First,

Christiana has indeed been used as a

"social garbage can," so much so that in

1979 we were compelled to throw out the

hard-drug pushers and junkies whom

Danish officialdom kept on sending to

Christiana. Second, the death of Chris-

Senator Joseph Biden is a plagiarist. So was Churchill. His often used exhortation "All will come right" was taken from Marthinus Steyn, the president of Orange Free State during the Boer War, as Martin Gilbert notes in his book "Winston Churchill: Finest Hour, Nineteen Thirty-Nine to Nineteen Forty-One."

JAMES G. DEFARES. Bloemendaal, Netherlands,

DEBATE: Glasnost Is Put to Test

Canvas Off, Guns Firing, PERES: Rejects Soviet Ties **Gunboats Strike in Gulf**

DUBAI, United Arab Emirates - Iran, responding to Iraci air raids on ships carrying its oil abroad, launched a long-awaited blitz on Gulf shipping with gun-boat attacks reported against three tankers within 16 hours.

Gunboats believed to be Iranian attacked the tankers late Wednesday and early Thursday as Iraq claimed yet another air strike on an Iranian vessel. The captain of one of the tankers

hit near the Iranian oil terminal of Hormuz, at the mouth of the Gulf. said the attackers, in two unmarked boats, sneaked past French and Soviet warships before opening fire.

They had the gun covered in canvas, and when they arrived near

the ship, they took away the canvas and fired away." the captain of the Pakistani-flagged tanker Johar said over the ship's radio. He said the boats carried no flags

or markings and after the attack headed toward the Iranian island One looked like a 60-foot (18meter) patrol boat, he said, and the

other was smaller and lower in the He said the two boats appresched the 80,000-ton tanker shortly after a French warship was

seen astern excorting a ship and a Soviet warship passed escorting an-

five rockets hit the tanker's crew-accommodation area and "there was a lot of strating by a machine gun," he added.

lrag has claimed attacks on 12 tankers working for Iran since Sept. 21, when the U.S. Navy atracked and later sank an Iranian ship, the Iran Ajr, which the Americans said was dropping mines into

independent shipping sources have so far confirmed eight of the Itati attacks.

There had been no sign of Iranian retaliation for the intensified iran strikes until a Greek tanker was his by gunboats off Dubai on Wednesday.

The attack on the Johar followed inthilar strikes overnight on two tankers, according to Japanese

No casualties were reported in the raids, in which the ships were reportedly hit by rocket-propelled crats. greates and machine gun fire. One of the targets, the 236,425been his in the Strait of Hormuz en

to load one million barrels of crude

earlier taken on a partial cargo of oil at an Abu Dhabi terminal.

The second victim, the Japaneseflagged Nichiharu Maru, was strated with machine-gun fire from five speedboats on Wednesday, the ship's owners in Tokyo said.

Officials at Nissho Shipping said that damage was minor and that the 237,586-ton tanker had left the Gulf with Abu Dhabi and Sandi Arabian crude destined for Japan. Meanwhile, Iraqi aircraft at-tacked a small Australian fishing

boat in Iranian waters on Thursday and killed the captain, regional shipping sources said. They said the 85-foot Shenton Bluff took a missile in the wheelhouse as it fished for shrimp under

contract to the Iranian government in the southern Gulf. The vessel operated as a joint venture between Bluff Fisheries of Australia and a United Arab Emir-

ates company, al-Aqilli. In Baghdad, Iraq said earlier that its air force had hit an Iranian ship in the northern Gulf on Thursday, scoring an accurate and effective

Gulf shipping sources were not immediately able to confirm that a ship had been hit.

Crew members on the tanker Johar show damage sustained Thursday in the Gulf from a rocket-propelled grenade.

BORK: Southerners Tilting Nomination Toward Defeat

But more interest has been generated by the avant garde Number 9 West Heath Road; although built some 25 years ago, it continues to remain one of the most controversial and important houses in Hampstead. Designed by James Gowan in the 1960's, it boasts paved patio surround. For the a superb 33 ft drawing room, large separate dining room, music room, luxury kitchen, breakfast room plus utility room and separate staff suite. On the first floor, a gallery

landscaped gardens and gated parking; some have indoor swimming pools. The average accommodation offers five/six bedrooms, five bathrooms, three grand reception rooms plus staff quarters. Leases are the longest available on the Crown Estate 199 years unexpired) and the demand is very widely international; the most recent sale at £1.3 million was to Australian mogul Robert Holmes a Court.

In Frognal Way, Hampstead, Lassmans offers a widefronted low-built detached gentleman's residence at £1.25 million freehold. The property has the aura of a country house - the superbly proportioned classical drawing room boasting three sets of full height Georgian windows. There are six bedrooms, three bathrooms, playroom and three reception rooms, as well as a three-car garage and secter bedroom suite offers a study area as well as dressing room and his'n'her bathrooms. There are three further bedrooms, family bathroom, shower room and sauna.

The garage can accommodate four cars. The gardens are well established and mature. The piece de resistence must surely be the stunning domed circular swimming pool - one of the most unusual pools in the world! Lassmans invites offers about £1.75 million. A swimming pool complex

with sauna is also a feature of 4 Herbert Crescent, an imposing double-fronted Victorian house in Knightsbridge. Sympathetically interior-designed by David Hicks, it presents a master bedroom/bathroom/ dressing room suite, five further bedrooms with three bathrooms, three fine reception rooms and the usual offices, staff quarters, two passenger lift serving the six floors. Offers in the region of £2.4 million are invited by

The same agent asks £2.65 million for Osborne House, an eight-bedroomed listed Georgian freehold in South Bolton Gardens with private courtyard with parking for four cars and a one-third acre garden rare in Chelsea. The garden of Manor Lodge in Hampstead's Vale of Health is smaller but, perhaps, prettier and creates a rus-in-urbe ambience for the five-bedroom house that was built in 1780 as a hunting lodge. It's hard to believe that

garages and a four-person in its bucolic setting you are only ten minutes from Central London, but the price tag of £1.75 million is a good reminder.

Among the half-dozen seven-figure properties in the Aylesford portfolio are two two-bedroom flats in Chesterfield House, Mayfair, which will combine to make a superb family home with staff quarters (£1 million); a sixbedroom freehold with heated swimming pool and walled garden in Tregunter Road, Chelsea (£1.25 million); a truly speciacular, ambassadorial seven-bed, seven-bath period property in Hill Street,

Mayfair, with two tenanted mews cottages (£1.75 million); an imposing home in Wilton Crescent, Belgravia, completely refurbished and presented with magnificent entertaining rooms, seven bedrooms, staff quarters, nursery kitchen, passenger lift and large roof terrace (£2.25

million). The same price can buy newly-built six-bedroom detached freehold in The Boltons, with an exterior totally consonant with its period Chelsea neighbours but interior firted with every possible contemporary convenience, including com-

puter-controlled heating/airconditioning. The kitchen won the Milan International Design Festival Award. Plaza Estates has just sold

one large detached unmodernised freehold in Holland Park Villas for £1.4 million and has. another under offer at the same price. Next month, Savills is launching six exceptional apartments at up to £1.25 million from a conversion of a large house in Metbury Road nearby. The scheme includes two ground and garden floor triplex apartments with huge reception rooms, conservatories and private gardens.

Fit to Live In

rever mind the traditional champagne when you move into a new London flat. Nowadays a bottle of liniment is more appropriate. The executive homes market is health and fitness crazy and developers in the capital are catering for it with an Olympiad of body-building sports facilities.

The surprisingly fast sales such major London developments as PointWest. Chelsea Harbour, Anchor Brewhouse and The Falcons are largely due to the provision of communal facilities that amount to a private health club. It makes a lot of sense when the expense of installing and maintaining the sporting hardware and accommodation is shared by all residents.

And when it is not economically possible to allocate space for sport, other provisions are commonly made For instance, Albert House, a development of six luxurious individual apartments behind the stucco facade of an important period building by Hyde Park, has arranged membership of the Imperial College sports centre nearby. So buyers of the £197,500-£480,000 units (through Reauchamn Estates) in Ex bition Road, Kensington, may use the extensive student

facilities and swimming pool. Leisure facilities in residential blocks are not pioneering. Back in the 1930s, Dolphin Square on the Victoria Embankment and the White House near Regents Park, now an hotel, provided squash courts and a swimming pool and restaurant. What's new today is the clear trend for such services to be the norm gather than the exception, and they are provided at popular levels rather than just at the more rarefied strata of Mavfair, Belgravia and

The Regalian development group proved the appeal of health club facilities when it refurbished a derelict council estate in Battersea and relaunched it as The Falcons with a swimming pool and gym sauna and whirlpool spa. City executives then queued to set up home in the block which had previously been rejected by council tenants. Now Regalian automatically installs sporting facilities in all its new projects.

PointWest, erstwhile the West London air terminal building in Cromwell Road, is being converted to provide 410 luxurious apartments in what must be the capital's biggest ever office-to-residential refurbishment. At prices ranging from £110,000 for a studio to £425,000 for a three-bedder, there were queues of attracted them were such communal goodies as health club with heated swimming pool, jacuzzi, saunas, showers, gym and club room.

The massive Chelsea Harbour complex, with 20 acres of land and 400 apartments and houses, offers a similar mix of sporting facilities with an extra dimension – a vacht club with 75 berths.

Going to the extreme, Bovis Homes has now started work on the £100 million Sands Wharf development on a tenacre industrial site in Fulham where the sports facilities will be of international signifi-

FIAC Broadens the Range

The International Fair of Contemposary Art (FIAC) opens Oct. 10 in the Grand Palais with the participation of 13d galleries from 18 countries, including for the first time the work of young Soviet artists. There will be 800 artists showing 5,000 works, and 101 one-man shows, inchading Cesar, Leonardo Cremonini, Alan Davie, Jörg Madlener, Minmo Rotella, Martin Bradley, Jim Amaral and Robert Combes. To Oct. 18. Michael Gibson

Mozart at the Champs-Elysées

■ The cycle of Mozart operas resumes in the renovated Theatre des Champs-Elysées Oct. 14 with "The Magic Frite," Daniel Barenboim conducting and Jean-Pierre Ponnelle as director-designer. The cast is headed by Joan Rodgers as Pamina, Eva Lind as Queen of the Night, David Rendall as Tamino and Christian Boesch as Papa-geno, Later performances are Oct. 17, 19, 21 and 23.

NANCY

Maguy Marin Meets Verdi

Eddaguy Marin, the modern-dance choreographer, will turn to opera for the first time as stage director of a new production of Verdi's "Otello" at the Nancy Opera, designed by Christophe Vallaux (sets) and Montserat Casanova (costumes). The premiere is Oct. 10, with subsequent performances on Oct. 13, 16, 18 and 20.
Performances are also scheduled Oct. 27, 29 and 31 at the Maison des Arts in the Paris suburb of Créteil, where

NEW YORK

Ralph Gibson Retrospective

Tropism," is a 30-year retrospective of the work of Riph Gibson at the International Center of Photography through Oct. 25. Organized by Miles Barth, ICP's curaof archives and exhibitions, it has already been seen in Rome and Frankfurt, and after its appearance at ICP is returning to Paris, Switzerland and London. Although Gibson was born and raised in California, he is better known in Europe and, indeed, has been the odd man out of contemporary American art photography throughout his career. Gibson might perhaps be considered as one of Cartier-Bresson's American followers. It is his first ret-respective, and after its forthcoming European tour it will return to America for showings in Minneapolis, Philalelphin and Sarasota, Florida, Both at ICP and in the accompanying book of the same title (Aperture, 1987), the makes are in roughly chronological order. The overall imression is of a unity of vision that extends back to his earliest days as a photographer. Gene Thornton (NYT)

Manners and Morals at the Tate

M'A major exhibition devoted to the emergence of a
British school of painting during the first half of the 18th
century opens at the Tate Gallery Oct. 15. "Manners
and Morals — Hogarth and British Painting 1700-1760"
will show more than 30 works by Hogarth, including
the "Rake's Progress" sequence and the "Conquest of Mexico" (detail above). Early works by Gainsborough and
Remodels anticipate the later "Golden Age" of British Reynolds anticipate the later "Golden Age" of British painting. The unique Foundling Hospital collection, actures donated by artists at the time, has been reassem bled as a centerpiece. A landscape section is included.

The Genius in the Life of Oscar Wilde

by Polly Devlin

ONDON — In 1893, when he was 38 and king of the louche and literary life of London and Paris, Oscar Wilde, man of letters and professor of aesthetics, sparkling conversa-tionalist, ready wit, brilliant playwright and, not least, society's darling, went to dinner at Blanche Roosevelt's house in Paris.

Before dinner the guests put their hands through a curtain so that the palmist Chiero could read their palms without knowing who they were. Chiero was bewildered by the extraordinary discrepancy between one pair of hands presented to him - the left denoting bereditary tendencies and the right denoting individual development. The left hand, he said, promised a brilliant success, and was the hand of a king, but the right showed impending ruin, a king who would send himself into exile. (That "send himself" is significant, meaning that Wilde manipulated himself toward destruction, as though in some kind of atonement, planning his fall from grace as inevitable. The truth is both more complex and more simple than that.)

Wilde was a superstitions man and asked, "At what date?" "At about your 40th year." Wilde left the party immediately. Two years later he was lying famished on a dysentery-stained plank in Penton-

Wilde's life was full of such pro-lepses, but then Wilde's life was full of so much: "Nothing is good in moderation." he once said. "You cannot know the good in anything till you have torn the heart out of it by excess." And by God he lived up to it. Indeed he plotted too freely with his life, not avoiding injury to

The late Richard Ellmann, in his scrupulous biography to be published Monday by Hamish Hamilton in London, has done no injury

He was a prodigious man of pro-digious appetites, 6 foot 3 in his silk-stockinged feet, a man who gave the '90s their special character and indeed redeemed them from their late Victorian pietism. "The various labels that have been applied to the age, Aestheticism, Dec-adence, the Beardsley period," Ellmann writes, "ought not to conceal the fact that our first association with it is Wilde, refulgent, majestic, ready to fall."

With this marvelous sentence years in the making - and, literary artist that he was, closes it 600 pages later with an equally moving and indeed refulgent epitaph:
"Now beyond the reach of scandal, his best writings validated by time, he comes before us still, a towering figure, langhing and weeping, with parables and paradones, so gener-ous, so amusing and so right."

From the onset of self-con-

sciousness Wilde set about accumulating assembling and arrang-ing the elements that would make the person we think of as Oscar Wilde. He did it with a brio and consummate style that still amazes and that amazement, that shocked and often salacious delight, subverts our awareness of his nius. "Art is the only serious

Wilde in New York in 1882 and, right, Lord Alfred Douglas. Inset, caricature of Wilde by Alfred Bryan.

thing in the world," he once said, "and the artist is the only person who is never serious.' What was perfectly serious was

his quest for greatness and fame. When he was only 20 he declared: "I'll be a poet, a writer, a dramatist. Somebow or other I'll be famous, and if not famous notorious." He became famous at Oxford and gave a catch phrase for his peers, his detractors and indeed the nation to think about when he sighed, "I find it harder and harder every day to live up to my blue china." Such remarks as "I want to make of my life itself a work of art. I know the price of a fine verse but also of a rose, of a vintage wine, of a colorful tie, of a delicate dish" suggest someone who has chosen perfection of the life rather than the work, an impression reinforced by something he said to André Gide years later: "I have put only talent into my work. I have put all my genius into my life." There was truth to this. Yet, "The Importance of Bein its perfection, in its refusal to allow messy emotions to fluster

The descriptions of Wilde are startling. One observer spoke of his sharklike mouth, another of his flabby face. Stuart Merrill described him as gigantic, smooth-shaven and rosy "like a great priest of the moon in the time of Heliogabalus." Lady Colin Campbell described him as a great white cater-pillar. One Marcel Schwob, a French literary lion of the time, saw "a big man, with a large pasty face, red cheeks, an ironic eye, bad and protrusive teeth, a vicious childlike mouth with lips soft with milk ready to suck some more."

He could behave abominably and often did. At a huncheon party given for him in Paris by his broth- drawing room when he asked for are given an inkling of the true er-in-law he arrived an hour late, the bathroom and he has not come physiognomy of a man. asked for the shutters to be closed, candles to be lighted and the mauve flowers changed. He disregarded the names of those to whom he was introduced, put on airs, questioned people and did not listen to their answers. Yet by the end of the meal he had enchanted everyone there, and Jean-Joseph Renaud wrote that several of the guests wept to drawing room and at the end of it think that words should achieve were your parents. My courage

ARCEL Proust once asked him to dinner. Arriving out of breath two minutes late. Proust could see no sign of Wilde, "Is the English gentleman here?" he asked the servant. "Yes sir, he arrived five minutes around him. . . You must never of self-ago; he had hardly entered the destroy legends." Through them we edness.

out of it." Proust ran to the end of the passage. "Monsieur Wilde, are you ill?" he asked. "Ah, there you are, Monsieur Proust." Wilde appeared majestically. "No, I am not in the least ill. I thought I was to have the pleasure of dining with you alone, but they showed me into the drawing room. I looked at the were your parents. My courage failed me. . . Goodbye, dear Monsieur Proust, goodbye." Afterwards

"How ugly your house is." Wilde once observed: "What is true in a man's life is not what he does but the legend which grows up

his parents told Proust that Wilde

had looked about and commented,

But the abounding legends which he encouraged - have served his reputation ill. The leg-ends do not relate his courage or his enormous kindness, but dwell on how he flaunted his flamboyant homosexuality in a repressed and festering society. Yet many of his friends and family, and acquaintances like George Bernard Shaw --who didn't miss much - were not aware of Wilde's proclivities. In fact his life seems to have been divided between a clandestine dark sexual side where, with Lord Alfred Douglas, the object of his consuming passion and the instrument of his ruination, he consorted with boy prostitutes; and a public image of self-possession and disinterest-

In flexing and muscling his way over the obstacle course of Victorian convention Wilde seems either to have left a part of himself behind or to have allowed to atrophy that secret part needed for fruitfulness and greatness. The raw realities words Wilde would have hated are that for all his kindness he had an underdeveloped heart; he refused compassion. The tragedy is that, when the latent compassion was awakened by his harrowing experiences in prison and gigantic reality had come to bear, it was too late; he could not incorporate it. "De Profundis" and "The Ballad of Reading Gaol" are his monuments to the effort. His other great gifts

A Triumphant Berlioz in Lyon

by David Stevens

YON - The case of Hector Berlioz is a strange one, full of contradictions and anomalies on a grandiose scale. The first great French composer since Rameau a century earlier, he was lipsed in his own country by Meyerbeer and any number of other foreigners, and the love-hate relationship between Berlioz and the French continues to this day. A giant figure of the "romantic" century, he pro-lessed not to understand the word; he pre-sented himself as a classicist, his models were Virgil and Shakespeare, Gluck and Beetho-ten. A megalomaniac and narcissist on a stale rivaling Wagner, he had no Ludwig II to subsidize him, only Napoleon III, who uldn't have cared less

It has been suggested that the French taste for moderation and antipathy for excess still work against Berlioz, although he has long traised to be really controversial. The perfornance history of "Les Troyens" — an opera great in dimension and content - is instrucive It is a vast work, four and a half hours of ex, demanding on the resources of even Basior opera houses and on audiences as well. And, unlike Wagner's music dramas, it s easy to cut: to begin with it comes in two parts that can be given separately, and it is used up of "numbers" that can be removed, ext space parts. All Berlioz ever saw was the second part, "The Trojans at Carthage," cut o shreds at the Thestre Lyrique.

For a long time it was only the Germans who tried to present the two works together -Karlsruhe in 1890, Cologne in 1898, Stuttpart in 1913. It was probably not until 1957 inst one could speak of a virtually complete, Wegral production of the work Berlioz write: Championed by Rafael Kubelik, it was given (in English) at Covent Garden. The centenary of Berlioz's death, 1969. it the German firm of Barenreiter publish-Agits new Berlioz edition, the Dutch firm of slips comprehensively recording the music लाफे Colin Davis and mostly English orchesfall and musicians, and Covent Garden re-Wing the entire "Troyens," under Davis

have felt right at home at the Paris Opera's centennial contribution — a disgracefully butchered "Troyens." Not until the Marseille Opera mounted the two parts, in 1978 and 1980, could a French audience claim to have heard all the music.

Enter the Berlioz Festival, created in 1979 in Lyon and La Côte-Saint-André, the composer's birthplace 65 kilometers (40 miles) toward the Alps, with Serge Baudo, music director of the Orchestre National de Lyon, as artistic director. At first annual, it now alternates years with Lyon's Biennale de la Danse. Each festival program has looked at Berlioz through a different lens, as it were: a Shakespeare year, for instance, or in juxtaposition with other composers inspired by the same subjects or ideas. In 1980, "La Prise de Troie" and "Les Troyens à Carthage" were given on successive evenings, and this year - after two years of planning and rehearsal - "Les Troyens," staged complete and "en une seule soirée" (as the program

puts it), for the first time in France. Four performances at the Auditorium Maurice Ravel drew Berliozians from far and near for the six and a half hour spectacle -including two one-hour intermissions during which the pilgrims could take food and drink in a tent outside the anditorium. All very Bayreuthian, except that here and there one could spot little pockets of empty seats.

But Berlioz's gigantism is only skin deep. Even when he employs vast forces, he often uses them sparingly. No composer is shrewder in judging the expressive impact of a single instrument. His singers rarely if ever have to overcome a big orchestra in full voice. The conception is vast, the execution

HE staging here by the young French team of Patrice Caurier and Moshe Leiser fits into this context. Perhaps making a virtue of the auditorium's lack of theatrical machinery — no flies, no wings — they avoided historical pageant or even any attempt to make characters look like "Trojans" or "Carthaginians." No Trojan horse, no palaces or temples, harbors or boats. Christian Ratz's scenery consisted of sand -covering the stage, stone - in the form of a wall that changed its contours from act to act, and to one side the crumbling vestiges of a 19th-century theater - a broken proscenium arch and the adjacent boxes.

What Caurier and Leiser are on about is the rise and fall of civilizations, without reference to any specific one. Caurier's costumes are deliberately anonymous, mostly street clothes of vaguely 20th-century configuration. The "Trojan" society is the older, more structured one; the clothes of the populace are shabby and dirty, but there is an identifiable military class with greatcoats and a ruling group with garb that might have been found in some elegant 19th-century trash can. In "Carthage" the people's clothes are identical but cleaner, almost white, while Dido wears a simple white gown, and the relationship between queen and subjects is closer, even affectionate.

WEEKEND

American Finds Roots in Rural France

by Charles E. Allen

E DOUHET, France - Speckled with sunflower fields, small vineyards, a 17th-century chateau, a Roman aqneduct and a Romanesque church, Le Douher is a small farming community accustomed to mild weather and few visitors - but the past several years have not been

typical.
When the harsh winter of 1984 hit the cognic-producing region of Charente-Maritime, the inn in Le Dounet sheltered the innkeeper, his poultry, his livestock and one unlikely lodger. Rae Alexander-Minter, a black American unthropologist. Alexander-Minter had come to Le Douhet as the uninvited guest of one of the village's 518 residents - her cousin once-removed. Jesse Ossawa Tanner.

To Jesse Tanner, who retained no visible link to his black American heritage. Alexander-Minter's trip was an intrusion. "He wanted very much apparently to get rid of the black part of his presence and to remain French, she said

The author of a popular children's book, "Young and Black in America." Alexander-Minter had begun research on a biography of her family during the 19th century, a family that, she said, was "symbolic of the movement of blacks into the middle class." She had come to Le Douhet to find out more about Jesse Tanner's father. Henry Ossawa Tanner, a 19th-century artist whose work will be seen in 1990 in a retrospective at the Philadelphia Museum of Art.

That 1984 visit turned out to be Alexander-Minter's only encounter with the 81year-old Jesse Tanner, who died later that spring. But she has come to know his son Jacques well - he is the mayor of Le Douhet - and today she maintains close ties with the French Tanaers.

A handsome, articulate woman in her late 40s, Alexander-Minter had written to Jesse Tanner early in 1984 and, when she received no answer, she telephoned him. "He was very abrupt" she said. "He said to me. "I don't want to get into any race problems." But I told him. This is not a race problem. this is a family concern. You're the closest person to Tanner the artist, and I need to know what you know, for my own informa-tion and for my manuscript. It was obvious that he didn't want to see me.

Months later Jesse Tanner finally agreed to see her. But only days afterward he sent a telegram saying that he'd had a bad fall and would not be able to see her after all. Alexander-Minter nonetheless flew to Paris and boarded a train for Le Douhet, "When I got to the little village. I went to the inn and I rang up and I said to whoever had answered that I was here and I wanted to see Jesse. Alexander-Minter said, "Then the phone went dead."

Undeterred, she walked down the road to her cousin's imposing estate. "This wizened old man came to the door, bent over and white as the driven snow. He had a day's growth of beard and he was disheveled and he had a cane. I said, with my brown face,

I'm your cousin from America.' And he said, 'You are a determined woman!'

The only child of the American artist and a singer of Swedish-Scots origin. Jesse Tanner was born in the United States but when he was 6 his family returned to France, where Henry Tanner had been living. Jesse Tanner never again visited the United States. and with the exception of studies at Cambridge University and the London School of Mining, he spent the rest of his life in

A successful chemical engineer. Jesse Tanner was a private and withdrawn man, who

in his home, brought back his Afro-Ameri-can heritage, which he was trying to forget," she said. "You know my son has teen-age children and I'm not sure how they're going to take to your being here." Jesse Tanner told her. "And my son is the mayor of this village."

Jesse Tanner agreed to see Alexander-Minter only during afternoons when other relatives were away. And she later discovered that he had described her to his family as an American journalist. "It was only by a sheer fluke," she said, "that the father was talking about me and he inadvertently said

At top. Jucques Tanner and his wife and, left, Henry Tanner in his Paris studio; right. Rae Alexander-Minter.

spoke very little of his past, even to closest family members. "My father was not the least bit talkative." said his son, Jacques. One thing that especially held him back was this sort of complex about his black and mixed family origins. I believe that is what brought about a sort of rupture with the past." He added: "I think that at the time there was a certain reticence on my father's side to even say or let it be known that he had a black family.

Jesse Tanner's reticence stood like a brick wall between Alexander-Minter and her French family. My presence in his village, the arrière petite nièce. And Jacques said, The grand-nièce of the artist! We thought she was a journalist."

In the end, Jesse Tanner's apprehensions were unfounded. "I told him that I thought it was very good, that I was not the least bit shocked. 'said Jacques Tanner. "That on the contrary I found her to be quite nice and that I thought it was tremendous that she could be so interested in the family, looking at all that she had done to find us. I felt that he experienced a sort of solace afterward. It was very nice. As though there was nothing more that he needed to say."

The owner-director of the health foods business that Jesse Tanner founded, Jacques Tanner says he has no problems with his mixed racial heritage: "France is a multi-racial society. It always has been and it always will be"

Born several years after his grandfather's death. Jacques Tanner never met either of his grandparents. Although he knew that he had black American roots, he knew very little about Henry Ossawa Tanner. "Around 16 or 18 I began to discover that my grandfather was a well-known painter in the U.S., but I knew nothing in great detail." he said, because my father — who still had a large number of paintings - never hung one in our home, nor showed them to me. They were in suitcases and attics."

In his 20s, Jacques Tanner began to see some of these paintings for the first time as his father packed them off to American collectors and museums. "I thought that since he was an American artist that his paintings should return to his native country, since there were people there in a position to show them to a large public," said Tanner. Today only one or two of the paintings remain in Le Douhet.

Despite what he saw of the paintings, Tanner said, "It has only been in the past three years that Rae has made me discover the quality of his work through photographs or catalogues edited in the U.S."

S mayor of Le Douhet and as the re-gional official of France's Rassemb-lement pour la Republique party (that of Prime Minister Jacques Chirac), Jacques Tanner has been the bridge between Alexander-Minter and the people of Le Douhet. "The first time I came I never met the townspeople; Jesse closed them off to me," Alexander-Minter said. "In essence I wasn't privileged to meet other people. My circle opened with Jacques. I am part of every family function."

As for the reaction of the townspeople to their mayor's American cousin, Jacques Tanner said: "When someone talks of American family members, people are not sur-prised to see someone with a different color

In 1989, Tanner and his wife plan to attend the opening the Philadelphia Muse-um exhibition. "We will do our best to go," he said, "because that will be our way of paying homage to Grandfather.

Despite his initial reluctance, Jesse Tanner, who as a child often served as a model for his father's paintings, gave Alexander-Minter unrestricted access to the artist's possessions, where foraging among drawings, diaries, documents and other paraphernalia, she was able to piece together a more complete picture of her great-uncle. Henry Ossawa Tanner became the best-

known son of a family that Alexander-Minter called among the "first vestige of the black elite" in America." Tanner was the son of Bishop Benjamin Tucker Tanner, a minister, teacher, author

and editor. Born a freeman in Pennsylvania

in 1835, Benjamin Tanner was a noted civil

rights leader, or a "race man" as they were

in the French Legion of Honor.

Though the 1920s Harlem Renaissance brought about an explosive turnabout for black American artists. Tanner was never tempted to return to the United States. He remained an active absentee member of the NAACP and kept close ties with black American leaders, such as Booker T. Washington and W.E.B. Du Bois. He was hailed by the press of his day as America's "fore-most Negro artist." Although he took issue

then known Henry Tanner's sister, Halle

Tanner, a graduate of the Women's Medical College of Philadelphia, was the first woman

and the first black to pass medical board

examinations in Alabama. And his brother

Carlton was an influential minister in the

A graduate of the Pennsylvania Academy of the Fine Arts and the first black admitted

to the American National Academy of De-

sign, Henry Ossawa Tanner left the United

States for France in 1891 because, as Alex-

ander-Minter put it, "he could not paint and fight for civil rights too." He settled in France, and was eventually made a chevalier

African Methodist Church.

with this categorization, the artist — who died in 1937 at the age of 78 — stood as a beacon for his younger contemporaries, including Erin Douglas and Hale Woodruth.

Best-known for his genre paintings, Tarbert is one of the most highly-priced American black artists today, with his paintings fetching as much as \$250,000. Although the influence of the Impressionist movement can be seen in his later work, his paintings are most remarkable for their religious-inspired use of light and shadow.

Funded by a grant from the Pennsylvania Academy of the Arts, Alexander-Minter is working with the curator Dewey Moseby to write the catalogue for the Tanner exhibition in 1990. This retrospective will include 125 works, and will tour New York and Washington before being shown in Paris. It will also include several of his photographs, including the models for his best known paint-ing, "The Banjo Player," now at Tuskegee University. Not present in the Philadelphia exhibition are three Tanner paintings owned by the Louvre Museum. All three have been transferred to the new Musée d'Orsay.

Henry Ossawa Tanner's "The Young Sabot Maker," 1895.

WIN \$ MILLIONS!

Strike it rich in Canada's Favorite Lottery. You pick your own numbers playing Lotto 6/49

That's right ... you can win millions by picking your own numbers playing Lotto 6/49—Canada's most popular Government Lottery. In fact, last year Lotto 6/49 paid out \$354,736,589.00 in ALL CASH PRIZES. And it's all free of Canadian taxes. There are two draws each week for a grand prize guaranteed to be not less than \$1,000,000.00 with many millions more in secondary prizes. Grand prizes often run into the millions and have been as high as \$13.890.588.80. Imagine what you could do with that much cash! This is your opportunity to find out because now you can play the lottery that's making so many millionaires in Canada.

WHAT IS LOTTO 6/49?

Letto 6.49 is the official Canadian version of Letto—the world's mest acquilar form of lottery. It's the lottery in which you pick your own numbers and it's called 16.49" because you selections 6 of 49 possible numbers from 1 to 49. Your numbers are ontered in the Lotto 6/49. computer system and it they match the six winning gambers chosen in the draw—you win the grand price. Or if you have only 3, 4 or 5. numbers correctly outwirtions of thousands of secondary of zes available.

HOW CAN I PLAY?

Complete the artached order form and send it to Canadian Oversead Marketing along with the necessar, calment. We will enter your numbers for the scientified length of your subscription, You may specific mit to 6 games. for 10-26 of 52 weeks. Each game gives you

another chance at the grand prize for every draw in which you are entered. You receive a Confirmation of Entry" by return mail acknowledging your order and indicating the numbers you have selected as well as the draws in which they are entered.

HOW DO I KNOW WHEN I WIN?

You will be notified immediately when you win a prize of \$1,000.00 or more. Also, a complete list of all winning numbers will be sent to you after every tenth draw so that you can check along the way to see how you are doing. At the expiration of your subscription you will be sent a final statement of your winnings. All prize money will be converted to any currency you wish and confidentially forwarded to you anywhere in the world. So mail your order today-the next big winner could be you.

Young Irish Playwrights Look At Their Land's Mortal Ironies

by Francis X. Clines

ONDONDERRY, Northern Ireland ---The Irish are acting up again, here, there and everywhere - scoring a smash at the Edinburgh Arts Festiyet doing some of the best-received small theater in London, and, most importantly of all. working here on the Field Day Theater Company's annual cross-border renewal of the dramatic urge that grips the people of this land. The Irish continue to make something lyrical from the language they were forced to learn, demonstrating the thesis of sir current master playwright, Brian Friel, their current master playwright, Brian Friel,
that "it is not the literal past, the 'facts' of
history, that shape us, but images of the past ory, that shape us, but images of the past

instory, that shape us, but images of the past imbodied in language."

The Field Day Company is currently ofing the fresh images and language of a

The Irish theater's preoccupation with the anguish and fratricide of the Troubles remains clear.

the Troubles," he says, noting the southern republic's trend to look to its own problems joblessness and not north toward the tholic nationalist minority's plight among the Protestant loyalist majority of Ulster. They have retreated from it. In the north, the Belfast audience is passionate, but Dubliners and the south tend to stay at arm's length. Yet the whole soul of the nation is eing decided up here."

Parker relishes the cross-border art of threading words through the parochial prejing were looking for sitcom wryness more than O'Casey's scorching truth about Irish-Bitter themes of wasted life and muffled

hope are at the heart of the best new Irish drama, most of it northern-rooted. A major new Irish play in London last year was "Observe the Sons of Ulster Marching Toward the Somme," Frank McGuinness's haunting use of World War I to evoke the eternal quality of the young life constantly expended in the Troubles in the name of patriotism. Young Irish theater professionals are energized by the mortal ironies of their land. One of the most consistently exciting groups, Charabanc, is a company of Ulster actresses who write and roam ambi-tiously, underlining the endlessly sad fact that Ireland often forces its most talented people into exile.

But Charabanc, too, fights to stay rooted in the land, using Belfast as home base and then traveling out. This troupe, the Field Day Company and such other top theater groups as the Druid Theater of Galway gathered this week for the Dublin theater festival The Field Day Company brought its production of "Pentecost" to the festival.

Like so much of Ireland, the theater is momically depressed but emotionally indefatigable, a place where the professionals are hungry and witty. The Field Day troupe demonstrated both attributes after a long day of rehearsals one recent night, relaxing in a Chinese restaurant as the armored cars of British troops cruised past on their wary patrols in the dark.

"What's great is you draw on the life xperience of actors so directly," said Parker, who was often rewriting through the rehearsals, fine-tuning to the cast's Irish nuances. His play uses an old Victorian house in Belfast as a setting for a vitriolic recollection of "one of the most hopeless moments" in recent Irish history, the time in 1974 when the attempt at power-sharing by Protestant and Catholic failed as mistrust and violence carried the day. He has laced "Pentecost" with sad and witty indictments of dominant institutions, political and religious, as the old

The Field Day people at the dinner table exemplified the power of theater to de-ghet-toize, no mean achievement amid the sectarian walls of Northern Ireland. The new play has an acclaimed young English director, Patrick Mason, an Australian actor working on his Irish accent, and a north-south mix of principals whose mutual Irishness was itself a breath of optimism amid the play's bittersweet labor and language.

"Language is more important in Irish life," said Parker, trying to explain why his countrymen are so creative with a language that was forced on them. "Language is more charged here. The Irish love to talk. It is at once the blessing and the curse of the coun-

Brian Friel's own drama, "Translations," about the power of language and images, was the inaugural play of Field Day in 1980. It is now recognized as the masterpiece of a writer who was born to the Londonderry nity, but leavened through a life of letters and a certain hope implied in the pastoral beauty just across the political border in County Donegal. This season, even as the prestigious South Bank Arts Center in London was opening Friel's latest play, "Fathers and Sons," an adaptation of the Ivan Turge-nev novel, there was a line revival of "Translations" by the Fox and Hounds Theater. That company of highly praised professionals works in a humble room above a pub in south London - only one of the many scattered places to find the Irish audience and theater. "We must never cease renewing these images," Friel cantioned in that play. "Because once we do, we fossilize."

© 1987 The New York Times

Stewart Parker with actresses Barbara Adair and Eileen Pollock in "Pentecost."

?writer who may epitomize the state of modern Irish theater: a northern Irishman, driven by Muse and the Troubles to circulate as a essful quasi-exile in London and the United States (where New York audiences have seen his "Spokesong" and "Catchpenny Twist"), but always returning home for is best inspiration and dearest audiences. This is my subject matter," says Parker,

sipping a glass of Guinness in this tough

handsome river city, the spiritual capital of Northern Ireland. "I would rather do a play here than anywhere else in the world." at it was here that Brian Friel founded the Field Day Company seven years ago with Stephen Rea. Rea is a tireless Irish actor who is in demand in London's main houses. where he ranges from Shakespeare to Cole Porter, but breaks away each fall for the

12 weeks, from Belfast to Tralee. "The rural Irish are so pleased you've come," says Parker, easily forgiving them their tardiness when "they kind of wander in" to see the show. "Dublin is in some ways the hardest audience; they resist plays about

Field Day tour, a classic itinerant troupe's

crisscrossing of the two parts of Ireland for

udices of north and south. "I keep trying to sneak up behind them, give them what they

want to hear, and then twist the tail," he said. This was why the Field Day Company was created — to move beyond established theater with new plays that tour the whole of Ireland with a hope of effecting some change in the pessimism and violence of the north and the growing aloofness in the south. With limited arts subsidies from both governments, it has become an economically threadbare, critically acclaimed, spiritually vital keystone of modern Irish theater. It is a larger cultural force as well that involves the Irish poets Seamus Deane, Tom Paulin and Seamus Heaney, and David Hammond, a

musician and broadcaster.

The Irish theater's preoccupation with the anguish and fratricide of the Troubles remains clear. One of the Edinburgh Festival's big attractions this summer was a revival of Sean O'Casey's acidly mournful look at the endless revolution, "Juno and the Paycock."
After decades, the Gate Theater of Dublin made the play fresh and biting, Still, the same fine performance before a Dublin audience one night suggested that some of the

The royal hunt scene from the Lyon production of "Les Troyens."

Berlioz in Lyon Continued from page 7

The staging relies almost entirely on body language, and the eloquent, almost choreo-graphed shaping of the choral masses. The Trojan people hop up and down in delirious excitement at their release from a decade of claustrophobic siege and the mindless fun of rolling the horse into town. One palm tree suffices to turn Troy into Carthage. The people greet Dido with innocent joy, playing like kids in the sand, and the parades of the builders, sailors and laborers reflected the pride of people who have built a city from nothing. Here and elsewhere, Carol Miles's choreography was a substantial element.

OT everything worked so well. The black-clad and masked "Greeks" moved in on the Trojan women like so many sinister cutthroats. The virtually unstageable royal hunt and storm interlude came off well enough, with steeds on wheels and lots of white smoke, and instead of satyrs carrying burning tree branches it was musicians carrying violins that burst in spontaneous combustion. But a following sequence, with a mimed figure representing Berlioz lurching around the stage while a blasé bourgeoisie looked on from a theater box, was gratuitous, as was the unfolding of the fourth act in a kind of 19th-century

But none of this was fatal, and on the whole this staging, daring in its simplicity

Disease From Africa

rumg Spam's Horses

bras imported from South-West

Africa for a safari park near Ma-drid, has killed more than 300

horses, mules and donkeys in cen-

tral Spain since the end of Au-

gust. Spain has banned the export

of horses for at least two years, and Britain. France, West Ger-many, Ireland, Italy, the Nether-

lands and Portugal have banned

imports of the animals from

The disease brings fever and, frequently, death. Experts esti-

mate the outbreak may cost up to 10 billion pesetas (\$82.7 million) in lost exports of horses. A vaccine was imported from South

Africa because in Europe the disease had been eradicated. Government authorities said they expected the plague to be over by the end of this month, but

horse breeders said the long-term

consequences could be disas-

trous: once vaccinated, thorough-

breds become potential carriers

of the virus and thus lose their

market value. Several bullfights

and horse races have been postponed or annulled, and Spanish equestrian teams may have to

drop out of international competitions, including the 1988 Olympic Games in Seoul.

Around Europe

An equine plague, believed to

and reticence, had the supreme virtue of trusting the music and letting the score perform its magic. With the brazen triumpha-lism of the first appearance of the Trojan march it is hardly necessary to actually see the fatal horse. With the tone painting of the royal hunt and storm, followed by the sublime sequence of quintet, septet and duo, an erotic tension filled the air even though Dido and Aeneas never visibly came within arm's length of one another. Less is more.

The large, excellent stylistically cohesive cast was headed by Kathryn Harries, vocally radiant, a regal yet vulnerable Dido; Gary Lakes, an Aeneas of strong lyric-dramatic tenor and formidable physique, and Jo Ann Pickens, whose Cassandra was like some kind of African prophetess whose doomladen utterances were so imposing it underlined the folly of Trojan heedlessness. John Aler as Iopas, Antoine Normand as Hylas, Mira Zakai as Anna and Franciskos Voutsinos as Narbal and Yvan Matiakh as the Greek soldier Sinon comprise a short list of notable performances in smaller roles.

Baudo is a serious and hard-working conductor rather than an exalting or inspirational one, but here he was the deeply committed architect of a real musical triumph, shared in by his Lyon orchestra and the combined London Pro Musica and Rhône-Alpes

Incidentally, this production included a totally unfamiliar scene - in which Sinon, a Greek soldier-spy, captured and questioned by Priam, cons the Trojans into thinking the horse is innocuous. It seems that in 1861, when discussing a possible production by the Paris Opera, Berlioz cut the scene and destroyed the orchestration, but not the piano score. Reconstituted, it made its first appearance last year in Leeds, England, in a production of "La Prise de Troie." The scene was dramatically useful, if not musically

The "Symphonic Fantastique" is no rarity, but it is rarely performed, as it was here, with its pendant, "Lelio" or "Le Retour à la vie," in which the autobiographical hero who is left in such bad shape at the end of the Fantastique" recovers his will to live. But while the symphony is argued in purely musical terms requiring no program, "Lélio" is a real 19th-century curiosity - a mélologue, a concoction with a spoken text interlarded with musical pieces. Some of the music is bizarre, like the rollicking chorus of brig-ands, but the fantasy on "The Tempest" is a gem. Daniel Mesguich was eloquent as the hero-narrator. John Aler, Lawrence Dale and Jean-Marie Frémeau handled the vocal duties with aplomb, and Alain Lombard conducted the Orchestre National de Lyon and its chorus with his customary vigor.

The Genius in Wilde

hever found a befitting emblem to "The important thing, the thing inspire him. draft legislation banning the battery rearing of bens "in the long term." Farmers said a return to free-range chicken raising would push up the price of eggs.

Amsterdam has decided on psy-chological tests for prospective taxi drivers. The city council, which licenses Amsterdam's 1,600 cabs, said there were too many complaints about reckless driving, rude behavior and cheating. The council said it hoped the tests, which include questions to determine mental stability, would help find more "cool taxi driv-

South African Mother Bears Daughter's Triplets

JOHANNESBURG - A 48year-old white South African woman gave birth to her own grandchildren Thursday after carrying her daughter's triplets in what medical experts said was an unprecedented

case of surrogate motherhood.

Anthony gave birth to the triplets to keep reporters away from South in a smooth Cesarean section delivery and that the grandmother and babies were all well.

details of the birth because Mrs. two boys and a girl.

burg's Park Lane Clinic said Pat paper which posted security guards ing town of Tzaneen, had set a

The hospital matron declined to disclose even the babies' sex, but a Hospital officials gave no further source at the clinic said they were

ase of surrogate motherhood.

Anthony has sold exclusive rights

Medical experts said Mrs. An-lorge, a
A spokeswoman at Johannesto Britain's Mail on Sunday newsthony, from the northern tea-growmother. Medical experts said Mrs. An- Jorge, and later implanted in her

ter, Karen, whose uterus was removed after the birth of a son three years ago. Her ova were fertilized in a laboratory with the sperm of her husband. Alcino FerreiraDow Jones Bond Averages - 0.12 - 0.42 + 0.18 以分 日,91 時 13

NYSE Jumps on Fresh Buying Compiled by Our Staff From Dupatches
NEW YORK — Prices on the New York Stock Exchange soared Thursday in active trad-ing as investors inaugurated the fourth quarter with a buying spree that started among blue-chip and technology issues and spread to the broader market. Analysis said buyers were encouraged by a rosier outlook on interest rates - supported by

a firm dollar and rising bond prices — and the view that the U.S. trade deficit will narrow.

The Dow Jones industrial average, which rose 5.71 points Wednesday, climbed 42.92 points to close at 2,639.20. Gainers led losers by 2 to 1, and volume rose to about 194.15 million shares from 183.07 million on Wednesday. Prices also advanced in active trading of overthe-counter and American Stock Exchange is-

stocks and now everybody is jumping on the bandwagon," said Hildegard Zagorski of Pru-"Fresh cash is coming into the market," said Peter Furniss, managing director of equity trad-ing at Smith Barney. Harris Upham & Co. He predicted the market in the fourth quarter will

be "fairly volatile while trending higher."

Analysts said the market is also being aided by expectations that when the August U.S. trade figures are released Oct. 14, they will show a narrower deficit than the \$16.5 billion July

Div. YIL PE

A smaller trade deficit would help stabilize the dollar and, by alleviating inflation fears, would help the bond market. This, in turn, could ease equity investors' worries about rising interest rates.

National Semiconductor led the actives, rising 1% to 20% on 3.5 million shares. The company received approval Wednesday to buy Fairchild Semiconductor. Smith Barney repeated a buy recommendation, calling National Semiconductor "very undervalued" in relation to others in the semiconductor group.

Michael Gumport, an analyst at Drexel Burnham Lambert, repeated buy recommenda-

tions on several semiconductor issues, saying he expects industry shipments to climb in 1988. Motorola rose 3% to 73%. Texas Instruments 3% to 77%. Advanced Micro Devices 2% to 24% and Intel 2% to 60%.

Union Carbide was second on the active list. jumping 2% to 30%. Leslie Ravitz of Salomon Brothers upgraded his rating to buy from hold, forecasting a sharp rise in profits next year due to improved pricing for ethylene and ethylene-

Other ethylene producers also rose. Vista Chemical gained 134 to 53%. Dow Chemical 2 to 107% and National Distillers 314 to 87.

Paper stocks rose amid expectations of surging profits for the third and fourth quarters, analysts said. Union Camp jumped 3 to 47% and Scott Paper 21% to 8512. (UPI, Reuters) Dh. Yki. PE 109s High Low Quet. Ch'ye

Herald Tribune 100th Anniversary Report

Section One:

What's Inside

This special edition is the first of two marking the 100th anniversary of the International Herald Tribune, Founded Oct. 4, 1887 in Paris by James Gordon Bennett Jr., as the European edition of his New York Herald, the newspaper has appeared under its current name since May 22, 1967 — 20 years ago. Along the years, there have been

memorable moments. Some centered on events, others on personalities, still others on both. In the pages of this report are some nota-ble front pages, stories about many of the people who have helped shape this newspaper into what it is today, and articles on the paper's history.

A second section will be pub-Eshed tomorrow

-Among the stories in today's report are these: . Eric Hawkins, for four decades

the managing editor, as remem-bered by a '30s staffer. Jock Whitney, the millionaire who struggled to save the parent New York Herald Tribune and who in the end made sure that the Paris edition would surviv The New York Herald

Tribune and its legacy.
The events of the IHT's year-long Centennial celebration, including the Flame of Liberty campaign. • The Trib's French printers, still coping with the vagaries of the English-

speaking editors.

• James Gordon Bennett, Jr., the paper's founder, who loved speed but never learned to drive an automo-

N July 21, 1969, in three simple but right-hand corner. The story covered the top

stunning words, the International Herald Tribune immortalized in print what had existed for centuries only in human dreams: "MAN ON MOON." In the newsroom, professional cool gave way to excitement over the event. Burt Anderson, news editor in those days, remem-bers that the successful Apollo 11 mission was a "different kind of story for us. It made me feel proud to be an American."

The magnitude of the moonlanding subsumed even expatriate chanvinism, however. The IHT presented it as a global, not simply American, triumph. Murray M. (Buddy) Weiss, IHT editor from 1966 to 1979, was in charge that night, writing major headlines and designing the front page. Weiss remem-bers feeling particularly strongly that he "didn't want to say U.S., didn't want to sound parochial."

Anderson recalled that Al Rossiter Jr., the UPI reporter who wrote the July 21 lead story, was considered the "best of the socalled space writers." The article included the astronauts' descriptions of touchdown and their view of the moon from the Eagle.

night by starting the lead story on the upper left-hand corner of Page One, instead of the

two-thirds of the page, wrapped around a central photo of the lunar landing site on the Sea of Tranquility.

Only one story was added for the second edition: a transcript of the dialogue between the Eagle spacecraft and Mission Control in Houston. This represented the only real "breaking news" because stories about the astronauts' equipment and experiments — from their 125-pound (75-kilo) backpacks to their rock-sampling jamnts - either had been covered in the days preceding the landing or were prepared in advance for that night.

Neil Armstrong's boots finally touched lunar soil at 0256:20 GMT — long after the IHT's final deadline and thus too late to be included in the July 21 edition. "The timing was unfortunate for us, it really didn't break right," Anderson said. But after the paper was put to bed, he remembered, the editors stayed up "all night in Buddy Weiss's office" to watch the moonwalk.

The paper sold out as people bought it to read and to keep as a souvenir. Weiss estimated that 155,000 copies were printed, up 30,000 from the usual run, and said, in retro-

A Century of 'Speaking Up'

By Vicky Elliott ational Herald Tribune

GOOD newspaper speaks for itself." So said James Gordon Bennett Jr. in 1887. Now, a century later, the newspaper he founded in Paris is still speaking up — "alive and well and living in a rented office in Neuilly," as a famous alumnus named Art Buchwald once put it.

But Bennett's legacy, the Inter-national Herald Tribune, no longer speaks solely to the Americans of Paris, once the paper's prime audience. Today, its audience is more than half non-American, residing in 164 countries around the world.

As a monument, not bad. (And it is still more fitting when one con-siders the memorial he originally planned for himself, a monstrous concrete owl overlooking New York's Hudson River that mercifully never saw the light of day.)

When the European Edition of the New York Herald first ap-peared, on Tuesday, Oct. 4, 1887, Bennett saw no need to introduce the paper, which was numbered No. 18,670 and informed its readers, among other things, that the financier Jay Gould was planning to follow his yacht across the Atlantic on an ocean steamship and that ex-Empress Eugenie of France, visiting chilly Balmoral, was having to find excuses not to drive out with her hostess because Queen Victoria, a lover of fresh air. will never allow her carriage to be

The Herald brought a gust of fresh air into European journalism, but its founder was not about to aging the earliest experiments with make a fuss about it. This is not a automobiles, airplanes and wireless new newspaper," Bennett snorted in reply to one of the paper's earli-est readers. "The Herald is over a have chosen to publish a European edition is a detail. We do not, moreover, believe in buncombe articles about 'long-felt needs' and telling what one intends to do, and what not to do." And then he added: "A ong-felt needs, Bennett had struck

near Paris's central post office. They were soon rolling out lavish feature supplements in color; a decade later, they introduced half-tone photographic reproduction. Distribution similarly kept up

with the latest trends. In 1908, having experimented with a racing car or two, the Herald retired its cyclists and horse-drawn delivery vans for a fleet of motorized deliv ery trucks.

Meanwhile, Crockett maintained that he was the first newspaperman, at least in Europe, to use an automobile in pursuit of a story. This happened when a lady friend helped him to trail William K. Vanderbilt the elder and his new bride to their thâteau outside Paris. And Wilbur Wright invited a Herald correspondent to become the first airborne journalist in 1908. ("Good God," the reporter wrote of the ascent, "what a rush! I never felt any other sensation like it, except once when dashing down a water

In communications, too, given the demands of his extensive network of correspondents, Bennett became something of a pioneer. To reduce the cost of telegraphic dispatches, and break Jay Gould's Western Union monopoly, he joined forces with silver magnate John W. Mackay to set up the Commercial Cable Co., and in 1899, he enlisted the young Marconi, whose experiments had been brought to his attention by a reporter, to record the finish of the America's Cup yacht race.

The wireless served the Herald particularly well in its coverage of the 1912 sinking of the Titanic. Scanning the passenger list of the liner Carpathia as it steamed to-ward the stricken ship. Bennett spotted the name of an enterprising young maker of shirtwaists whom the Herald had interviewed a year earlier. May Birkhead did a splendid job of relaying by wireless the accounts of the survivors, and after completing her European tour, ended up in Paris as the Herald's society editor.

In his capacity as self-appointed representative of the United States, his presence felt in politics, whether it was consorting with Sultan Abdul Hamid of Turkey or snubbing Keiser Wilhelm and his crown prince, for whom he came to harbor a profound disdain. In 1889, he fell afoul of the French government by briefly but openly espousing the cause of an anti-Republican movement led by General Georges Boulanger, and he vowed never to make such a mistake again.

But his correspondents' interviews with the likes of German notables and Italian prime ministers helped to establish the press as an influence in diplomatic affairs. By 1912, a reader was praising the Paris Herald as "a national emblem and oracle - the most patriotic and American thing in Europe, not excepting the diplomatic corps."

Despite its handsome appearance, the Herald was not a paying proposition. By 1908, with an abortive attempt at a London edition behind him, Bennett estimated that he had sunk \$7 million into his "Continental paper," which then was losing money at a rate of about \$100,000 a year.

la Repubblica

"La Repubblica" is Italy's leading quality newspaper. The trend of the opening months of 1987 shows a further

497,000 copies sold in January; 664,000 in February; 691,000 in March; 682,000 in April; 689,000 in May; 719,000 in June; 723,000 in July; 719,000 in August. • for readership: an ISEGI survey - a collective survey into average-day newspaper readership - provides figures of 2,794,000 daily readers of "La Repubblica" for 1987. • for circulation uniformity: "La Repubblica" is the only national daily. Readers and copies are distributed in every region of Italy, in proportion to the population profile. on Fridays, "La Repubblica", with its "Business and Finance" supplement, becomes the leading economic-financial newspaper: from January to July 1987, the sales of "La Repubblica" with its "Business and Finance" supplement reached an average total of 770,000 copies.

The Day the Paris Herald **Covered Up the Bikini**

By Linda Healey THE fashion editor had

only one word for it: And although her article have been the smallest in the ory of the paper, the brief repor that it shared packaged a number of bylines.

When the bikini was unveiled in Paris, on July 5, 1946, all the Her-ald editorial staffers wanted to cover the story. The collective article that ran in the next day's paper included the following editor's

"For the first time in history, the entire staff of the European Edition and the foreign service of the New York Herald Tribune now in Paris insisted yesterday on covering the same assignment. Each was so determined to do that job that, for the sake of organizational morale, they were Il assigned to the story. It turned out to be an exhibition of the world's smallest bathing suit, modeled at the Piscine Molitor. Most of their stories are printed below, although some of them are still writing.

Thus it happened that everybody from Paris bureau chief John "Tex" O'Reilly to sports columnist Eddie Snow ended up reporting on the swimwear scoop. Their over-heated, tongue-in-cheek dispatches considered the subject from just about every angle.

"Bare-Foot Boy Abroad" was the subhead on O'Reilly's contribution, which reported: "There track was fast and considerable erable danger of a disrobement was a row of girls paradin' around in scanties and the judges were workin overtime. Every one of 'em, I mean the girls, was as pretty as a spotted pup under a red wagon."

Bikini Days: Michele Bernardini models the first, in 1946.

Snow took a cooler line. "The who worried that "there is considform was displayed on all sides," he

"Joan of Arc" by offering him free tickets to an upcoming film. Infuriated at this apparent

breach of protocol, the producer, Walter Wanger, immediately de-nounced Buchwald as immature. Buchwald countered by telling a wire service reporter, "In France when a producer doesn't like what a critic says, he challenges him to a duel. If Mr. Wanger will send his

seconds, we can discuss weapons." There was never a duel, but the story got good play. And Buch-wald's worldwide recognition grew. By now Buchwald had broad-

ened his beat to concentrate more on the Paris social scene. He was dropping in regularly at the big hotels — the Ritz, the Crillon, the George V - to hobnob with Jack William Attwood's copy also pre-dicted serious competition: "We'll Taylor. The stars, eager to have him report on their presence in Paris, sometimes would call Buchwald first and say, "Could you take us to a good restaurant today?"

Hawkins has noted in his memoirs that, although the famous arativity. I'm glad none of my rela- saw its possibilities for an American columnist abroad."

By 1952, the column had become "Europe's Lighter Side," but was bound only by Buchwald's imagination. It was also appearing regu-larly in the parent New York Herald Tribune. Later, as more papers picked it up, the column became simply "Art Buchwald."

You can't believe how loose and laid back everything was," Buchwald recalled. "I had com-

Buchwald once drove to Moscow from Paris and then wrote 10 articles on what it was like for a capitalist to go to a communist country in a Chrysler Imperial. On discovering the state of Russian roads, he quipped, "We begin to understand why Napoleon turned back."

When Billy Wilder was touring Europe and promoting "Some Like It Hot," Buchwald got to the crux of the matter by quoting the wor-ried director as saying, "The picture is making a fortune, everyone is laughing, the theaters are crowded, but the question I have to face every morning is: 'Could this film win first prize at the Yugoslav Film

Buchwald became so popular that he eventually required a secretary, who was useful for more than tracking appointments and mail.

Ursula Naccache, who worked with Buchwald for four years, re-members that he often "didn't have a column yet at 4:00 and he'd have to turn one in by 6 and he'd say to me, 'Ursula, tell me your life story

So the next day, the world might read about poor Ursula's attempt to get a marriage license in Paris or how she ran into trouble because in 1956 she changed apartments without telling the police.

"There is no more serious crime in France (unless you can prove it was a crime of passion) than moving in France without telling the Prefect," Buchwald wrote.

One of Buchwald's favorite subjects was American tourists. "They didn't know where they were," he recalled. "They didn't know what the money was all about, they thought they were be- friends who said you can buy the

ing cheated all the time and, ah, same things in Rome." they were funny." In a column entitled "Inverted in Rome, but we didn't even see the bism," his tourists bragged Pope - and we're Catholic."

vacation.' By 1962, Buchwald himself was ready for a vacation. His reservoir of fun and games was running dry, and in June he confirmed the prevailing rumors that he would be leaving Paris to test his talent on

the political front in Washington. "After 14 years of pacing up and down the boulevards of Paris," he wrote at the time, "we decided it was time we got reacquainted with the land of our birth as well as giving our livers a long-needed

His friends were doubtful. He could never compete with "serious journalists," they said.

Of course, they were wrong. After an inaugural column from Washington about the hassles of house-hunting, Buchwald proceeded to perfect the political satire that would win him a Pulitzer Prize for

outstanding commentary in 1982. For most of Buchwald's time in Paris, his column was anchored to no particular spot in the Herald's pages. That changed with the arrival of Cutler as editor.

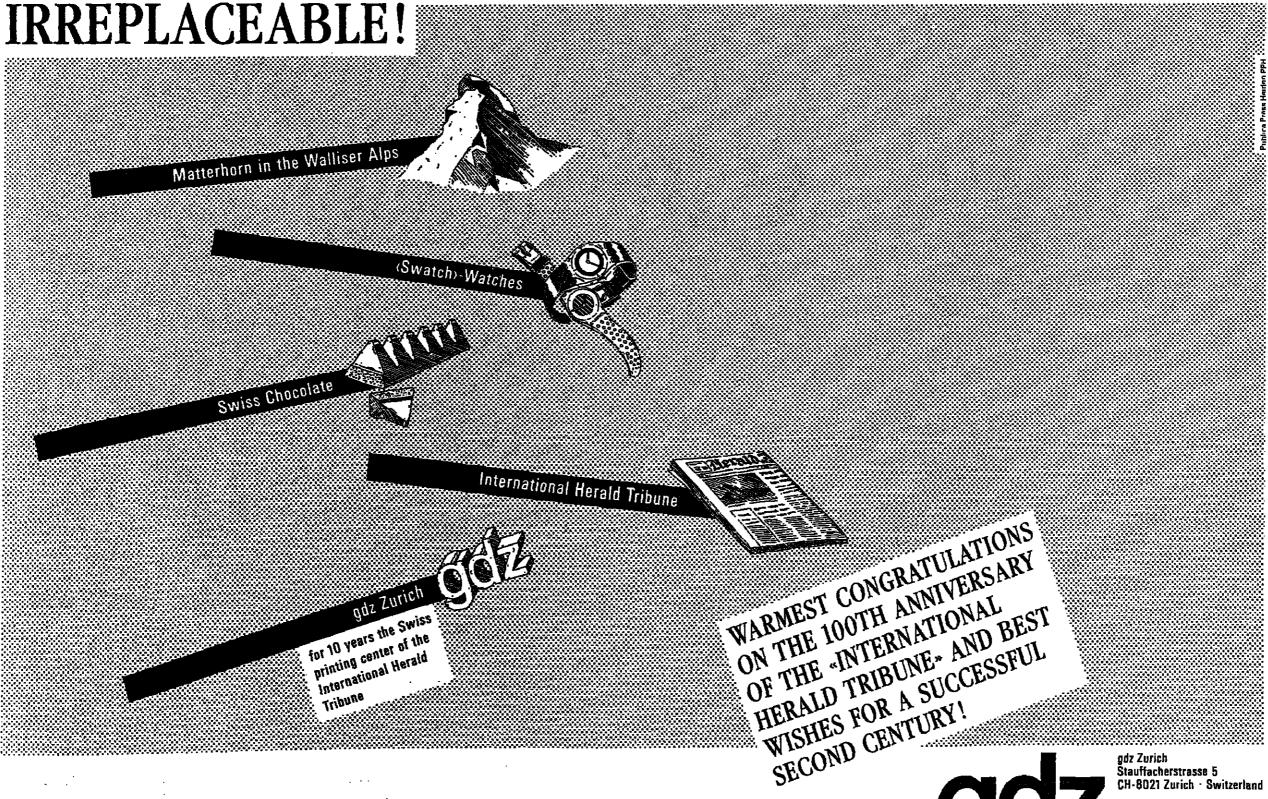

"I thought the column deserved an anchor," he said, "and after a big fight with circulation I moved the comics off the back page and put Buchwald in the upper left-

hand comer." More than a quarter of a century later, Buchwald and Cutler are both long gone from Paris, but the column hasn't budged from the back page. Although the Herald Tribune is only one of 550 papers in which the column now appears, it remains Buchwald's favorite, for

obvious reasons. Looking back, he said, "We had a wonderful time and we lived the members to give them up in the life that we were supposed to live, granted to us by the French-Ameri-

A Fashion Reporter's Favorite Anecdote

ane author has covered the vagaries and vogueries of the Paris fashion scene for decades and picked this story as her all-time favorite. It appeared in the IHT of April 19, 1979.

By Hebe Dorsey

nternational Herald Tribu N one of last week's spiciest moments. Pierre Cardin called Anna Piaggi, Karl Lagerfeld's escort, muse and best friend, a monkey and a clown. It happened at a dinner party closing the fashion season, a hectic time that always carries some madness about it anyhow.

One must also understand that this is not exactly a normal crowd - women crazy about dresses, men crazy about each other. Talents, phonies, groupies, cliques. As for the clothes they beat anything on the runway: leather and gold chains, bare shoulders and lace, sequins and lamé - one big fashion orgasm. But even in that crowd, Anna Piaggi turned out to be too

At Le Sept, a restaurant that started out being frankly gay but is now chic and very Tout Paris, a prominent French fashion editor was hosting a dinner for interna-tional fashion. Cardin was seated at the table of French Vogue editor Francine Crescent, who has great social clout without trying.
Other fashion luminaries, such

as Pierre Balmain (in a Zorro-black cape) and Guy Laroche (in satin blouson), were distributed evenly, except for poor Marc Bohan from Dior, who arrived late and ended up in Siberia — downstairs and not too far, in fact, from the toilers Lagerfeld came even later, but he fared better.

fashion today, and he is also a close friend of Miss Crescent. So he headed straight for her table in a are a clown." well-planned, calculated Versailles grand entrance. (Lagerfeld is mad for the 18th century. He sleeps in a period red brocade bed and dines only by candlelight.)

His ponytail tied in an impeccable bow, his mouth touched up with lip gloss, he walked in fanning himself with huge black feathers. Behind him. Piaggi looked like some giant chandelier put in summer storage, her head wrapped in white gauze, in her La Scala dress. an enormous lace crinoline so big that in order to accommodate her skirts, one had to move Neiman Marcus President Philip Miller (he squeezed right to make room),

Fashion Madness: Piaggi as sketched by Lagerfeld (inset).

to insult a woman in public? Could

it be that he was miffed by Lager-

gap? But why get so mad?
And who exactly is Piaggi? A

fashion freak? Yes and no, though

God knows she more than looks

like one in all those Visconti

and gold-headed canes.
At Lagerfeld's collection, for in-

mes, ruffles, cartwheels, bustle

monologue you to death.

"He's cut my appetite," and fan-ning himself furiously. Meanwhile, As Lagerfeld and Piaggi moved in like a two-piece armada, Cardin Piaggi never said a word. She just started agitating and mumbling that this was "a scandal, a disgrace, looked at Cardin and went on with a shame to Paris fashions . . . Madher dinner. A lady. The fight was off, but not the tongue-wagging. Why would Cardin, a gentle, elegant man, choose woman of Chaillot, I'm finishing my dessert then out, can't take it anymore." And on and on.

Everybody was seated and the commotion was over when, in a Now, two things: Lagerfeld is dead silence, Cardin, obviously still the acknowledged king of Paris in shock, nurned to Piaggi, who was at the other end of the table and said (yes, loudly): "Madame, you

Everybody stops eating, Lager feld stops fanning, looks right, then left, everybody holds his breath, hoping it is all going to be a big joke. But not at all. One second later, Cardin struck again: "And

you are a monkey."
At this point, Lagerfeld choked in his stiff, custom-made Hilditch and Key collar. He was about to jump on Cardin — "Non, vraiment, ce monsieur" - when his neighbor, who was dying for a fight, possibly a duel, thought about the hostess, a good friend, and held Lagerfeld back. It wasn't too hard.

It all fizzled out, with Lagerfold

fle on her head — "part of a Vene-tian costume." she said — fastened with a bunch of fresh red roses. She had picked up her dress — black and pearly over Pierrot pants — at the flea market. She was fanning herself (these two are big on fans) with four giant and slightly dusty white ostrick feathers, the kind one sees on 18th. century four-poster beds. (That's exactly what they were for Lager, feld is fixing a bed up for his Brittany chateau, and let her have them "because I have a slight cold," she said with a deep-throated chuckle

that is as close as she comes to People who know Piaggi will say she was a nice, literate and very polite if obscure woman before she met Lagerfeld 10 years ago. Lagerfeld has changed considerably, too, since he's met her. He used to shun all publicity, going around in Chinese-like black-cotton uniforms. Austere, no fuss, no frilis. Now, he is on that crazy dress-up kick, and his friends worry that he may be overdoing it. "Karl is so big, he doesn't need cheap publicity," one of his closest friends said last week. Tm sad to see him behaving like

Could it be that Piaggi is a bad influence, some kind of femme fa-tale whose impact could go farther tate whose impact could go farther than just Lagerfeld's personality? In real life, she works for Italian Vogue, where she has two pages, often illustrated with colorful sketches by Lagerfeld.

Lagerfeld claims she is a peasant with a total fascination for clothes who keeps inventing fashion as she goes. When she goes to the country for the weekend, she brings five steamer trunks and changes an average of six times a day. One way or another, she must have a strong influence on his clothes.

feld's getting so much attention? Hardly, if one knows Cardin, a Asked if that was so, Piaggi said man of worldwide scope and so recently, "I guess so. But we're very totally self-centered that he can independent, you know. I never wear Chloe's clothes. Maybe a shirt Was it not the sincere reaction of here, a dress there. I like to mix a designer who has done a lot for fashion and who was truly shocked everything, modern clothes with vintage clothes. by what he considers fashion decadence? Is it possible that there is some kind of fashion generation

"I love dresses. I feel like some sort of missionary. I can transform everything. I can make something out of nothing, just by changing the

"Do we talk fashion with Karl? Yes, but indirectly."

Doesn't she mind people laugh-ing and cracking jokes? "It doesn't worry me," she said. "People can usually tell I'm having fun. I'm nevthey'd got their sweaters on right. Piaggi arrived wearing a black ruf-

The Rich Legacy of the NYHT

ad Herald Tribune

AMES Gordon Bennett Sr. and Horace Greeley - the two grandfathers of the International Herald Tribune - were the sort of men who called an arm an arm. In the New York newspaper world of the 1830s, this was unusual: the vocabulary of gentility was riddled with cupheisms; "extremities" for arms and "digits" for toes were only two of the sillier ones.

But Greeley and Bennett had neither the time nor the inclination for "nice" language. The newspa-pers they founded reflected this intelligence and impatience, and helped bring American journalism into the modern age.

In 1835 Greeley was writing and printing a small, money-losing magazine when he was approached by Bennett to help launch the Herald. Greeley - who disapproved of Tiquor, tobacco, gambling, prostimtion, capital punishment and slav-- was cool toward Bennett. who already had three failed newsnapers as marks against his name. So Bennett went off to do it alone - "not to instruct," as he said, "but to startle" — and his Herald found fame with its first big story, graphic coverage of the hacking murder of a prostitute named Helen Jewett. Greeley did not ap-prove. When he finally weighed in with his Tribune in 1841, he adopt-

ed a more dignified tone. The newspapers were fierce rivals, and thrived on their opposing styles. But both helped shape every newspaper that came after. Bennett's Herald redefined the meaning of news. Greeley's Tribune showed that a popular newspaper can also serve a moral purpose and still attract readers.

Rennert was European by birth. a linewist and a self-trained political economist; the Herald became the first American paper to carry Wall Street news, including stock market prices, and the first to offer systematic foreign coverage.

Perhaps Bennett's most daring and impudent innovation was his assault on high society, whose exploits he detailed in a style described as "midway between lampoon and sycophancy." Sometimes society hit back. In one extreme episode his wife watched helplessly while her husband was beaten senseless by a gang headed by a political candidate whom the Herald had helped to defeat. Horrified. she fled to Europe to raise their children, setting the stage for James Jr.'s return to Paris years later to found the European edition.

Bennett Sr. was also in the forefront of technological advances, using Samuel F.B. Morse's new telegraph, for example, to cover the Mexican war in 1846.

-

the first to epitomize the crusading

journalism. The Tribune led the fight against slavery and for educational reform. It also aimed to enlighten, with coverage and arts criticism that set the standard in America's most culturally impor-

tant city. After Greeley died in 1872 (a month after he lost the presidential election to Ulysses S. Grant), the paper edged further to the right. And it also pioneered technologically: Greeley's successor, Whitelaw Reid, financed the development of the Linotype machine which revolutionized print production. Thirty years later, the Tribune introduced the easy-to-read Bodoni typeface, changing the look of U.S. newspapers.

Neither man cared much about money; they cared about the story, and costs be damned. Bennett, for example, spent the then-extraordinary sum of \$525,000 on Civil War coverage. In 1870 the younger Bennett spent thousands to send reporter Henry M. Stanley to Africa to find the Scottish missionaryphysician David Livingstone.

Such largesse helped turn the Herald into the biggest, most influential newspaper in America, with more than 500,000 readers a day by the 1880s. But the impulse to spend sowed the seeds of the Herald's later financial difficulties.

The Tribune's problems were different: It never found an editor whose vision and energy could drive it the way Greeley had. Under Reid, the Tribune became conservative and complacent, especialafter Reid moved his base to London, where he served for many vears as American ambassador, By the time his widow and son bought the Herald and merged it into the Tribune in 1924, both newspapers re experiencing serious financial and leadership problems.

And yet, despite continuing financial strain, the merged paper become one of the very best dailies published anywhere.

What the men and women who live on in the continuing life of its ran the papers after Greeley and overseas edition. Bennett had in abundance was taste, and this may have been their cial. What remains noteworthy most lasting legacy. Quality was about the old Herald Tribune is not appreciated, whether it was Karl that it bired good writers and edi-Marx's brand (he was the Tribune's tors, but that, for much of its life, it London correspondent in the could not afford to hire them. The 1840s), Mark Twain's variety (he quality often came despite low wrote for both papers), that of Jacob Riis writing for the Tribune about "How the Other Half Lives" in the late 19th century, or Tom dents had to pay their own travel-Wolfe's and Jimmy Breshin's sort ing expenses while on assignment). (they were Herald Tribune col-

leagues in the 1960s). Helen Rogers Reid, the strong-willed wife of Whitelaw Reid's son Ogden and the leading figure in the But when the New York Herald Trib's management for decades, may have been as conservative as Greeley's Tribune was among she was energetic, but she fought, would have Horace Greeley or he first to epitomize the crusading nonetheless, to hire the liberal Wal- James Gordon Bennett.

Whitney was responsible for putting frozen orange juice on the table. "A Streetcar Named Desire" on Broadway. "Gone with the Wind" on the silver screen. Tom Fool on the racetrack, pole on the cover of Time magazine, and the International Herald Tribune on the newsstands of 164 countries.

By Judith Fayard

He served for nearly a quarter of a century as chairman of this newspaper, purchased by him in 1958, until his death in 1982.

Born in 1904 and heir to one of the great American fortunes, Jock Whitney also inherited a strong sense of richesse oblige, using his vast wealth, as Dolly Levi urged in "The Matchmaker," "like manure, spread around encouraging little things to grow."

In his early career he backed

such theatrical hits as "Charley's Aunt," "Dark Victory" and "Life With Father." He was an early believer in the new Technicolor process and, in partnership with David O. Selznick, produced such film sics as "A Star is Born," "Rebecca," and, of course, GWTW, which owed much to his unwavering confidence.

He went on to sponsor the Coupe Internationale des Aéronautes for ballooning, an jingoistic Chronicle, but Hearst retaliated by enterprise "immune to any kind of commercial exploitation," as one expert put it.

This contest ran from 1906 through 1929, with a gap for World War L and was resur-rected in California 50 years later. Bennett gave his name and generous cash

prizes to all manner of other sporting events. His Coupe Internationale d'Aviation is described in the just-released "Blue Ribbon of the Air — The Gordon Bennett Races," by former American Ambassador Henry S. Villard. Also important to Bennett was coachdriving, with sailing, horse-racing and motor yachting also figuring heavily.

He was protective of his surname, howeveither a piano or a fireplace (there are two versions of the incident) during a party at his ence, he launched a series of competitions, even on the masthead. Meanwhile, as a byfiance's home, not only led him into the last early in the 20th century, that the sporting product of his interest in global exploration, er, and banned its use in his newspapers, was being attached to some of the most inaccessible corners of the Earth: to a lake in Alaska, an island in Siberia, and even, temporarily, to a mountain in Africa, to which he had sent journalist-explorer Henry M. Stan-

ley's to find missionary David Livingstone. Within his own dominions, Bennett's word was law. "I want you fellows to remember," he told the staff of the new Paris edition, "that I am the only reader of this paper. I am the only one to be pleased. If I want it to be turned upside down, it must be turned upside down. I want one feature article a day. If I say the feature is to be Black Beetles, Black Beetles it's going to be."

He was merciless to his subordinates, rationing not only remuneration but praise, and since he required only four or five hours sleep a night, Bennett was able among his other activities to maintain constant surveillance over his newspapers from the other end of a cable.

Alcohol, for which, like mutton chops and plovers' eggs, he had a distinct partiality, accentuated Bennett's unpredictability. On his lightning raids upon offices of the Paris paper, he might elevate a drumken printer to the rank of managing editor, or pen a sting-ing editorial on the Catholic Church entitled "To Hell With the Popel" (It never appeared, delayed by editors until sobriety returned.)

William Randolph Hearst, another unmentionable, was once rash enough to ask whether the Herald was for sale, and at what cents Sunday. Bennett." came the acid reply. The Herald's sober coverage of the Spanish American war won readers away from the opening to prurient public debate the dubious cast of the New York Herald's "Personal Column." The affair dealt the newspaper a devastating blow.

While Bennett's relations with fellow Americans were not always cordial, he cultivated his own brand of expatriate patriotism. "If a nation is friendly to America," he told an editor, "I wish the Herald to be friendly to that nation, but if a nation shows an unfriendly policy, I wish the Herald to adopt an unfriendly tone."

Germany was the chief victim of the latter strategy. Having once been snubbed by the Kaiser, probably unintentionally, when he had asked for an audience, Bennett refused all subsequent overtures.

Bennett was determined that like his father, he would die in his 77th year. When that birthday came around, in May 1918, he suffered a massive brain hemorrhage and never regained consciousness. As one biographer put it, he had his way even with death

Swiss Bank Corporation reveals a closely guarded professional secret:

Even if it works, ask why.

Many of our customers have something in common besides their choice of international bank. They've learned how to learn from their successes, the way everybody else learns from mistakes. The reasons why something goes right are just as important as the reasons why something goes wrong, and may be even more rewarding (and elusive). When nothing succeeds like success, it's because nothing works like work. Incidentally, when our customers keep coming back to us, we do know why. And so do they. We're one of their professional secrets.

HERALD

The losses did not, however, deter him from living the high life, hether headquartered in his resilence on the Champs-Elysées (one unning the proverbial tight ship at his two newspapers via cable from his yacht in the Mediterranean.

It was when the Great War broke out that Bennett really came into his own, and it was not long before he began calling for the United States to join the Allies against

As his mainly British staff melted away, he reared up "like an old warhorse," as one employee put it, taking it upon himself to report, to edit, to do whatever was necessary to ensure that the paper was printed every day. While other dailies in the capital shut down and moved with the government to Bordeaux, Bennett was left to battle with the censor, providing sections in French and news from the front to Parisians who were thirsting for the

end of the war. His papers did not flourish. Several years after his death in the spring of 1918, both newspaper properties were acquired by Frank A. Munsey, then owner of the New York Sun. In New York, the paper was now failing, but the Paris Herald, whose insulation had become dation had boomed from a mere 12,000 in the late 1880s to an unprecedented 350,000 with the arrival of General John J. Pershing's American Expeditionary Force,

American expeditionary Force, provided an unexpected windfall.

Although circulation had plummeted after the doughboys sailed home, the huge profits of 1917-18 were squirreled away and forgotten hugest and account. ten. Munsey's surprised accounts discovered a hoard worth about \$1

Munsey's reign was brief ("Sic Transit Gloria Munsey," an office wag recorded among the graffiti on the wall of the editorial room), and the paper in 1924 passed into the hands of Helen and Ogden Reid, already owners of the New York Tribune, founded in 1841 by Horace Greeley. The Paris paper did not add the Tribune name for another decade, and then only after it merged with a local rival, the European edition of the Chicago Tri-

Handelsblatt

(Continued from Previous Page)

A hiatus of four years followed, try into Paris of Allied and Free French troops, the U.S. Army newspaper, Stars and Stripes, was installed in the Herald's plant and presses. By that December, Geoffrey Parsons Jr., son of the chief Herald Tribune editorial writer in New York, and himself its burean chief in London, had taken over as editor of a revived Herald and published its first postwar editions.

A makeshift partition, known as the Wall, divided the newsrooms of the two publications, but fraternization between the staffs was amicable enough for Tribune men to cades not baths from their opposite numbers in their billets at the Hotel Scribe, and General Eisenhower himself was sufficiently fond of his daily Herald to complain when he

Many of the prewar staff began to trickle back, in time to put out a slew of banner headlines announcing such momentous events as Roosevelt's death, the German surrender and the U.S. air raid on "the important Japanese army base" of Hiroshima ("Atomic Bomb Revolutionizes War" ran the prescient headline).

Herald Tribune had an important role to play in telling Europe, as Parsons put it, "what America thinks and is doing." "An adapta-tion of the New York Herald Tribune," he wrote in an enthusiastic and telling memorandum to the Reids in New York, "published with the understanding that it was aimed at an international public. might actually achieve an international significance beyond any-

thing we can imagine."
The Marshall Plan recognized this potential and underwrote 10,000 subscriptions of the paper that were distributed throughout Europe, but, in general, the 1950s, decade of a series of managemen changes, merely laid the ground-

work for later expansion. Continuity was provided by Eric Hawkins, the dimunitive British managing editor whose Herald ca-reer had begun on the night in 1915 when the Germans sank the Lusitania. Hawkins became managing editor in 1924, a title which normally put him in effective daily charge of the newsroom, and he held that job until his retirement in 1960, at 74. Following Parsons's departure in 1950, he was the senior editor both in title and in function. (He was born a year after the European Herald put out its first issue.) His

successor was Bernard Ciriler.
The 1950s were the Parisian jours de salade of an ex-Marine named Art Buchwald, who arrived in 1949 to disrupt the newsroom by cack-ling at his own jokes as he un-

"La Fete du Merci Donnant" upon the world. Almost 40 years later, the paper still carries Buchwald's is, now beamed over from Washington, D.C., and a much scaled-down portrait of his Cheshire Cat grin. In 1958, the ailing New York

Herald Tribune was purchased from the Reids by millionaire investor John Hay (Jock) Whitney, at that time the U.S. ambassador in London. The scion of a distinguished family, Whitney was conscious of a mission. He had bought the paper, he said, "because we live in a time when there are challenges only a newspaper can meet and excellences only a newspaper can set, and because I believe we cannot let the world go by default to the dullards."

In Paris, as in New York, Whitfrom The New York Times, which, in 1960, decided to launch an edition in Europe. The Herald Tristeady hand of longtime business manager André Bing held its ground, expanding its communica-tions facilities to permit same-day publication both of editorial material and full New York stock listings. In Paris, neither side was able

But in New York, the picture was

gloomy: After a debilitating strike its traditional audience on the Conat the Herald Tribune, Whitney fi-New York paper. "I shall continue," he announced, "as publisher of the Herald Tribune in Paris, and I am confident that paper will grow and prosper in the future as it has

Whitney made good on that vote of confidence, with typical inspiration, by enlisting the collaboration of some of the most potent forces in American journalism. The key first step was to bring in The Washington Post, whose publisher, Katharine Graham, had recently established a news syndicate with the Los Angeles Times, and was interested in further international visi-

In 1967, The New York Times negotiated to merge its European edition into the paper, becoming part of an impressive triumvirate. The new International Herald Tribune, armed with a panoply of the two U.S. papers' foreign correspon-dents and editorial voices, was now in an unchallengeable position to tell the world — in Parsons's words — "what America thinks and is

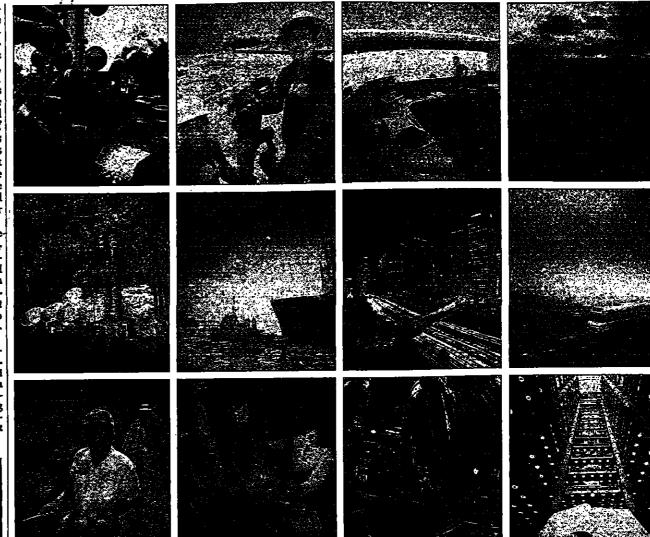

The stage was set for the next 20 years of progress toward global sophistication, extending the paper's reach well beyond the confines of

tinent. Under the direction of the nally was forced to close down the new publisher, Robert MacDonald, and his deputy, Roland Pinson, the first international facsimile link, with a print site at Uxbridge, outside London, was made in 1974.

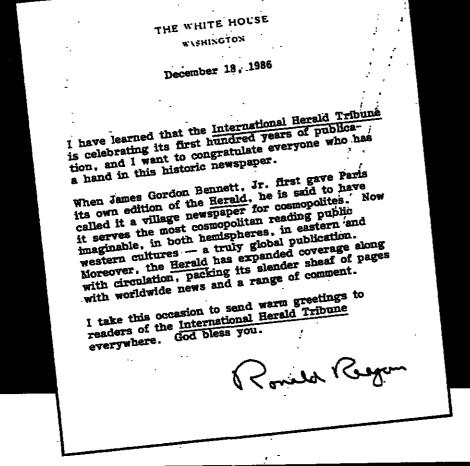

Until 1978 it was business as usual on the Rue de Berri, complete with the clatter of the presses and the ceremonial arrival every day of the editor, Murray Weiss, and his stately boxer dog, Baron. But it was the move to suburban Neuilly, out of Paris proper, which sheared the huge old presses away, marking the switch to electronic journalism and setting the scene for much bigger

A transitional period in the late 1970s, with Robert Eckert as publisher, set up operations for Europe's first fully computerized newspaper. He was succeeded in 1979 by Lee W. Huebner. Meanwhile, Weiss was followed by Mort Rosenblum in 1979, then by Philip Foisie in 1981. John Vincour became the executive editor in 1987.

Outside today's Neuilly building, there are no bronze owls keeping watch as they did stop the old Herald building in New York a century ago. But the Trib's computers keep things humming through the night, in a manifesta-tion of technology that Bennett himself might have appreciated.

How the Trib's Advertising Kept In Step With New Readership

By Richard H. Morgan AMES Gordon Bennett Jr. was not very interested in advertising. He did. however, have an able advertising manager, Alfred Jaurett, who attracted many clients to the Herald's elite audience, among them such still-famous names as Vuitton,

Guerlain, Tiffany and Michelin. That such ads got into the paper at all was something of a miracle, for Bennett insisted on seeing everything that went into his publication. Even when he was out of Paris, special mail bags would be dispatched to him. There is a description of the commodore sitting at the fantail of his yacht, puffing

away on his Havana, approving or rejecting material by the simple expedient of throwing overboard anything he didn't like "Won't have this in my paper," he would mutter, consigning yet another product of Jaurett's salesmanship

Left untold is how the long-suf-fering ad manager explained this to clients. It is a tribute to him and to the Herald's reputation that prewar ad revenues grew nicely.

Advertising slowed during World War I, but surged again in the heady 1920s. The Herald's management, with Jaurett still in place, aggressively promoted it as the ideal means of reaching the American tourists flooding Europe. The paper's pages blossomed with uncements from retailers, hotels, shipping lines and restaurants.

It was in the 1920s that the Herald's most famous advertisement began appearing (it still runs to-day). "Just tell the cab driver SANK ROO DOE NOO," reads the ad from Harry's New York Bar. Americans responded in droves, eager to escape the great thirst which prevailed at home.

That was also the decade that special supplements became a maoper had carried supplements (inluding handsome four-color fashion sections) from its start. The apogee came in September 1927, with a 56-page, ad-filled issue welcoming the American Legion con-

Circulation and advertising both shrank during the Great Depres-

nhun" is the generic word for new

course in a series of front-page editorials, just months before the paper closed with the fall of Paris.

prosperity returned, along with the American tourists. Led by Ad Director Marcel Tallin, the European Edition once again sold ads aimed

largely at Americans. But starting in the middle of the decade, a different kind of advertisement began to appear. The explanation lay in a basic change of direction, one stemming from postwar editor Geoffrey Parsons Jr.'s dreams of gearing the paper not only to Americans but to a truly mational audience

As improved transportation permitted wider distribution, and as English became the dominant international language, Parsons' dream began to come true. The cources of its New York parent and became less parochial.

European business and govern ment leaders began turning to the Trib and, as the audience changed. so did the ads. Pages began to come in from resurgent European industry and there were financial notices from Wall Street institutions, eager to reach newly prosperous Europe-ans. To service this business, the Paris paper established its own New York sales office in 1949.

Change was slow. As late as 1963, the paper's largest advertiser in 1964, Soviet Chairman Nikita Khruschev wanted to tell his story to the West, the only publication he Herald Tribune.

The 1960s also brought new competition, including The New York Times' International Edition, roads. It soon became evident that there were neither enough readers nor advertisers to sustain both. The 1967 merger and the cre-

ation of the International Herald Tribune under its present ownership changed the situation. Over the next 20 years, the IHT was to sion. The Herald Tribune was become a major force in interna-deeply in the red and scrambling tional marketing. In 1966, the pahard for what little advertising was per's total ad revenues were \$1.6

man, Austrian and Italian resorts Twenty years later, in 1986, IHT and travel companies. In 1939, however, he reversed hind Time and the Financial week and The Economist.

The bulk of IHT advertising is When publication resumed in now related to business and fi-1944, there were few ads available. Dance. There are still plenty of trav-It wasn't until the early 1950s that el ads, but they now come mostly from airlines promoting their first or business class services and from leading business hotel groups. The paper has developed a strong international classified section - the

only one of its kind. Supplements still play an important role and high-quality 4-color ads were successfully introduced in 1980. But even as advertising grew, the IHT held to a policy of limiting ad content to 30 percent of fetal space, keeping the paper slim.

To sell and service this business, the IHT has created a global sales organization, including subsidiaries in New York, London, Frankfurt, Singapore and Hong Kong, and a network of commissioned esentatives to cover other man kets. All this is supervised by Rolf Kranepuhl, director of advertising sales since 1985.

The key to expanded advertising has been the high-quality demographic profile of IHT readers, as measured in readership studies which are controlled by advertisers (a technique pioneered by the IHT). These regular surveys hased on questionnaires printed in the paper - demonstrate both the loyalty and the quality of the IHT's audience. When the last study was conducted in 1986, more than 13,000 readers responded, providing an unusually large sample. Some key findings about the readers included average household in-come: \$82,700; post-graduate degrees: 38 percent; senior managers:

With its nine printing locations the IHT actively promotes itself as "the global new spaper," read by an international elite in 164 countries. James Gordon Bennett used to describe his Paris Herald as a "village newspaper" and the term is still apt. But as publisher Lee Huebner often puts it, it is Marshall McLuhan's "global village" that today's paper takes as its turf.

Richard H. Morgan, associate publisher of the IHT, was advertising director from 1965 to 1985.

Congratulations on the 100th Anniversary of International Herald Tribune Let's progress together to pioneer a new century

THE YOMIURI SHIMBUN: the world's most exciting newspaper

The Yomiuri Shimbun has a daily circulation totaling 14,000,000.

The Yomari Shanban publishes daily 9,15 million copies of its morning editions and 4.87 million copies of evening editions texcept Sundays), totaling 14 million newspapers distributed to readers nationwide.

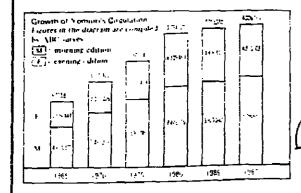

These figures are the largest for any daily newspaper in Japan- in fact The Yomium Shimbun has the largest circulation of any commercui newspaper in the free world

The Yomium Shanbun was rounded in 1874 as a morning newspaper. In 1931, we began publication of the evening edition, By 1974, a century after its first appearance. The Yomiuri Slimbun was printing 6.65 million morning and 3.9 million evening newspapers

It was last year, in 1986, that we passed the 9 million mark for morning editions alone, No. other newspaper has shown such tremendous growth in so short a time (pan, and many newspapers in various countries have usked us to divulge the secret of this maracle.

It is not such a big secret. The reasons The Yomiuri Shimbiin has great support from readers. and is attracting a great deal of attention internationally are high-quality reporting based on a wide perspective, fairness, an honest and constructive editional position and a people-oriented marketing stance built on the motto, "progress with the people."

Other factors that have won the confidence of our readers include the development of technology producing clean and easy-to-read print, the establishment of a door-to-door distribution network, and a perception of the paper by the public relations agencies as a highly effective advertising vehicle

The word "Yomiuri" is composed of two characters meaning read (yom) and sell (uri).

Originally it referred to the practice, prevailing before the advent of the modern newspaper in Japan, of selling news by reading it out loud at street corners. This illustration shows a newsbry in the early days of the founding of The Yomiuri Shimbun.

His dress is typical of the days of "yomi-uri".

"Shimbun" is the generic wood for newspaper.

We carry out multifaceted activities.

The Yomiuri Shimbun is also involved in other unique activities in addition to regular newspaper publication. We print an English' paper, "The Daily Yomiuri," broadcast "Yomiuri Shimbun News" through affiliated radio and television networks and publish weekly and monthly magazines as well as books.

In New York and Los Angeles, we print the U.S.A. version of The Yomiuri Shimbun by transmitting the pages from Tokyo via satellite.

Art and sports are other areas in which we are active. As the only newspaper corporation to possess a major music company, "The Yomiuri Nippon Symphony Orchestra," we are involved in the promotion of musical appreciation through performance tours by the orchestra.

We also introduce domestic and foreign art by sponsoring fine arts exhibitions. We are especially strong in French art, and our Honorary Chairman Mitsuo Mutai has been awarded the Order of the Legion of Honor by the French government.

Our President Yosoji Kobayashi has also been recommended for foreign membership of the French Academy, and has been awarded the French Literary and Arts Medal.

The Yomiuri Giants, a leading baseball team in Japan and owned by a subsidiary of The Yomiuri Shimbun, has gained wide popularity and provided professional athletic entertainment for baseball fans.

ONE HUNDRED YEARS OF WARM RELATIONS — In lead ing the drive to present the Flame of Liberty to the critizens of Paris, the IHT is following the example of the people of France who, in 1876, gave the Statue of Liberty to the United States.

C: The Trib worked with international law firm Kevin MacCarthy
1 Associates and the American Club of Paris to organize the French-American Liberty Fund. The goal: to present France with a replica of the flame that, in the upraised hand of the Statue of Liberty in New York harbor, has welcomed generations of immigrants to America.

The target of the fund-raising campaign is \$400,000. As this is published, that amount is virtually in hand. Topping off the drive this

week was a major benefit dinner at the Palace of Versailles.
The Flame itself was created by Les Métalliers Champenois, the Reims artisans who restored the statue's torch and flame for its centennial last year. The Flame, made in the U.S. from the molds used to craft the original, left for France after ceremonies at Port Liberte, NJ. — near the Statue of Liberty — on Sept. 10. It wil be installed in Paris this winter as a permanent monumen

Switzerland, West Germany and leaders in international politics, It was only appropriate, however, that the celebrations begin in Paris, the city with whom the Trib's name has become indefibly linked.

Well as executives from the dozen companies helping sponsor the sion journalist Walter Cronkite and directed by Douglas Manning.

their fields by the year 2000.

• The Centennial Magazine, Our Century/Our World, was published by the IHT in September.

• The Trib's role as an interna-Leading writers contributed articles evoking the major themes of the Trib's century. The magazine

was edited by Joseph Fitchett. A commemorative plaque was mangurated this week at the site of the paper's former business offices on the Avenue de l'Opera.

• The James Gordon Bennett Cup automobile races, precursors of contemporary Grand Prix events, were commemorated in May in an international antique and classic car rally in Bad Homburg, just north of Frankfurt, site of the 1904 Bennett race. . . .

 Another of Bennett's sporting passions was polo, which he brought from England to the United States in 1877. To mark the Centennial in Britain, the Trib hosted a polo day in July at the Royal County of Berkshire Polo Grounds. Included was a restaging of the first British vs. American polo match of a century ago, as well

as the first elephant polo exhibition held in England.

"The Belle Epoque in the Paris Herald," a book compiled from the Trib's archives with additional text by IHT fashion reposter Hebe Dorsey, was published last fall. It was published in America under the title. "The America of Opplements" A paris tle, "The Age of Opulence." A party was held at Maxim's in Paris last fall to introduce the book and to

mark the paper's 99th anniversary.

• Two other books mark the Trib's centennial: "The International Herald Tribune: The First archives. In addition, the paper published a series of Centennial produced by Wendy Mallinson.

even old-time comic strips and cartoons.
In day-to-day editions, the Paris Herald chronicled the decline of the old, existing order and caught the Belle Époque spirit of emerging modern life. It's history as you like it ... with flair, fun and style. Order this beautiful book today ... to

In Praise of the Galley Slaves

By Harry Wagner MUST have read the Trib for the first time on or about June 1, 1945 and have been, barring illness or vacations, a fairly regular reader ever since. But not once during most of that time did I have to buy the paper or even take out a subscription. In fact, they paid me to read it.

You've guessed it by now: I was

reporter, or even an editor. It does is a job that has to be done - or at least had to be done in those long-ago days before electronic photo-composition allowed journalists to ed its necessity. Or did it really?

ence in the printing trade was Fred certain thrill, however, in the work, a feeling that you were somehow going back to the days when the Herald was printed and published in the Rue du Louvre. (The paper moved to the Rue de Berri in 1930.) A Britisher, he was a great pal of Eric Hawkins, a fellow Briton who was managing editor for many de-cades until his retirement in 1960.

Fred loved his job and took it very seriously, demanding from his five-man team the same seriousness Most people these days are hard-ly aware such a job exists. It's cer-tainly less glamorous than that of a and dedication that he gave to his expected if anything went wrong, but when the crisis was past he could just as well invite the offendnot have the aura of technical com-petence of the typesetter, or the Linotype operator, but it certainly

could just as well invite the offend-er to the bar next door for a glass or two to debate the latest big soccer

read their own proofs and eliminatist quotations against copy), and at each tist necessity. Or did it really? best a thankless job. If the paper. The prooffroom boss who took me on in spite of my total increment.

of the day, of being one of the links in the chain carrying news to the

And, of course, there were the lighter moments, when a slip by the composing room — or from the newsroom, for that matter - provided us with a chuckle or even some uproarious laughter. Such was the case when a compositor set a head reading: "Prince Charles Kisses Girl in Public" and left out one letter. I shall leave it to the reader to guess which. We did catch that one, but there were others we caught too late.

The best one in that category that I can remember was when a Proofreading the Trib was often boring (just imagine: For years we had to check the Wall Street stock

Fred Gilbert (left) checks galley proofs with colleague at the Rue de Berri plant. Inset right: Harry Wagner.

identifying him as a paint-loving astropod, and under the snail photo was a caption identifying it as a high-ranking American politico. Fortunately, only a few hundred copies were run off before the error was caught and the presses stopped No copies 20t onto the stopped. No copies got onto the streets, but several Herald employ-ees who collected such goofs snapped them up as souvenirs. (I did not get one myself.)

It appears that things like that no longer happen, thanks to the new setting and printing processes introduced in late March 1979. That was when my tearmnates and I had to leave our beloved Trib. broken-hearted and full of misgivings. Actually, the paper seems to come out fairly clean nowadays. Major er-

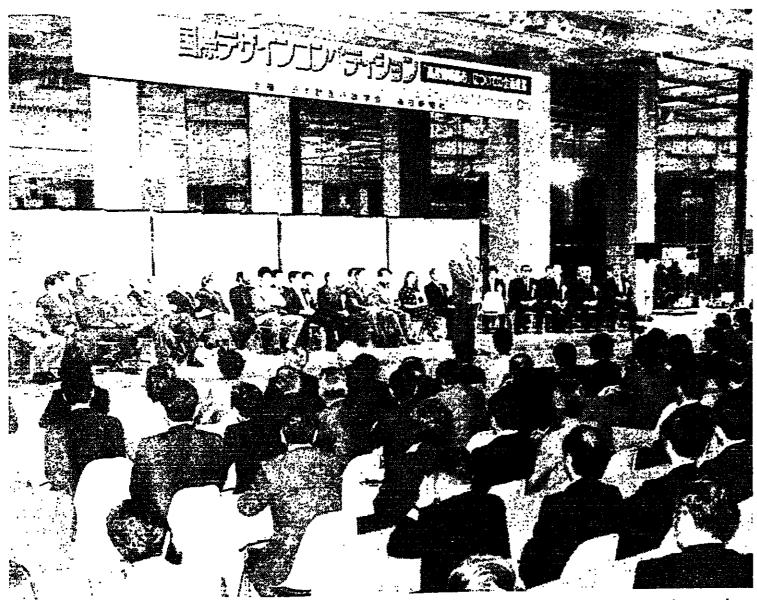

But alert proofreaders will aiways spot errors. There was one gem of ambiguity on Oct. 25, 1983, when a headline on Page I read: Mitterrand Visits Beirut; Death Toll Exceeds 200. No. no. no. 1 would never have let that one go without a fight. You can say what you like about the man, but he can't be that bad.

the Paris Herald from mid-1945 un-til March 1979, when he retired (as did many of his composing-room col-leagues) as the newspaper shifted to electronic publishing. He is French,

The Trib's Printers: Very Special Types

T was March 1978. The Trib was converting to electronic journalism and about three-quarters of its printers e going to leave. One of them Robert Devoghel.

And though there was plenty of fivity during the final week at the plant on the Rue de Berri, the it wasn't there anymore. me of the printers had worked

e for decades. They were on the e of retirement anyway, and forthcoming move to Neuilly, long with the introduction of an electronic system for putting out a newspaper, had saved them from staying on a bit longer in the cellars of the Trib. They would leave a few

120,000-franc (\$25,375 at the time) indemnity that was offered them as an inducement to leave the profession. They were ready to take on a new career and new challenges.

A few were to remain and learn the new electronic system, or, rather, part of it. Their honored trade

months earlier than planned.

had been transformed by the still incredible "cold type" electronics, a process in which a printer 't even get ink on his hands. And a small group of men, in their middle 50s, were to be sacrificed. There was no other word for ied in the folds of the Union Jack." it. No one could see the point of teaching them a new trade. They were offered no choice but one:

latter group. He had spent most of his working life at the Trib. He knew his job well, although he nev-

er spoke a word of English. But that didn't matter. When he set out behind the huge steel-slab covered table to work on Page One, to assemble the thousands of lines of lead type, the heavy stereotypes (that would reproduce photos) and the thick sticks of headlines into place, no one would have thought of advising him, in English or in

Robert's assignment was basic. All the typeset lines of lead on his part of the steel table (called the "stone") had to be fitted into the chase" (the metal frame that held the page) according to the "dummy" (the page layout prepared by

the editor). When stories didn't quite fit, Robert's hands would move in the direction of a solution, placing the lead like dominoes in the chase. Most often, the editor, on the other side of the "stone," would simply

ned his approval. Robert's language was one of experience, artistry and style. He was last moment, one of the veteran appreciated and liked by the other printers and the editors.

That he had to leave the Trib grieved them all. But the agreement signed with the union made no distinctions for spirit.

And so the spirit wasn't there of March, Linotypists, stereotypers man from Algeria with a lexicon of and compositors were spending as curses adequate to raise a dead much time at the Berri Bar next camel. door as they did at their machines.

strong ideas about the honor of the never forgot that work was theoretcraft and the respect it deserved. The last edition at the Rue de resisted. And he worked out his Berri came out almost by miracle, resistance in stimulating Arabic as and it was midwifed by Robert De- he aligned his columns with unfailroghel. (The wake started long be- ing instinct.

7.

1]

Robert kept his head.)

The wake, or party, turned even livelier after that last edition closed. For a time it seemed that just about everyone who'd ever put in time at the Berri plant, where the paper had been produced since 1930, showed up.

And as the affair finally broke

up, Robert asked that he be given the American flag that had flown over the Trib building. Editor Buddy Weiss handed it to him and gave him a warm embrace.

Robert wrapped the flag around his waist so that the revelers would not try to shred it for souvenirs. Then he walked out into the street. out of the Herald Tribune, out of

the printing trade and out of work That was the last night that the Others had opted for the Trib was produced with "hot lead." Two days later, the page turned. Hot lead cooled into electronics. Within three months, Robert was dead of a heart attack, His coffin was covered by the flag that

had flown at the Rue de Berri. In an error that drew embar rassed laughter at his funeral, the effect of Old Glory on the coffin was made easier to bear when the priest thought it a good idea to proclaim that "Robert had so loved the Herald Tribune that he would have wanted it that way, to be but-

But over that March weekend the International Herald Tribune entered a new world. Left behind was the cavern of memories: the Robert Devoghel was one of this printer's ink, the ancient typewriters, the reek of melting lead. These were replaced by bright fluorescent lights, high-tech work spaces, silent hallways and the mulfled clicks

made by electronic keyboards. Now printers in name only (they'd been deprived of the traditional tooks of their trade - the Linotypes, galley proofs, proof-brushes and lead), the workers turned to their new tasks of cutting long strips of word-speckled paper into column sizes and pasting them came pages as articles, headlines, photos and captions were placed according to the editorial layouts.

The new system, for most of those who survived the change and all of those who were to join them trade linked to the old. And slowly, and with some diffi-

culty, the spirit came back to the composing room of the Trib. René was named foreman almost immediately after the change. During the confusion that permeated the move from the Rue de Berri he had nearly lost his job. Then, at the printers decided that the time had

another trade and accepted the 120,000-franc indemnity, leaving the spot to René, with his manner of jovial severity. Severity was just what was need-

come for him to try his luck at

But not Robert. He may have tional process of putting together a had some very good reasons to be page that Roland didn't know, and angry with what was about to happen to him, but he also had very into the new techniques. But he ically tiring and thus had to be

Editor Pye Chamberlain (left) watches Paul Krausch (right) and other printers, late '40s.

And there was another Roland, known, for the most obvious reason, as Petit Roland. An intellectual, an artist and a multilingual Linotypist, Petit Roland took deep easure in pointing out to Englishspeaking editors the spelling errors they'd made. He spoke and wrote French and English, Italian, Spanish and Greek."

Then there was Roger, another unusual man. He had been an excellent Linotypist at the Rue de Berri but found no stimulus in becoming a "phototypomonteur" at Neuilly. And, from being a source of fun in the old composing room, he became the butt of jokes in the

A list of the hundreds of printers who have spent part of their lives at this newspaper would be almost impossible to compile accurately. Only a few current composing room hands can recognize the faces in the photos on the walls, though those men just a few years ago assembled the pages that orna-mented newsstands around the

Doudou, for instance, was dubbed the Senator of Page Two. He retired years ago and not many now in the composing room would recognize him. But in many memories he still stands as the very best at putting together his beloved Page Two. Why this page?

cause it was was the "jump" where all the stories that didn't end on Page One would conclude. This was almost always the last page to be locked up for the presses and there could be no nonsense, no time wasted in putting it together. It took discipline and a strong sense of the metier to move fast and well.

typists. When he was on duty, he ouldn't allow anyone else to cast the photo captions. These are always "justified" at the Trib, which is to say that they must fill out completely the allotted space beneath the photos. And this was not always an easy task.

Mathieu would handle the fine spaces and the spacebands with the mastery of an artist at his easel. And if he was forced to ask the editors for guidance, his frustrated groans were memorable.

Mathien loved the Trib. Every-body knew that. When he retired he As union delegate, he was the received an imposingly official letter signed by the then-owner of the Trib, John Hay Whitney, congratulating him on his devotion and thanking him for the excellence of his work well done.

The letter, as it happened, was a friendly practical joke concocted by his colleagues. But never mind. thieu treasured it, particularly the details about the spacing of

It was Paul who put the black borders around Page One when John F. Kennedy was killed, and he worked with speed and efficiency that night when all were in a state of shock. He later became foreman,

Archambault

Archambault realized that quality could only be achieved by supechance to assess the high quality of the Paris Times staff when that paper, a victim of the stock market crash, gave up the ghost and Tom Crane came to us; he was one of

Our only real competitor was the Herald, and with it the battle was ferocious. It was a case of knockdown and drag-out journalism, with no holds barred. I fear, that as a newer, brasher, livelier paper, we were less inhibited by scruples and accordingly delivered more low blows than the Herald, which, as belitted so venerable a publication. was more decorous. That must have been the quality that inspired Ezra Pound, in his frequent postcards to me, to describe it regu "the dead-and-stuffed New

York Herald." We occasionally shocked it. One night, Larry Hills, the Herald director, burst into his city room purplefaced, waving above his head a copy of the Paris Edition fresh from the press. "They're crazy at the Tribune," he screamed. They're stark, staring mad! They've put the word 'bordel' in a headline!" Well, so we had: This institution had been the subject of discussion at a committee meeting of the League of Nations, a respectable source if there ever was one. But "bordello" was a hot word in those days, in French as in English. Our own printers had boggled at setting it in type until we convinced them that it meant something else Our light-hearted headlines (one

who had been robbed of the gold fillings in his teeth, read, "Thar's Gold in Them Thar Mountins") would surprise nobody today, but the Herald felt that they stamped us as too frivolous to be entrusted with the sacred role of instructing

In our competition with the Herald, the areas on which we concentrated were determined by our special function of catering to the that we could not possibly get the the 20s, reported for several organi-interests of Americans living story, it decided to hold it for the zations in later years and wrote sevabroad which were not served by the European press. On the basic contents of any paper, the news in general, we ran neck and neck despite the disparity in the amount of news we received from our parent papers, except that the Herald had lishing it first, and never used it.

It may have been Dickson who was the author of one of the bizarre incidents in the story of the running warfare between the two papers. It was in any case some us, and shortly afterward ran down he had been accustomed to calling, that of the Herald. Thus was evened the accounts between us, for the London wire from the Chibalancing a slightly dirty trick of ours that occurred some weeks earand I noticed from the slot, with mild curiosity, that after apparently getting his number he said nothing into the phone. Instead he pulled a few sheets of copy paper toward him and began writing industriously. A few minutes later he hung up, still without having spoken, and favored me with one of his slow, broad grins.

"Must have been some kind of mix-up in the Herald's telephone lines," he said. "I heard Lee Dickson telling the desk that he had a I remember, on a story about a man hot exclusive story that we couldn't possibly learn about."

He pushed the copy paper over. "Here's Lee's exclusive story," he sively yesterday by the Chicago

explained.

We put the story on our front page. Dickson had not been exaggerating - it was a hot story. But it was also a story that would keep. The Herald had a tight paper that night and plenty of news for the front page; since it was convinced next day, thus assuring itself of at eral books, notably on French cul-least one good headline on Page sine, as well. He wrote on food for the One. We scooped the Herald on its IHT from the '60s until his death in own story, not only for that day but forever. The Herald felt we had killed the story for them by pub-

Tribune, there were four En- basic background of a news agency disposed of was: "Where did you,

One of the unkindest blows we

ever delivered to the Herald was, I

am afraid, my fault. It had printed

a photograph showing a crowd run-

ning from soldiers who were firing into it, under the headline: "Bread Riots in Moscow," with a caption reporting that starving citizens had rebelled against the Soviet govern-ment and had been dispersed bloodily by the army. The picture looked familiar to me. I dug into my books and found it, the frontispiece of Arno Dosch-Fleurot's Through War to Revolution." It had been taken a decade earlier, and had been sold to the unsuspecting Herald by an unscrupulous photo agency. We ran the picture the next day, headed: "Scoop of the Century," reprinting the Herald's description of it, followed by the correct one. For weeks afterward. Eric Hawkins, then my opposite number on the Herald, never ran into me without shaking his head reproachfully and adding. "Not cricket, old boy, not cricket."

Not long afterward we gave the can sports news, for which there

Herald two chances in rapid sucwas no other source in Europe than
cession to catch us mislabeling cession to catch us mislabeling photographs. One of the two misoutdistanced us on this, too, since it captioned photographs was alleged received more cable, but not as to be a wedding scene, and there was indeed a couple of marriageable age in it, but they seemed to have put off the ceremony for a considerable time since they were nearly submerged by a brood of children of assorted ages. The other picture, described as being that of a forest fire, was devoid of flames but news of the day such articles as had not been outdated, clipped from taken refuge on the roof of its the Chicago Tribune when it house, which was floating downstream on floodwaters.

Both of these errors occurred for the same reason: We kept a bank of pictures of various dimensions always on hand, ready for use when we had a hole to fill. The metallic cuts and captions

> were tied together but sometimes loose. Our printers, who knew no English, had fitted captions to pictures not by content but by size. The Herald refrained from calling attention to our bloopers. Perhaps the op-position hadn't noticed, or per-haps it felt that to mention them wouldn't have been cricket.

Yet another missed opportunity came on Jan. 10, 1928. Writer. had been at the

point of death for several days and I had written a long obituary article about him and had it put into type, ready to go into the paper in case news of his death reached us close to press time.

It was indeed just on our deadgalley proofs of Le Matin, a French daily with which we had an exchange agreement, and I found a death. I had barely time to write a nouncing it, tear open the front page and fill its first column with the Hardy obituary.

When I entered the city room the closest friend on the Herald, quit next evening, the city editor with him, giving us a first-rate growled at me: "Where'd you get the idea Thomas Hardy is dead?" "It's in Le Matin," I said.

He picked up a copy of that newspaper and tossed it to me. "Find it," he challenged. I couldn't. It was clear what had who had shifted from the Herald to happened: Le Matin had composed an erroneous story, had dis-

a good story that he telephoned to covered the mistake and had killed the paper — unfortunately, since it. There was nothing in our agree-he had a slight load on at the time, ment with them that required renot to our number, but to the one porting such details to the other I waited with some apprehension

I guiped and went on with my reading of the wire. The message continued: "TWO THOMAS HARDY DIED TONIGHT AT HIS SUS-

SEX HOME." I located a photo of the writer from the files and printed it along with this caption: "Thomas Hardy, the illustrious British novelist whose death was reported exclu-

I was grateful to Hardy. If he had delayed his departure 24 hours longer, the Herald could have clobbered us.

The author began his career as an American journalist in Paris with the Chicago Tribune's French edition in 1982. This article is reprinted from his book The Paris Edition, pub-lished in June 1987 by North Point Press, Berkeley, California.

Hawkins of the Herald: An Englishman in Paris

By R. P. Harriss

HE most prominent and longest-serving managing editor in the Paris Herald's history was Eric Haw-kins, who held that post from 1924 to 1960. Useful portraits of Hawkins can be found in books now out of print. One is by Al Laney, in "Paris Herald - The Incredible Newspaper," and another by Hawkins himself, in collaboration with Robert N. Sturdevant. Here, I offer my own memories, based on close daily contact when he was my demanding boss and I a young journalist. Hawkins was an extraordinarily capable managing editor.

Oh yes, I know that some of the American newspapermen

who worked under him would have liked to "punch that little Limey S.O.B." I have heard them say it, but never to his face, perhaps because Hawkins had been a boxer in his youth and was still in good trim. Or because he was usually dead right.

When I knew him in the 1930s Hawkins was fairly slim, neatly conservative in dress, and somewhat formal in manner. He seemed to have been destined for a career in journalism: Both his father and his grandfather had been reporters on the Times of London, and his father had been a sic critic as well.

When Eric was still a child, his father died. The widow took him and his brothers to Paris, where the Times pension would stretch a bit further. He attended French schools, and so it was that although he was British-born, he grew up culturally French and acutely streetwise.

Thoroughly bilingual, he was onto the latest argot but spoke perfect French with a clear Parisian accent. He knew the intricacies of Paris better than anyone else at the Herald and as well, I think, as anyone on any other Paris daily.

in my time, there were always a few anti-Hawkins anecdotes floating around, notably one that alleged that, being British, he didn't really understand American slang. Supposedly, he had changed a current American slang phrase — so's your old man" — to read, "your father is, also." The SULL YOU SEW ALOUS

On the contrary, he was linguistically keen. He excelled at spotting galfes by young reporters trying to show off their command of French. And he once saved me from a lapse that would have gotten us lampooned in London.

at least, "burn" meant backside.

I had written a feature story about a female member of the British royal household who was an entirusiastic amateur dance-band drummer, and I mimed her drumming ono-

matopoeically by typing "bumpity, trumpity, bumpity BUM." He killed the line, explaining that, in British English Though he was autocratic, he was almost invariably fair. Perhaps his greatest value to the paper lay in his contacts at many levels of French life, and his ability to cope swiftly with any crisis. For example, he saved the Herald from

of the brand-new Rue de Berri building, by hostling the type

Eric Hawkins, the managing editor for 36 years.

forms into taxicabs at 3 A.M. and rushing them to the old Rue du Louvre plant. There they were run off on the ancient flat-bed press abandoned in the move.

We staffers half-seriously compared that feat to General Gallieni's maneuver in rushing up reinforcements by taxicab to the Battle of the Marne. As an example of Hawkins's way of directing a big news

story. I cite the afternoon of May 6, 1932, when an assassin shot President Paul Doumer at a book sale for war veterans in the Rue Berryer in central Paris. My part in the coverage came by pure chance. I had started to the Herald office early to see if a check had arrived from America for a short story that I had sold - I was

moonlighting on magazine work and writing a first novel in my spare time. As I emerged from the Metro and started

walking toward the Herald Building in the Rue de Berri, I saw police and military forces gathering. I followed. When I got as near the center of action as my press credentials would take me, a policemen shouted: "Vous êtes de la presse? - alors, passez!" - and he stiff-armed me in the face. But a police lieutenant did say there had been an attempt on the president's life. So I hot-footed it to the Herald. There was Hawkins at his desk, with two telephones, missing an issue, when the presses fouled up at the opening alternately talking English at one and rapid-fire French at the other. Ever-resourceful, he had placed one of his French

tipsters at the presidential gathering and thus got a first evewitness report.

Without wasting a word he told me, "Doumer's dying get a statement from Pershing," and I was off to the Hotel Crillon where General John J. Pershing was then a guest of France. Pershing was a close friend of Doumer, who was a French national hero. When I broke the news, Pershing was shaken. He spoke

feelingly of his friend, and at some length, but when I spoke of a statement for publication he said he was too upset to collect his thoughts. I had been scribbling down what he said, and I showed it to him. He put on his glasses, made one small change, then signed it and handed it back, thanking me and saying I had got down just about what he wanted to say. Back at the Herald, assembled staffers organized by Hawkins now were tapping out the main story and sidebars of how a mad Russian emigre named Gorgouloff had entered the receiving line at the Hotel Salomon de Rothschild. This, together with ancillary features such as mine, would make

the Herald coverage outstanding — thanks in large part to Hawkins's speed, foresight and unrivaled sense of drama. Donner lingered until the next day before succumbing. He was given a magnificent state funeral, with a procession from the Arc de Triomphe to the Panthéon in what was said

to be Napoleon's carafalque. Pershing, the sole U.S. representative, sat in the first carriage beside Doumer's widow. The assassin was duly tried, convicted and guillotined. Hawkins was not much given to praise, but I remember with satisfaction that he had a word of congratulation for

Later on, when I was taking a leave to visit the United

States, he said: "Remember, we expect you back." As it turned out, I was never to return, except on visits, but it cheers me to recall that Hawkins wanted me on the staff. The editorial staff paid a tribute to Hawkins in 1969 with a special 80th birthday edition. The front page was devoted to Hawkins: childhood photos, a recent portrait and congratulatory messages from friends all over the world. The lead story, written by columnist Dick Rorabach under the nom de phane of James Gordon Bennett Jr., reported that "the world prepared today to celebrate the 80th birthday of Eric Hawkins, which under a recently declared devaluation turns out

And the late Harry Bachr, the New York edition's chief editorial writer, had this to say: "There is not even the shadow of an 'if' about the affection which staffers hold for him, and that affection is as durable as Hawkins himself."

The author of this story was a reporter and editor for the Paris Herald from 1929 to 1933, when he returned to the States to work for the Baltimore Sun. He has published many short stories, essays and a best-selling novel and now, in retirement, contributes to the Sun's editorial pages. This article appeared in different form on May 2, 1987, as a Centennial column.

Big Investors Shoot Down Some High-Flying Shares

WALL STREET WATCH

By LAWRENCE J. DE MARIA

New York Times Service

EW YORK — While the stock market seems to be holding its own, some individual issues have taken stunning drubbings in recent weeks. The most dramatic carnage has occurred among small over-the-counter stocks that have soared in speculative frenzies, aided and abetted, in some cases, by brokerage hype and squeezes on short-sellers.

In a couple of cases, the falls from grace have been spectacular and swift enough to prompt regulatory scrutiny. But the roll call of futility includes some major names as well, all the way up to International Business Machines Corp.

Some market analysts say individual stock volatility is indica

tive of a general speculative froth that is dangerous. And Stocks with high

by many criteria, stocks today are at levels that in the past would have had investors bailing out. When the Dow Jones industrial average reached its high of 2,722.42 on Aug. 25, for example, stocks on the

New York Stock Exchange were selling at an average 23 times earnings. The recent market correction has trimmed that figure a bit, but even now the stocks in the Standard & Poor's 400 index of industrial companies are selling at about three times book value, the highest level since World War IL

P/Es have not

survived poor

earnings.

One of the most precipitous plunges in recent days was in the stock of The Gap Inc., the clothing retailer. On Aug. 24, The Gap hit a yearly high of 77% on the New York Stock Exchange. In mid-September, the company's president was quoted as saying that merchandise costs were mounting. That candid assessment was followed by lower earnings estimates from analysts and reports that a major Gap unit, Banana Republic, was slipping. It proved too much for fickle institutional investors.

The Gap's stock closed Wednesday at 381/4; it had lost 7 and 8 points on some days during its slide to around 36.

HE GAP debacle came hard on the heels of Telex's. Telex, which earlier this year had topped 101, is now at 51% on the NYSE — and that is after a recent small rally. On Sept. 14 alone, the stock plunged 13½, to 51½. The company had said earnings for the quarter and the fiscal year would be less than

In both cases, the high price-earnings multiples the stocks were carrying did not survive disappointing earnings prospects.

This approach by institutional investors apparently extends even to IBM, now trading just above 150, or 25 points below the

year's high, largely because of competition from Digital Equipment Corp. But not all the stock slumps can be traced to bailouts by disgruntled institutional investors. The stock of Home Shopping Network has crumbled to 121/2 from 22% since June on the American Stock Exchange. Its

management contends that short-sellers have manipulated the

stock and spread rumors of financial difficulties. The company has asked for a Securities and Exchange Commission inquiry. Short-sellers, who sell borrowed stock in hope of buying profitably at lower levels to repay the borrowings, apparently were also involved in two of the most spectacular over-thecounter free falls in recent memory. These involved IGI, a New Jersey pharmaceutical company, and Professional Agricultural Management, another small company with slim earnings. The SEC and the National Association of Securities Dealers are

looking into the recent IGI price moves Often, when investors sell a stock short, the price keeps rising If holders do not sell, the resulting short squeeze on the frantic bidder pushes prices higher, sometimes to 200 times earnings.

"It's nothing but a big crap game," said a Bear, Steams & Co. trader. "People are betting on future earnings of these companies, ning to be tru

TSB Talks With Hill Samuel

Takeover Plans Are Reported

By Warren Getler International Herald Tribune

LONDON - TSB Group PLC, the British financial services conglomerate that went public one year ago, is holding takeover talks with Hill Samuel Group PLC, the British merchant bank, a TSB

source said Thursday.
Hill Samuel's shares were so pended Thursday morning at 705 pence on the London Stock Exchange at the company's request, pending an announcement, expected Friday. The suspension price values Hill Samuel's 95.9 million shares outstanding at £677 million (\$1.1 billion), fully diluted.

Analysts expect that TSB is negotiating to purchase the entire Hill Samuel group, rather than parts of the company. The TSB source de-clined to provide details.

Hill Samuel has been a takeover target for months and the group's shares have climbed on speculative

In August, talks collapsed be-tween Union Bank of Switzerland and Hill Samuel over a prospective merger when the Swiss bank told Hill Samuel that it only wanted part of the British group.

Saatchi & Saatchi PLC, the giant advertising group, subsequently entered the fray, but its unsolicited £750 million offer for the entire company last month was rejected

Barclays Bank PLC is said to have had informal talks about acquiring Hill Samuel's corporate finance arm, while Morgan Stanley Group Inc., the U.S. investment bank, is believed to have discussed with Hill Samuel the purchase of the British group's stockbrokers.

TSB, should it make an offer for the full group, might later seek to dispose of some of Hill Samuel's divisions, analysts said.

TSB Group is a holding company for commercial banks, a creditcard company and an insurance agent. Its shares closed Thursday at 137 pence, down from 137.50.

Getting Out of London, in a Hurry New City Airport Aspires to Bring the Continent Closer

By Warren Getler

short runways, is built by Canada's De Havilland.

International Herald Tribune

LONDON — A London banker leaves his office in the City and flags a cab. Within 15 minutes, if traffic cooperates, the cab has covered the six miles to London City Airport. And, perhaps two and a half hours after leaving the office, he is doing business in Paris, having barely worked up a sweat.

He has saved anywhere from 45 minutes to two hours from the days when he used Gatwick or Heathrow airports well outside London — enough time to allow him comfortably to make the return

trip the same night.
In today's "time-is-money" culture, the new London City Airport — the first within London's boundaries — aspires to make the difference be-tween opportunities missed and deals clinched for hurried European businessmen.

"We have to show business passengers that it is going to be possible to do a half-day in Paris," said Philip Beck, chairman of John Mowlem & Co., the construction company that is both builder and operator of the airport. The airport, scheduled to open to commercial

traffic on Oct. 26, is nestled on an obsolete stretch of wharf between the Royal Albert Dock and the King George V Dock on the eastern edge of It is in a bleak, battered area, but a big redevel-

opment project is under way. Proximity to the City, London's fast-expanding square-mile financial district where 300,000 people work, is its This, developers say, will make City Airport an

invaluable time-saver for businessmen traveling between London and some of the big European financial centers: Paris and Brussels to begin with, but later Amsterdam, Düsseldorf, Rotterdam and The conversion of the rusted-out dock area into

slick business-travelers STOLport — for short take-off and landing airport — is central to a multibillion-dollar overhaul of the greater Dock-

Promoters say it will be Europe's largest property redevelopment package ever.

Set for completion in 1997, the Docklands project is to include a housing, shopping and recreation complex surrounding the airport that planners estimate will cost £750 million (\$1.23)

Building an airport here was not easy. Civil Aviation Anthority and environmental officials balked at first. But they were swayed by the features of the plane that will use the airport: the Dash 7, a 50-seat turboprop aircraft.

The Dash 7, built by De Havilland of Canada, a Boeing Co. subsidiary, is a super-quiet craft able to use a short runway like the 2,750-foot (840-meter) strip at London City Airport.

Service begins to Paris, Brussels and Plymouth, on England's southern shore, when the airport opens this month. Service to Amsterdam is to gin in January. Planners estimate that 300,000 passengers will

Plessey and GEC Plan to Merge **Telecom Units**

LONDON - Plessey Co. and Britain's General Electric Co. plan to combine their worldwide telecommunications businesses to create a joint venture with annual sales of more than £1.2 billion (\$1.9 billion), the two companies said

They said that detailed negotiations still lay ahead but that they envisaged a 50-50 joint venture with assets of about £600 million. The new company would cover public switching, transmission, private switching, other telecommuni-cations and data products and ancillary services.

On the London Stock Exchange, Plessey shares closed Thursday up 2 pence from Wednesday, at 221. General Electric closed at 231, up from 226 Wednesday.

GEC, which has no connection with General Electric Co. of the United States, tried last year to buy Plessey for £1.2 billion, but the government Monopolies and Mergers Commission overwhelmingly re-

jected the transaction.

GEC is Britain's largest manufacturing group and Plessey its main British rival in telecommunications and defense electronics. It was not immediately known whether the latest proposal would have to go to the monopolies panel. The announcement Thursday

followed long exploratory talks on ways to exploit the present era of expanding satellite and cable links. a lucrative business telecommunications business, and fierce comnetition, the companies said. The two said they planned to

seek early meetings with British Telecommunications PLC, Cable & Wireless PLC and the British government.

Plessey and GEC said they had also been holding talks on collabo-ration on promoting their joint Sys-tem X switching system. Last month Plessey attributed a

26.1 percent drop in operating profit in the first three months of 1987 largely to delays between order and payment for System X. In May, Plessey reported pretax profit of £184.2 million, up 8.2 percent, for the 53 weeks to April 3.

Though revenue slipped to £1.43

pany said, profit margins rose to 11.6 percent from 11.1 percent. Telecommunications earnings were the largest share of operating profit, up 18.4 percent at £83.7 million. GEC reported in July that its fiscal 1986 pretax profit was £668 million, off almost 5 percent from 1985's £701 million, while revenue

was unchanged at £5.25 billion. When the monopolies commis sion rejected an outright merger in August 1986. Plessey welcomed the decision.

CBS Studying What to Do With Records Group

Compiled by Our Staff From Dispatches NEW YORK — CBS Inc. said Thursday it was studying how it can best realize the value of its records group for compa-

The CBS board met Thursday as rumors circulated that it would consider whether to sell the records group to Sony Corp. Analysts have said the unit

could command a price of about \$2 billion. The board said it would pursue the issue of what to do with the records subsidiary at a meeting later this month. But the company, in a brief state-ment, did not address directly

the reports of Sony's interest. "CBS is continuing to study several courses of action with respect to its records group designed to maximize the short and long-term values of its shareholders," CBS said.

Industry sources said CBS may consider a spin-off of the group to its shareholders as an alternative to an outright sale.

CBS stock jumped \$9.75 a share to \$225.75 Wednesday on the New York Stock Exchange, but after a delayed opening Thursday, CBS was off \$5 a share at the close of trading. (AP, Reuters)

Factory Orders Fell 1.7% in U.S. in Month

WASHINGTON - Orders to U.S. factories for manufactured

goods fell 1.7 percent in August,

the government said Thursday. It was the first drop in seven months. The Commerce Department said orders for durable and nondurable goods decreased to \$202.5 billion in August following a gain of 0.3 percent in July.

Construction spending, however, shot up 1.6 percent in August, for the biggest increase in four months, the department said.

The July figure for manufacnured goods was revised from a month earlier, when the govern-ment estimated that factory orders had fallen 0.2 percent. The weak increase in July and the August decline were seen as a

disappointing but temporary setback for manufacturers. Analysis said they still believed the general trend for the sector was toward improving production figures, based on the fact that U.S. export sales are growing again after years of declining because of the high value of the dollar.

Orders for military equipment fell a second consecutive month, off 3.8 percent in August to \$9.6 billion. Without the weakness in this sector, total factory orders would still have been down 1.6 percent, for the first decline in the

civilian category since January.

The key category of nonmilitary capital goods, considered a good barometer of business investment plans, fell 8.1 percent in August.

est rates have forced busines cut back on expansion projects. New orders for durable goods, items expected to last three or more years, fell 2.7 percent. This was a slight revision from an advance report last week which put the de-

cline at 3.1 percent.
Orders for nondurable goods fell 0.6 percent in August, reversing a rise of 0.6 percent in July. Some of the largest declines were in textiles and paper products.

By industry, the biggest decline was in the transportation sector, where orders fell 3.9 percent to \$26.9 billion, with a decrease in demand for aircraft more than offsetting an increase in orders for motor vehicles.

The Commerce Department said construction projects were being al rate of \$399.6 billion in August. It was the biggest advance since a 2 percent rise in April and followed

declines of 0.1 percent in July The strength came in part from revived spending on apartment construction, which rose 6 percent to an annual rate of \$24.9 billion. But even with the increase, apartment construction was 19 percen below where it was a year ago.

For all residential construction, spending rose 1.4 percent to an annual rate of \$200.6 billion. The strength came from apartments, as single-family homes were unchanged in August.

Nonresidential construction rose

2.6 percent in August from the July spending level to an annual rate of Analysts have said that rising inter- cent below the level of a year ago.

Recovery Remains Slow, Pretoria Says

PRETORIA — South Africa's recovery from recession continued to slow in the second quarter of 1987, the Reserve Bank said Thursday in

its latest quarterly report.

The bank reported that second-quarter gross domestic product grew at a provisional annual rate of 1.5 percent, down from 2 percent in the first quarter and about 3.5 percent in the second half of 1986.

hair of 1986.

The bank also reported a 55 percent drop in the current account surplus from a record 12.9 billion rands (\$5.76 billion) in the fourth quarter of last year to 5.8 billion rands in the second quarter. This compares with 7.2 billion rands in the first quarter of this year.

The besidese was due to a "faith large.

The shrinkage was due to a "fairly large decline" of net gold exports and a continuing rise in the value of merchandise imports, the

bank said.

The value of net gold exports declined from a record high of 18.4 billion rands in the first quarter to 17 billion in the second quarter.

"This decline was more than fully accounted for by a decline in the volume of gold production, which in turn was due to a further lowering of the grade of ore mined," the bank said.

The annual inflation rate dropped from a high of nearly 21 percent in January 1986 to

high of nearly 21 percent in January 1986 to 16.3 percent in August. The broadly defined M-3 money supply increased slowly, remaining well below the government's target rate, the bank said.

It said it had maintained "moderately expan-

it said it had maintained "moderately expan-sionary" monetary policies so far this year be-cause of the limited vigor of the economic upswing, the strength of the current account and a sluggish growth of bank credit and money supply. The bank said it expected little change in interest rates.

France's 2 Futures Markets To Merge Under One Authority

PARIS - The two French futures markets, in financial instruments and commodities, are to be merged under the authority of the MATIF financial futures supervisory body, Finance Minister Edouard Balladur said Thursday. The result will be that brokers currently

The result will be that brokers currently working exclusively in the commodities futures market will be able to engage in business on the MATIF linancial futures market, and vice versa. Current regulations forbid this. Regulations applying to each market exclusively are to be harmonized under legislation expected to be introduced soon to the French National Assembly.

bly.
"The unification of the French futures markets, whether they be financial or commodity. under one institutional body is an important element to make Paris a great international financial center," the minister said.

Domestic Japanese Car Sales Rise Agence France-Presse

TOKYO - Domestic sales of Japanese cars

TOKYO — Domestic sales of Japanese cars rose 8.7 percent in September over September 1986 to 380,000 units, reflecting expanding demand, industry sources said Thursday.

They said the total of Japanese cars sold domestically in the first half of this fiscal year was 2.06 million, up 5 percent from the first half of the previous fiscal year, which starts in April.

ABF Bids £767 Million for Berisford

Foods PLC made an offer Thursday to acquire S&W Berisford PLC that valued the diversified group's common stock at £767 million (\$1.2 billion). Berisford's board immediately rejected the bid of 400 pence a

many strengths and prospects of "an opportunist attempt to exploit Berisford."

ABF said it was also offering 100 on its rejection, to a high of 429 on the London Stock Exchange. The percent Berisford preference share. stock closed 78 pence higher, at Berisford's chairman, E.S. Mar- 427. ABF shares closed 26.5 pence gulies, called the offer totally un- higher at 370.

Henry Ansbacher Rights Issue Is Planned for £69 Million

LONDON — Henry Ansbacher Holdings PLC, the British financial services group, said Thursday that it plans to raise about £69 million (\$112 million) with a rights issue of shares and convertible bonds. largely to boost the capital of its London merchant bank.

Ansbacher said that about £40 million would be invested in its merchant bank, Henry Ansbacher & Co., increasing its disclosed capital base to about £72 million. It said the bank was too small to compete effectively in an environment where profitability was increasingly dictated by the capacity to assume risks using a bank's own

The announcement follows moves by other British merchant banks to boister their capital, either through market offerings of by selling stakes to outsiders.

Ansbacher's shares closed unchanged at 105 pence Thursday on the London Stock Exchange. The company said it was issuing

GREENWICH. Connecticut

- American Brands Inc. said Thursday it plans to sell its Snnshine Biscuits and Pinkerton's security subsidiaries, saying they no longer fit its long-term

U.S. biscuit producer with sales of \$510 million in 1986. The operation, Humpty Dumpty Foods Ltd., will also be sold Pinkerton's Inc. of New York City, a guard and investigative service, posted sales of \$375

LONDON - Associated British ed, "We see no evidence that ABF stake in Berisford earlier this year, has any contribution to make to the saying it intended to hold it as a future growth of our business. The long-term investment. offer does not begin to reflect the Mr. Margulies called the offer

> Berisford." a minority stake acquired from pre-Berisford shares jumped on the viously unsuccessful bidders and to try and buy Berisford on the original announcement and again

keting and metal manufacturing and dealing. up to 42,3 million new ordinary shares and £35,2 million of 9 per-cent convertible bonds due in 1998. Earlier this year, the government blocked rival bids for British Sugar from Gruppo Ferruzzi of Italy and Tate & Lyle PLC after a three-way fight that began in 1986 and included an offer from Hillsdown Holdings PLC. In June, Berisford said it was making every possible attempt

packing, wool processing and mar-

to remain independent. Ansbacher said bond holders could convert their bonds into shares in May of the years 1988 TWA Says Icahn's Bid through 1998, receiving one share Is Being Reviewed

NEW YORK - Trans World Airlines Inc. said Thursday that it hold 72.7 percent of Ansbacher have agreed to take up their rights in full, as have the firm's directors, did not know whether its chairman Carl C. Icahn, would complete his previously announced bid to take

the company said. The four companies are Pargesa Holding SA of Switzerland, Groupe Bruxelles Lambert SA of Belgium, Banque Internationale à Luxembourg SA mable to determine whether the transaction would be completed or Robert Maxwell, the British whether it would be altered or withdrawn. The offer calls for share-holders to receive \$20 a share and will show positive results in the first publisher, raised his stake in Ansbacher last month to 9.17 percent from less than 5 percent, through \$20 a share in debt securities. It months of next year, ASEA's chair-one of his publishing subsidiaries. values the company at \$1.2 billion. man, Curt Nicolin, said.

Some Foreigners May Have to Sell Rolls-Royce Stock

The Associated Press

LONDON - Rolls-Royce PLC, the recently privatized aircraft engine maker, has said that some foreign investors may have to sell their shares because foreigners have acquired 21 percent of the company's shares, exceeding the government-set limit of 15 percent.

When Rolls-Royce shares were sold in May the government set a ceiling to avoid having too much control of the company overseas. The company makes engines for military as well as commercial aircraft.

News reports said Japanese interest had accounted for a large proportion of the foreign investment. The company said Wednesday it determined the high level of foreign shareholders by processing payments for the final installment of the share issue, due Sept. 23.

It said any foreign investors who paid the installment after Sept. 14 would probably be forced to sell their shares.

Brierley Posts Higher Profit, Offers Rights, Bonus Issues

WELLINGTON, New Zealand year, Mr. Collins said.

- Brierley Investments Ltd. said Thursday that its net profit for the to consolidate the company's posi-year to June 30 rose 75 percent to tion and to build on its offshore 603.86 million New Zealand dollars (\$394 million) against 345.28 million dollars in the corresponding period last year.

The company announced a 1-for-10 rights issue of shares and a 1for-4 bonus issue.

The financial group said revenue reached 7.15 billion dollars against 3.33 billion dollars last year. Brierley declared a final ordinary dividend of 5.5 cents, unchanged from Compagnie du Midi, is also bidlast year.

Brierley said its 1-for-10 rights take advantage of future investment opportunities. The issue was at 50 cents par value plus a premium of 1.50 dollars per share.

Paul Collins, Brierley's chief executive, said the rights issue was modest and he expected it to be well received. But analysts said ear-lier the issue would belp depress the market. Brierley has 155,000 local

STOCKHOLM — The merger of Sweden's ASEA AB and Swit-

months after the merger date - Jan. 1, 1988 - the benefits of fucolin said in an interview with a local newspaper published Thursday. He added that the merger was

already having a positive effect on the two groups' affairs.

When the merger was announced on Aug. 10, both companies said major restructuring would hamper results for some time, and declined to set a date for new the company to be profitable. Mr. Nicolin said that the merger

was proceeding according to plan. "We went into this deal with high hopes and nothing has happened to suggest they will be disappointed." Referring to ASEA's takeover of

a Norwegian electrical engineering group, in cooperation with Brown Boveri, Mr. Nicolin said: "The big thought of were thought of as a deal with Elektrisk Bureau AS would have been difficult both for technology and falling prices have contributed to explosive growth.

as ASEA Brown Boveri and will be the world's largest electrical engineering group with a turnover of 100 billion kronor (\$15.5 billion)

He said the next phase would be investment base. Only about 10 percent of the company's 1.12 billion shares are now held offshore. Among its bids to expand out-

side New Zealand, Brierley said it would proceed with its takeover offer for the British insurance group Equity & Law PLC. Mr. Collins denied reports his

company had made the bid only to gain a quick profit. The French financial group,

ding for Equity. Brierley increased its original issue to raise cash would allow it to 365 pence-a-share (\$2.28) cash offer for Equity to 450 pence on Tuesday in response to Midi's mixed cash and equity offer valued at 476 pence.

Midi's offer has since been devalued to around 440 pence by the fall in its share price from 1,363 francs (\$223) to 1,276 on Wednes-

Brierley owns 29.6 percent of Equity against Midi's approxi-mately 14 percent.

In reporting the company profits, Mr. Collins said Brierley will review its accounting policies for next year. He said the company wants to bring policies in line with accepted international standards.

But Mr. Collins said the compa-"I am convinced that just a few my will not be restating this year's profit according to international standards. "If we had, the profit sion will become evident," Mr. Ni- would have been 15 percent to 20 percent higher."

Broker Arrested In Los Angeles in Guinness Affair

LONDON - Scotland Yard on Thursday requested the extradition from the United States of Anthony K. Parnes, a London stockbroker who figured in the Guinness corporate scandal as an adviser to the exchairman. Ernest Saunders.

Mr. Parnes, according to Scotland Yard, was arrested by FBI agents Thursday on his arrival at Los Angeles international airport from Paris. The Fraud Squad division of

Britain's Metropolitan Police broker's arrest on charges of his having falsified accounts involving £3.4 million (\$5.5 million), Scotland Yard said. It said it was examining Mr.

Parnes's role in Guinness's takeover of Distillers Co. last year. The takeover is under govcrament investigation.

Out of Allegis, Ferris Returns To the Airways

CHICAGO - Richard Ferris, the former chairman of Allegis Corp., is back in the avia-

Mr. Ferris has teamed up with his friend Arnold Palmer, the professional golfer, and two other investors to buy a general aviation business in suburban Chicago. He resigned as Allegis chairman in June over the rejection of his plan to keep Allegis as an integrated travel company, rather than just the operator of United Airlines.

The investor group has agreed to buy George J. Priester Aviation Services Inc., a corporate aircraft services company, according to a spokesman for the Priester family. Terms of the sale were not disclosed.

Priester Aviation has annual revenues of \$40 million. Its operations include aircraft sales and maintenance, fueling and flight training. More than 400 planes are based at the two airports where it operates.

chairman and chief executive officer of Beneficial Insurance Group, a unit of Beneficial Corp. of Wil-

In Switzerland, the Door Is Shut to the *Deux Chevaux*

ZURICH — One of the automotive world's most popular ugly duck-lings has vanished from Swiss showrooms: The Citroen 2CV — the deux

chevoux - has fallen victim to Switzerland's toughened exhaust emission standards introduced Thursday. Under the stricter regulations, all new cars imported here must meet norms that are based on emissions standards used in the United States.

said Jörg Kistler, spokesman for the Swiss Justice Ministry. The new requirements in effect require new cars to be equipped with catalytic converters designed to reduce automobile exhaust gases. The government hopes the controls will cut emissions by about 90 percent. Most carmakers have responded by making catalytic converters stan-dard equipment on the 300,000 vehicles a year they ship to Switzerland, according to Roland Burkhardt, assistant director of the Swiss Autombile

Importers Union. Switzerland has no domestic auto industry. But not Citroen as far as the 2CV was concerned. It decided that the car, which was designed as a workhorse for poor farmers nearly 40 years ago but is now the subject of almost cult-like fan club attention, could not

accommodate the new technology under its existing body shell.

Converters would also have added more than 2,000 Swiss francs (\$1,300) to the car's standard 8,000 franc price, said a spokeswoman for Citroen, a unit of France's Pengeot SA. As a result, collectors and members of the Citroën 2CV fan clubs in

Switzerland snapped up the last available models before the ban on sales went into effect. None of the cars are left in stock here. Citroën samounced in March that it would end French production of the vehicle, shifting operations to Portugal. It cited the Swiss emission controls, and similar ones coming into effect in Austria.

business passengers

A text ride, currently the only direct link to the new airport, takes don airports to Paris by 1995, 15 15 to 30 minutes. It takes an hour for the trip from the City to Heathrow, 16 miles to the west, and long- percent of the 1.25 million-passener to Gatwick, 25 miles to the ger London-Amsterdam traffic.

The airport's proximity to the City is not its only selling point, and 717,000 flew between London said Mr. Beck, the construction and Brussels, including business company chairman.

He added, "This airport is designed to be hassle-free." It will offer a 30-minute check-in and two-minute boarding, and will feature a business center equipped with computer, phone, telex and But some potential users of the

airport are skeptical.
"I travel to Paris once every three

weeks, leaving on Friday and re-turning Sunday night," said a prop-erty analyst with Warburg Securities, a London stockbrokerage. "I might use the City airport if it is

But, he added, "My terror is coming home on Sunday night and having absolutely no taxa around or any other transport to take me

In November, a special bus link is to open between the new airport and Victoria train station in central London. A rail link to the airport is projects that 4.1 million air passen-gers will travel from London to supposed to be ready in two to Paris in 1995, of which 2.3 million

Last week, the Confederation of British Industry said the roads to and from the Docklands were "totally inadequate to meet the area's growing needs."

Mr. Beck acknowledged that lion will be on business. "the road infrastructure is pretty Mr. Beck said he expects his bad," saying that local government company to recoup its £32 million investment in three years, "when we should be handling up to 550,000 passengers annually." Some of those of course, he said, is lagging in its promise to build adequate roads to the airport.

A cabbie taking a journalist to the airport had trouble finding it. It lies at the end of a narrow, dusty "If they get the roads sorted out,

I think they'll be a serious competi-tor for the business market," said Richard Hannah, a transport industry analyst with Phillips & Drew, the London stockbrokers. But roads are not the only immeiate worry at City Airport. Much of what Mr. Beck de-

scribed on a tour of the airport had yet to be installed. Asked whether se was worried about meeting the Oct. 26 deadline, he retorted, "We'll be ready." Mowlem is no stranger to build-

Div. cps. belonging to non-residents of The Netherlands will ing airports under pressure. The construction group, Britain's fifth largest, was prime contractor to the British government in building a new Falkland Islands airport in the 18 months after the fighting ended be paid after deduction of an additional 15% U.S.A.-tax (= \$.195 = Dfls. ,39) with Dfls. 1,82 net. "We've been building LCA,

AMSTERDAM DEPOSITARY COMPANY N.V. which required a massive demoli-Amsterdam, 24th Soptember, 1987. tion effort, for 18 months and we're on schedule." Mr. Beck said.

(Continued from first finance page)

The airport's owners expect to "The limiting factor at City Airport be shuttled from London City Aircapture more than 9 percent of the port in the first year of operations. total projected 2.3 million busihandle around 1.1 million passenness-passenger market from Longers per annum, a very small part of the British pie when you compare it percent of the 824,000-passenger to Heathrow's 32 million passen London-Brussels market and 11 gers last year."

Ten daily round-trip flights between LCA and Charles De Gaulle In 1985, 2.42 million passengers airport in Paris are scheduled, three flew between London and Paris to Brussel's National airport and one to Plymouth.

Further routes, safely within and leisure travelers, according to Dash Ts 400 mile radius, are expected to be approved next year, Mowlem also expects a signifincluding Dusseldorf, the Channel Islands, Manchester and Rotter-

> rized to operate from the airport: Eurocity Express, a new venture whose parents include British Midland, the private carrier, and Brymon Airways, in which British Airways has a large minority stake. Sabena Belgian World Airlines, the Belgian national carrier, is of-

fering London-Brussels flights through Eurocity, and Air France will provide service via Brymon to Paris. Sabena, which already operates two Dash 7s and has two more on order, intends to offer its own services when its own aircraft are

Brymon will charge £100 for a standard one-way business-class fare to Paris, while Eurocity will charge £100 to Paris and £96 to

The fares are similar to those offered by major European carri-ers. But as Mr. Hannah noted: The projection for those flying to These two airlines are not competing on price. They're competing on vice and speed."

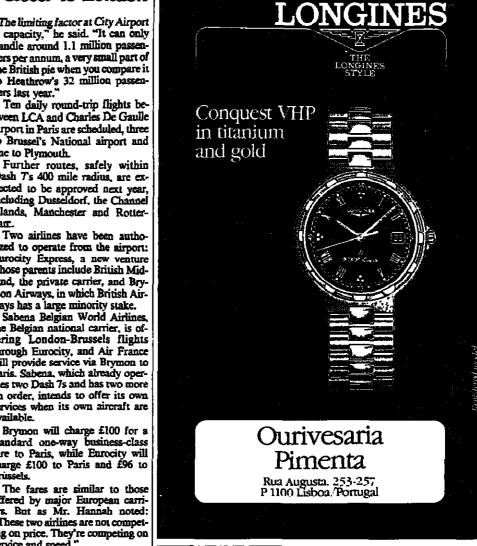

Mr. Beck would like to see British Aerospace PLC's four-engined 146 jet aircraft be granted permission by British aviation authorities to operate out of London City Airport. The BAe 146, said to be the quietest airplane in the world, can carry as many as 100 passengers. But LCA will never be a major competitor of the big airports, said Mr. Hannah of Phillips & Drew. "That certainly would boost business," he said.

Japan Puts Price On Intervention

TOKYO - The Bank of Japan bought nearly \$1 billion on exchange markets in September to moderate the dollar's fall against the yea, Finance Minis-

try sources said Thursday. The central bank repeatedly intervened in the Tokyo foreign exchange market in the first half of September, when the dollar was fluctuating around 141 yen, currency dealers said. The dollar moved between 140.45 and 146.85 yen during

The ministry announced Thursday that Japan's external reserves rose \$1.41 billion in September from August, to a record \$72.14 billion, including profit from managing reserves which usually ranges from \$200 million to \$400 million.

Australian Dollar Slides After Aide's Remark

SYDNEY - A sharp fall in the least four occasions in recent Australian dollar overnight sur-months, but the market treated prised foreign exchange market an- them all with scant regard. alysts, who said Thursday that the drop was an overreaction in a thin

The dollar has been shaky for some weeks on a combination of central bank selling, government changes in its property investment policy and a strengthening U.S.

dollar Analysts said the fall was triggered by remarks from John Button, the minister of industry, technology and commerce. He told U.S. journalists here that the Australian dollar was overvalued, reit-

erating his recent statements. Bob Edgar, the chief economist ton had made similar remarks on at

This time, he said, the comments were made after the close of the local market, in the context of lower interest rates and just after moves by the government to curb

foreign buying of property.

A spokesman for Mr. Button quoted the minister as saying, "For a variety of fundamental reasons, I still think the Australian dollar

won't go higher than it is now." Mr. Button said that from the point of view of industry the Australian dollar rate should be around 65 U.S. cents to 68 U.S. cents.

The Australian dollar opened on local markets at \$0.7112, after fall-dollar movements, and could be at

13% 10% 24% 19% 38% 17% 21% 32% 36%

pared with its close here on Wednesday of \$0.7235.

Warren Bird, chief economist for Lloyds Bank NZA Ltd., said the minister's comments created some uncertainty in a thin market, a situation that tends to put downward pressure on currencies.

Analysts said they had been surprised at the strength of the Australian dollar over the past few months, and unless there was a fundamental change in sentiment they gold as a monetary instrument.

ly underpinned at current levels. The Australian dollar should settle in the short to medium term between 70 U.S. cents and 73 U.S. cents, influenced primarily by U.S.

ASSESS: Baker's 'Basket' Plan Leaves a Tangle of Unanswered Questions

(Continued from Page 1)
price index is the best target for monetary policy until we can reform the monetary system itself." Mr. Baker appears to have been

fully aware that this would be the initial reaction to his plan. Admin-istration sources in Washington said that he has never before mentioned the use of gold in connection with exchange rates.

U.S. officials said Thursday that the Reagan administration has no intention of going back to the gold standard, which President Richard Nixon abandoned in 1971. Under the system, the dollar's value was linked to the price of gold.

The general puzzlement that greeted Mr. Baker's statement was a more appropriate reaction in the view of some administration officials. Mr. Baker's proposal left many questions unanswered, pre-cisely because many of its most important aspects remain to be worked out - including which other commodities would be included in the basket, and how importantly

each would be weighted. The details must now be discussed, not only with the other members of the Group of Seven, but also inside the Reagan adminis-tration itself, where the proposal had been "very tightly held." The precise working of the plan, assum-

ing it is acceptable to the other governments, might not be final-ized until the next seven-nation world economic summit, scheduled to be held in Canada next summer.

Nonetheless, many analysts speculating on how the idea might turn out in practice concluded Thursday that it might reduce rather than increase - the role of

That theory goes as follows: Governments watching the basket index might decide that commodity prices are rising too fast, risking an outburst of international inflation. To cool the pressure, they raise interest rates, which, in theory, would have the effect of raising the value of important currencies and

The result would be the exact opposite of a traditional gold stan- And some private economists condard. The dollar would go up as tend that commodity prices are not gold went down, and vice versa. By a very reliable guide to future inflagold went down, and vice versa. By putting gold in the basket, the Group of Seven would be treating

such as tin or cocoa. The main aim of the new index, which Mr. Baker carefully described as essentially an "analytical tool," would be to give the seven leading industrial nations a broad-

and exchange rate decisions. The indicators that they are currently using tend to reflect developments in their own economies rather than in the entire world. A similar index is already under consideration by the U.S. Federal Reserve, which supports the Baker proposal.

Not everyone will agree with the idea. Japan and West Germany may be reluctant to endorse the use of a new indicator that the United have a more direct impact on their

into expanding their economies at a proposal time of falling commodity prices.

tion in the first place. In this view, overreliance on the it more like any other commodity, index could deprive governments steady increase in commodity of flexibility in monetary policies.

Other analysts argue that gold is too fickle a metal to be included in a basket designed to measure inflationary pressures because of its susceptibility to shortages and specuer base for their economic policy lation.

> Much, however, would depend both on the weight assigned to gold in the basket and on the other commodities to be included. None of this has been discussed among the Group of Seven, much less decided.

Decisions on the list of commodities will be of vital importance to the developing nations that produce them — particularly if the Western nations' policies were to

reducing the value of the commod- States could use to pressure them prices as a result of Mr. Baker's

It is here that some U.S. officials see a key element of the whole plan. In addition to helping the G-7 countries coordinate their policies, they say, the hope is that use of the basket could serve to encourage a

prices that would help the developing countries to pay off their debts. That is one reason why the plan is expected to be strongly support-ed by France, which is seriously concerned at the plight of the least developed countries, and particularly its former colonies in Africa.

It is far from clear, however, whether a consensus exists among the G-7, or even in Washington, that commodity prices should start on a steadily upward, and potentially inflationary path. With his cryptic remarks, Mr. Baker may have started a much wider debate than the gold bugs imagine, and one that in the end they may not

Conable Sees Large World Bank Fund Rise

Compiled by Our Staff From Dispatches WASHINGTON - Barber B. sus was building among major industrial countries that increased funding for the lending agency should approach \$80 billion.

The range under discussion has been \$40 billion to \$80 billion. Mr. Conable said as the annual meeting of the World Bank and International Monetary Fund drew to a close that he thought countries were moving toward an increase at

the higher end. The increase is needed to help the bank raise its lending and also cover losses in the real value of its loans in the face of a nearly 50 percent depreciation of the value of

the dollar over the past two years, Mr. Conable suggested. The United States said last week

that it would back an increase in funding for the bank, which has Conable Jr., president of the World Bank, said Thursday that a consen-keep the Third World debt problem in hand.

> Treasury Secretary James A. Baker 3d has refused to say what figure the United States has in

mind for the increase. If no hitch develops, an increase could be in place by this time next year to supplement the bank's cur-

rent funding of almost \$95 billion, Mr. Conable said. He said negotiations on the increase should be completed by the

end of the year and submitted to Congress for approval of the U.S. share in early 1988.

Although Reagan administration officials have said approval of the increase could be difficult. Mr. Conable said, "There's no reason

why we can't make a strong case to Congress about it." The U.S. contribution to World Bank resources is now about 20

percent of the total. Donor countries actually pay in only a small portion of the amount needed. The bank uses the contributions as backing to borrow most

of the money on the international capital markets. The new funds could have a ma-

jor impact in keeping countries affoat until they can get their economies back on track.

Mr. Conable, asked about the problem of delays on repayments of loans to such countries as Nicaragua, Peru and Romania, said they did not have any adverse impact on bank performance and in many cases were only technical. (Reuters, AP)

BRAVE TALK By Stephen Molton. Harper & Row, Publishers Inc., 10 East 53d Street, New York, N. Y. 10022.

TELL THE WHOLE

NEIGHBORHOOD HOW MUCH I EAT!

GETTING READY FOR ALL THEIR BABY'S PICTURES

The place is a New England seaport, a small town of bars and cheap restaurants, where nearly everyone's life is connected to the local shipyard. The time is 1962; Kennedy is president, the Cuban missile crisis is in the offing. For Adriana Pelletier, the conflicted heroine of Stephen Molton's first novel, it is also a time of growing restlessness and discontent.

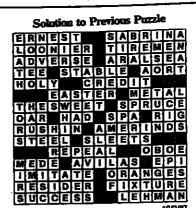

Her busband, Richard, spends half the year at sea, patrolling the North Atlantic aboard one submarine or another, and during his absences Adriana waits at home with their two children, "missing him and the part of herself he always took with him, still hoping for a time when he'd come home to stay."

Increasingly, Adriana finds, she is subject to

nightmares and daydreams that make it difficult for her to maintain an emotional balance. Gradually, Adriana's craving for change begins to focus around a young man she's met during one of her husband's absences, a disaffected drifter named Douglas Clepchak, nicknamed Digit. Having failed to qualify for sub-marine duty and taken a series of menial jobs. Digit spends his nights cruising bars and dreaming vaguely about the future, and his restlessness soon becomes a mirror of Adriana's own.

Although Molton eventually does a convincing job of portraying the sheer physical need that Adriana and Digit develop for each other. his orchestration of their converging lives consists mainly of crosscutting between scenes depicting his lonely life and her lonely life, his need to escape and her need to escape, his inability to connect and her inability to connect, his family problems and her family problems. No doubt this technique is supposed to demonstrate the couple's spiritual kinship, but it has the net effect of making their involve-ment seem neither inevitable nor urgent —

only predictable. It is in the passages where Molton attempts to convey the inner thoughts of these people that he runs into trouble, for he displays a taste for high-flown, lugubrious language that clashes with the inarticulate nature of his characters. Such sentences undermine the gritty atmosphere in "Brave Talk" (hat Molton worked so hard to evoke. (Michiko Kakutani, NYT)

THE PLAYMAKER By Thomas Keneal Simon & Schuster, 1230 Avenue of the Amer.

What is there left to be told about Austra. What is there ten to be took about Amyralia's origin as an 18th-century prison asteroid after "The Fatal Shore?" Plenty, Readers who made Robert Hughes's robust history of the made Robert Hugnes's robust instory of the convict colony a recent best seller have an imaginatively different saga awaiting them here. Indeed, Thomas Keneally's fictional pad. here indeed, though the prisoner founders of orams of the military keepers is one of syoney and men books that insorciantly tells us, not we it, what company it's to keep. The us, not we it what est performance of a north ist's magic that I have seen since William Kennedy's "Ironweed."

lennedy's fromweeth.

In the England that sent its convict arks in in the England Pacific, a music hall job the southermass, world's a stage, who's the driver?" In fledgling Australia of 1789, the unexpected answer is Ralph Clark, a moramentally homesick young marine lieuteant who is ordered to produce a play when the who is ordered colony undertakes, somewhat desperately, to celebrate the king's birthday,

What we have here is a style of rich, change taking fiction that we don't encounter often enough on our own shores. For a generation enough on our own shores. For a generation enough on our own shores. For a generation of the U.S. literary fashion has been "short of the U.S. literary fashion has been the U.S. literary fashion has been so, the U.S. Interary tashou has been some don't tell." Thank God, no such advice and

don't tell." Thank God, no such advice and reached Thomas Keneally in Australia.

And so, Thomas Keneally gives us his ben zest. He is capable of it in a phrase: Dabby Bryant, the convict woman whose imaginative ministration damps down Ralph's dreams, flaunts to him "thighs olive as sin."

At the book's end, this display of skill turns out to be about actual minor figures of the out to be about actual minor figures of the Sydney penal colony, whose lives in exile ask known only in dim outline. Keneally justic concludes, "Of them fiction could make mich though history says nothing." (Ivan Doig 17)

TIME FLIES. By Bill Cosby. Dolphia Doubleday, 245 Park Avenue, New York, N. Y. 1016. day, 245 Park Avenue, New York, N. Y. 1016.

One of the most sensational discoveries of the past decade, ranking right up there with the unmasking of adolescence and the true reason for monogamy, was the realization that people actually grow older as the years go by. If the '50s were the Age of Halitosis and the '60s were the Age of Noise the '80s have become the Age. the Age of Noise, the '80s have become the Age of Age. I know this to be true because

Cosby, the beliwether, ex-counterspy and well-known father, has turned 50. Cosby has written a sort of book about the experience, "Time Flies." I use the phrase "a sort of book" advisedly. Mind you, I yield to no one in my admiration for Bill Cosby, an intelligent actor and a very funny man, and "Time Flies" is occasionally wise and often witty in a way that makes one laugh aloud on public transportation. It is also, alas, hardly a book at all, and not merely because it can be read in about an hour.

Still, there is a genuine talent in there, of a credible imitation of one. The case of That Cosby is the case of a humorist who occasionally appears to be on the verge of perpetrating literature. The time may yet come when he does. After all, he's only 50. (L.J. Davis, WP)

BRIDGE

first high-low signal in the caused them to miss their 5-5 and the club king came into signal in the caused them to miss their 5-5 and the club king came into signal in the club fit, in which an easy 10 own in the fullness of time seaman trained in the traditions of Lord Nelson and the able, and land in a precarious British Navy, he called it a poter, from Blue Peter, a comter, from Blue

He would have been astonshed to know the complexities that developed from his simple idea. A century ater, an American bridge player Hy La-vinthal, introduced the subtle vinthal, introduced the subtle suit. He followed with the idea of suit preference signaling. A fine example is the diagramed deal, submitted by Albert Silber of Southfield, was in the closed hand. South Michigan, as a tribute to his late partner, Erwin Berman of Farmington Hills, Michigan.

By Alan Truscott

Berman's opening bid of three hearts would be a dubious action in first or second seat, but in third seat, some flexibility is permissible, indeed desirable. The pressure exerted on North-South the contract became unmaged the first high-low signal in the caused them to miss their 5-5

count the possibility that he would eventually want his partner to give him a club ruff. He therefore chose the heart queen, immediately suggesting an interest in the low-ranking suit. He followed with the every opportunity. He there fore returned a low club, and

Blue Jays Lose Again, but So Do Tigers Get Lucky in Giants set the major-league I

everal Stars Among 15 More Defectors

m Thursday, a day after quarter-ak Danny White decided to cross striking teammates' picket line prepare to play Sunday in the

nional Footbail League. Receiver Roy Green and defene end Curtis Greer of the St. uis Cardinals and eight-time Pro wi center Mike Webster of the isburgh Steelers also rejoined ar clubs Wednesday, when 15 ectors in all returned, making a al of 40 since the strike began ⊭ days earlier.

Dorsett said Wednesday that he 1 no choice but to return after in officials sent him a letter rning that he would lose an anity and some land that had been suded in his contract. Veteran fensive end Ed (Too Tall) Jones, in the Cowboys, said he, too, ald return to practice, but did t Thursday mornin

Another handful of players, inarterback, Joe Montana, and mmate Dwight Clark, his favorite ziver, said they would decide in whether to return. Others, inthing the Denver Broncos' quar-back, John Elway, said they aid not picket and had not ruled breaking from the NFL Players Four of the striking New Orleans ints crossed the picket line, in-

iding starting defensive linemen use Clark and Tony Elliott. Webster and 1,000-yard rusher mest Jackson walked out of a eing with union chief Gene Upaw and joined the Steelers' recement team. John Stallworth d Calvin Sweeney also walked y whether they would rejoin the m by Friday morning at 9, the FL-imposed deadline for striking ryers to rejoin their teams to be gible to play this weekend.

Upshaw, the NFLPA's executive ector, insisted that the union's fidarity would not be affected by defections. He returned to eshington after his latest flying it to a striking team and said that s players, with the help of local for union employees, would have tet lines at every stadium Suny and Monday night. What you have to look at are

n't think three or four guys in the nional Football League consti-

guys who are out," he said. "I

ompiled by Our Staff From Dispatcher . Since the strike began Sept. 22 has WASHINGTON — Tony Dor-t the star running back of the llas Cowboys, returned to the

> Both the NFLPA and the NFL Management Council said no negotiations have been scheduled.

The Cowboys' White, who has had well-publicized financial problems resulting from bad business deals, said, "I decided to come back in on Monday when I heard Gene Upshaw say the union was in it for the long haul." His contract calls for a salary of \$750,000 if he starts more than eight games this season; \$500,000 if he starts fewer. He reened from the union.

Dorsett, one of the most vocal union supporters, earlier this week had called teammate Randy White 'Captain Scab" when the defensive lineman crossed the picket line. But Dorsett, who also has had severe financial problems, told teammates Wednesday that "I have no choice" after receiving the letter from the team's president, Tex Schramm.

Schramm confirmed sending the letter, and one to Jones, but wouldn't go into details other than to say "it involves a lot of money."

Denver's Elway, who recently be-came the NFL's highest-poid player, said he will not picket because "as good as" team owner Pat Bowlen "is to us, I don't think we need to be walking in front of his office. Everybody knows we're on strike anyway. You could drag me out there, and I still wouldn't be on the line."

The San Francisco Examiner reported that as many as 10 49ers. including Montana and Clark, were considering coming back. Clark said that "I'd like to say I went out with all the guys and I'm going to stay out with all the guys, but it's not that simple."

Webster, a 14-year veteran who started on all four of Pittsburgh's Super Bowl champions in the 1970s, said. "I'm not ready to turn my career over to Jack Donlan," the league's head negotiator, "or Gene Upshaw."

Webster walked out of the meeting with Upshaw and drove 70 miles to Johnstown, Pennsylvania. where the Steelers' replacement team was practicing. A few hours later he was joined by Jackson, the team's leading rusher last season.

The Cardinals' Green, an All-Pro in 1984 who had made 11 In Washington, people lined up catches for an average of 20.8 yards outside RFK Stadium for as long in two games this season, said he as 21/2 hours to return tickets to had always felt lukewarm about the Sunday's game against the Cardinals. The Redskins have an NFL-

the Cieveland Browns.

Washington Post Service
WASHINGTON — If this is Thursday, Gaston Green must be in my mailbox. He's always there by tion machine. Good old reliable Gaston Green wearyour head is made of wood and you don't get the hint, there's printing in the top left comer of the post card:

Handwritten on the back are Green's key statistics. On the latest post card, for example, under the headline "This Week Versus," we learn that last Saturday against Arizona, Green gained 149 yards on a UCLA record-tying 39 carries, and that his long run was 20 yards. Under the headline "Season Totals," we're told made all the highlight packages, replayed 10,000 times. that Green has 445 yards and five touchdowns in 99 rushes, and 16 career 100-vard games.

I get similarly invaluable information every week. I lins, flattering me no end.

Speaking as an acknowledged important-type and

they see what Gaston's doing. The second preference nitely no cigar. The Purdue sports information direcis that somebody will write about him and mention his tor took the interstate out of West Lafayette, Indiana, shot. I promise you'll see it." statistics." (Although what's so great about 149 yards and never looked back.

in 39 rushes, not to mention 46 yards in 19 tries against

UCLA began planning the Gastoning of America at admitted, "You will if I have anything to do with it."

Nebraska? That's 3.4 yards a carry. A 3.4 gets you the the close of last season, after Green went for 224 yards Dean's List, not the Heisman.)

UCLA printed 6,000 post cards at a cost of \$2,500, and sends them weekly to 450 important-type and key people like me. Using 22 cents postage, that's \$99 more a week. The labor is free, volunteered by students, but over 11 games the cost of publicizing Gaston Green could have bought Southern Methodist an all-America center. "I really love the post cards," I said. "But I don't

have a Heisman vote." Oops. Dellins hadn't known. I detected a nervous

giggle. "So maybe you won't get any more post cards." Last season, Miami's Vinny Testaverde won the Heisman in his fourth game, when he was 21 for 28 and four touchdowns against No. 1 Oklahoma. Testaverde put the Heisman on ice with one play: turning a 15-yard loss into a first down on a breathtaking scramble that demonstrated his strength and maneuverability. It

We began this season without a Heisman frontrunner, but the top flight of contenders was generally perceived to include Green, Notre Dame's Tim Brown and Michigan State's Lorenzo White. On the second tier: Florida's Kerwin Bell, Oklahoma State's Thurman Thomas, Holy Cross' indefatigable Gordie Lockbaum.

The Heisman is U.S. college sports' big prize. It can make or break a career in sports promotion. In 1966, Purdue's Bob Griese finished second in Heisman voting to Steve Spurrier; in 1968, Purdue's Leroy Keyes

and four touchdowns against USC, then 266 yards and three scores against Brigham Young. Dellins said, "He demonstrated he's the kind of back who could win the Heisman." The post cards were ready by August.

According to a fellow who knows as much about college football as anyone else, until the mid-1960s nobody thought about the Heisman until late October or early November. Now, with TV stoking the trophy weekly, Heisman campaigns are as aggressive as those for Oscars, and nearly as long as for the New Hampshire presidential primary.

But all the post cards and key chains and pens in the world can't overcome a phenomenal performance on national TV — like the one flanker Brown gave against Michigan State, going 71 and 66 yards in back-to-back touchdown punt returns. There's no better highlight in football than a great return. With the built-in advantage a Notre Dame star has in any season, let alone the kind of "Wake The Echoes" season this portends, Brown's the sensible bet now. Not a week goes by when Notre Dame isn't on TV. If the fruit Brown

wanted to pick was any riper, it'd grow in a can. So we shift focus from UCLA's 32-year-old Dellins to the ageless wonder of sports information, Notre Dame's Roger Valdiserri. It was Valdiserri who told the young Joe THEES-mann, "From now on it's THIGHS-man, as in Heisman,"

"Before this season's over," my authority predicted, "you'll see at least three photos of Tim Brown, wearing was second to O.J. Simpson; in 1969, Purdue's Mike a sweater, carrying his books in his hand — that's Phipps was second to Steve Owens. Close, but definitely no cigar. The Purdue sports information directions of the Purdue sports information directions.

Sentimental Silliness

By Russell Baker

NEW YORK —The suggestion that the press should have a bad conscience about forcing Gary Hart and Senator Joseph Biden out of the political competition is sentimental silliness. Somebody would have had to get them out eventually and for doing the job sooner rather than later the press ought to be commended.

By narrowing a confusingly large gang of competitors, the press has theoretically done a service. It provides an opportunity for closer scrutiny of the rest of the bunch. Whether many people will take advantage of the opportunity is another matter. Scrutinizing the politare stuck with full disclosure. Arguically ambitious is not something that normally interests most Americans until all but two have been eliminated, by which time it is too

Yet it is unfair to scold the voting masses for not participating more passionately in the early elimination heats. Who would want to live in a country in which millions spend their days seeking to learn how Senator Paul Simon, the Reverend Jesse Jackson, Governor Michael Dukakis, Vice President George Bush and Senator Robert Dole differ philosophically on the matter of reducing the balance of payments deficit?

In the darker ages, or bad old days, if you prefer, winnowing the field of competitors was left to a few experts who spent their lives in politics and government and had useful knowledge to guide them in making the cuts. Now that we have reformed these tyrunts out of exisience and given the winnowing job to the uninformed and uninterested multitude, almost everybody can and does have a run at the presidency, usually on the theory that you can foo! all of the people some of the time, so why not take a crack

It is soft-headed to abuse the press for doing the serutinizing that used to be done by political professionals. The public, for sensible reasons, will not do it: television is too timid to do it; the political professionals are barred from doing it by the forces of moral uplift that have turned presidential campaigns into television entertain-

Well, somebody has to point out

that Biden, pleasant though he may be, is not a very serious man, or at least not sufficiently confident about his own identity to trust it

out alone in public. Somebody has to point out that Gary Hart's personal life is more modern than we have been accustomed to in our presidents. In the bad old days the bad old bosses would have known that and made their own judgment about its effect.

In the bad old days, of course, the first question they would have weighed was whether it could be concealed. When you abolish the had old bosses and transfer their function to the press, however, you ing that the press should not assume the bosses' role quite so completely is to argue for fooling all of the people some of the time.

The press has gone along with that in the past, but is not so com-pliant nowadays. Why? Perhaps it is a reaction against the fakery that has become so easy since presidential politics turned into television entertainment

Since 1952, the electorate has been treated by politicians less and less as an electorate and more and more as an audience. And with good reason: the man who gets elected president tends increasingly to be the man with superior production and performance skills.

As presidential politics becomes a big-ticket branch of the entertainment industry, fooling all of the people some of the time becomes a very high art performed by heavily funded battalions of show business experts who are masters of creating

The press, let us admit it, has always been sullen and surly about its television competitor. There is a sense in the newspaper business that the TV guys are too soft, too profit-oriented, too prone to let the olitical guys get away with murder because TV needs entertainment to hold its audience.

The politicians know, of course, that TV will destroy them if they don't master its black art well enough to give a winning performance. Now they face the possibility that the press may destroy them too if it catches them carrying the performance to extremes of fakery.

New York Times Service

Novelist Clive Barker's Books of Blood

By David Streitfeld Washington Post Service

T ONDON — Clive Barker is

revisiting his old haunts. Ghastly pale sky, stale air, constant threat of rain. It is a typical English afternoon. Yet the crown prince of horror fiction scarcely notices the weather, so absorbed is he in peering through the abundant foliage, studying crumbled tombstone inscriptions and remi-niscing about his adventures

among the 166,400 people buried

in Highgate Cemetery. There was, for instance, the vampire hunter. "I met him once. He had just got out of jail basically he had been digging bodies up and staking them. A very strange guy, but who's to say he's wrong? One must give him the benefit of the doubt, and assume that he actually assumed these people were really vampires. Otherwise, why do it? It's very uncomfortable digging up bodies late at night. Who'd want to do

"And I'm not so thoroughly certain of the way the world works that I would absolutely discount the possibility that once in a while some restless spirit gets up and knocks people over.

That's Barker: not only a fascination with the darker corners of death and life, but a desire to share his enthusiasm - to tell what it feels like to hold a man's brains in his hands, or to describe the ultimate horror film as simply a chronicle of the physical changes a human body goes through in a lifetime.

And Highgate? Well, this is where he's done some of his research. Nothing illegal, mind you. Nothing too unseemly, even. It's just that the cemetery's near his home, so it's easy to drop in for an hour of mulling over the horror tales that are turnbling out of him in abundance, earning him ac-claim and sales figures second only to Stephen King. Hollywood has also taken no-

tice. Barker wrote and directed the new movie "Hellraiser," becoming in the process a commodity hot enough to turn down a chance to write and possibly di-rect the third "Alien" movie. "I was busy." he says. "and secondly it was someone else's aesthetic.

The parameters on originality were fairly strict."

Five years ago Barket was un-known to all but a few avantgarde theatergoers in England. and totally unheard-of in the United States. Now, in little more than a year, seven books of fiction have appeared. His volumes of short stories, The Books of Blood," have done extremely

Stephen King, the United States's best-selling novelist says, "I have seen the future of horror and it is named Clive Barker. He makes the rest of us look like we've been asleep for the past 10 years." Meanwhile, the publishing industry, which has been looking for another King has weighed in with its own form of compli-ment. For Barker's next book, which exists only in his mind, he was offered an advance of \$1 mil-Fiction, however, is only one of

Barker's abilities. In the beginning he was a playwright: "The History of the Devil," "Subtle Bodies," "Frankenstein in Love," He's also written screenplays based on two of his stories, but the finished products, "Rawhead Rex" and "Underworld," were so had that he repudiated them. So for his latest movie, "Hellraiser," he not only wrote the screenplay - about a love triangle, a dead man who wants a new skin and punk visitors from another di-

mension — but also directed. The picture opened in the Unit-States this month, and he's quite proud of it. "I'm not just taking the 12 most beautiful youths in California and murdering them," he says. "I've got real actors, real performers - and then I'm murdering them."

Oh, yes, he's also an accomplished artist who did the covers for the British editions of "The Books of Blood." These are vigorous, gruesome creations that not only serve as come-ons for the contents but as exact reflections of them. Not bad for a 34-yearold who was living on welfare five

years ago. Barker tends to write about ordinary people whose lives are rudely interrupted by the supernatural. "Pig Blood Blues" tells of a new teacher at a school for ado-lescent offenders who discovers

INTERNATIONAL CLASSIFIED

Barker: "All I have is a fevered imagination."

that the students worship a monstrous, man-eating porker, and guess who's coming to dinner? In "The Body Politic," a man's hand rebels against him, and he learns what the sound of one hand clap-

In his later pieces and the two novels, he relies less on splashy horror and concentrates on extending his range of effects.

"I view myself as a commercial writer. I operate in the marketplace, which has expectations. I'm trying to turn those expectations on their head, but it would be naive to expect they didn't exist." Barker grew up in Liverpool just a few steps away from the

kid. Typical, that is, for a future writer: pudgy, short-sighted and introspective. But he waves away any speculation that all horror writers had warped youths. He knows what interviewers want him to say, and delivers it in a mocking voice:

"My sex life has been a disas-ter, I spent a lot of childhood being obliged to kiss the corpses of dead relatives. I'm very very uptight, and the only thing I feel comfortable in is a straitjacket."

Actually, his parents were very

supportive, indulging young Cive's fondness for plastic Dra-cula models and encouraging his budding artistic abilities. "He was Beatles' Penny Lane, and went to
John Lennon's Quarry Bank
grammar school. He was a typical

grammar school. He was a typical

Still, a friend remembers him "as

EMPLOYMENT

always fascinated by death and the forbidden and taboos." Within reason. "Like any sensible person, he wants his thrills from art. Clive used to faint at the sight of blood

Sitting on the living room floor in the pleasant house he shares with a friend in London, Barker is no longer pudgy or bespectacled ("It's the virgins' blood," he quips). But he's still as introspective as ever, and can analyze himself in a stroke: "I have the normal complement of anxieties. neuroses, psychoses and whatever else - but I'm absolutely nothing special. All I have is a fevered imagination, which actively likes to make elaborate metaphors to discuss and explore those anxieties and neuroses and psychoses. "I once suggested that the most

extraordinary horror film ever would be if you could actually buy a life. The moment the child was born and for the next 70 years, you'd take a picture of him every minute. Then, at the end of 70 years, you'd run the movie. You'd be watching the source of every transforming metaphor in horror fiction, perfectly embod-

"Our lives are dominated by the fact of our bodies. We know discomfort, arousal, hunger, appetite. We are living in this extraordinary secret thing. It's a house whose innards we cannot know. The moment we are looking at our bowels, we're dead. Hence, for me, the interest in looking at somebody else's - the closest I can get to looking at my

Which is why, for research purposes, Barker attended the autopsy of a 79-year-old man a couple of years ago. He wanted to see if he could handle it, and he mostly could. "The only part I couldn't take is when they sawed the top of his head off."

The pathologist asked if Barker wanted to hold the brain. Of course he did. "I held it, and I thought the same thing that I think in the cemetery - that there was this story, and it was silenced. In this literally two handfuls of pink jelly, if it could only be plugged in and relived, there was 79 years of hatred and love and betrayal and sexuality and confusion and theology and ambition.

AUTOS TAX FREE

hit British headlines on Thursday after a court declined to ban the queen's son-in-law, Captain Mark Phillips, from driving when he ex-creded the speed limit by more than 30 mph (50 kph). British tab. loids reveled in the "them-and-us"

> lips. 38, was fined £120 (about \$195) for clocking 103.6 mph in a 70 mph speed zone. Offenders who exceed 100 mph are regularly disqualified by Britain's courts. Phil. lips has been convicted twice previously for driving offenses. Judge Eugene Lynch dismissed a \$10 million suit for defamation and invasion of privacy against The New Yorker magazine. Janet Mail colm, a staff writer for the magazine, and Alfred A. Knopf the publisher. The suit was brought by leffrey M. Masson, a Californian psychologist and author of "The
